

Caster of Magic Warlord Mod Manual

Mod Creator – Username Suppanut

Document – version 1.5.12.6 maintained by username zitro1987 & Suppanut

Special Thanks to:

Seravy – Creator of Caster of Magic for Windows

Zitro1987 – Units and combat balances

Anskiy/DevAnj – Playtester, feedback

Slingers – Optimization method, Hanger, Brewery, Academy, Idol of the Heavenly Bull, Dragon Mound, Altar of Storm, Caravanserai, Land Drake, Arch Liches, Simurgh, Wrag, the Planewalker, the Sagittarius, the Crone, the Warmaster, the Grand Inquisitor, the Steelbreaker, the Dreamwalker, the Gambler, Goblin race.

Mewcatus – Optimization method, detect fortress location script, method to detect city in focus on recruitment screen.

Demian – Pool of Repentance, Frost Club Hall

WingOfMemory – Hadriex wizard set, Sea Serpent, Goblin race, Lizardman Marines, Lizardman Javelineers, Lizardman Shieldbearers, Lizardman Dragon Turtle.

Hadriex – Livestream playthrough

Mechanical Beanstalk – Livestream playthrough

Sapher – Video playthrough

Starwisp & Verwalkon – Method to extract sprites and pictures from Civizard

Onyx Scarub – Text and description improvement.

Kevin MacLeod – His royalty free music Lithium, Mystery, The Pyre, Midnight Tales, Skye Cuillin, Frozen

Star

Freesound Community – Terror Scream sound effect

Universfield – Crowd Disappointment sound effect

Kidjoker27 on Deviant Art – The Omniscient Grimoire artwork.

Slingers – for many artworks we shared.

Summary

Caster of Magic Warlord mod's main goal is to improve immersion and reduce repetition when using normal military units. Normal units have been redesigned, and several dozen new stock and racial unique units (with complete new animated sprites) have been added across the board.

The units recruited from Armorer's Guild and Fantastic Stable buildings typically cost more and are far more advanced than their Caster of Magic counterparts. These units are not part of the Caster of Magic design of being disposable and inferior to summons and spammed all over the world to the point of clutter.

Four new races have also been introduced – Xuanyuan, Hawkmen, Rakhshasa, and Goblin

The mod also considers asymmetric game balance to be a key factor to game enjoyment to stay true to the spirit of Master of Magic. There will be moments where you might wonder an individual element is unusually strong – for the most part that is intentional though minor balancing tweaks will continue with future versions.

There have been spell modifications, including entirely new summon units. Two additional uncommon (total 12) and three rare tier spells (total 18) are available for research. Realms have been re-balanced accordingly and magic realm themes have been preserved.

Gold and food maintenance of units have been adjusted to lessen unit spam, particularly for AI wizards. Economic buildings with lower upkeep to prevent them being a drain to your coffers (only your military and rush-buying should be).

Races, heroes, and building mechanics have also been redesigned to fit the modder vision, then heavily play-tested with balance taken into consideration. Some of these updates reverse changes from Caster of Magic to something closer to the original Master of Magic, albeit not completely. There are also visual changes.

Additional changes across the board are for you to discover. Many are not included in this manual as they are not related to gameplay, just immersion.

Installation

How to install (1.5.12.6):

- 1) Uninstall/unload old version of mod (see below) ****
- 2) Create folder "Master of Magic Caster Windows 1.5.11".
- 3) Copy all content inside folder "Master of Magic Caster Windows" to "Master of Magic Caster Windows 1.5.11"
- 4) Install patch of Caster of Magic for windows version 1.5.11 (which could be found here: <https://www.realmsbeyond.net/forums/showthread.php?tid=11090>) by copy content from folder "CoMWin1511" inside the zip file into folder "Master of Magic Caster Windows 1.5.11".
- 5) Unpack "CoM2ModWarlord1.5.12.6.7z" into "...\\Master of Magic Caster Windows 1.5.11\\Mods" folder.
- 6) Run caster of magic for windows 1.5.11 from folder "Master of Magic Caster Windows 1.5.11" until reach main menu.
- 7) Choose the "Load Mod" option in the lower right corner.
- 8) Type mod name "WARLORD" and enter. This will automatically load mod files into the data folder while original file in data folder would be backup for sake of later reversion. (In case you have your own customize artifact, backup your own "items.dat" before doing so or you would lose them.)
- 9) Once the process is completed, game will automatically exit.
- 10) Run caster of magic for windows again, now game would become Caster of Magic for Windows: Warlord.
- 11) Please play the game with these setting...
 - Pick "Use Legacy Tileset" (to activate Civizard tileset)
 - Pick "Remove Tree" (so that tree in combat would not be too messy)

How to reset environments setting back to original (tile back to legacy tileset, raise volcano animation, combat vegetation and combat item as well as music back to original)

- 1) Copy content in folder "mods\\Warlord\\backup original environment\\" to "data" folder.
- 2) Now you are free to pick "Remove Tree" or not pick "Use Legacy Tileset" setting.

How to reset music back to original only.

- 1) Copy content in folder "mods\\Warlord\\backup original environment\\music" to "data\\music" folder.

How to uninstall the mod.

- 1) Go to the main menu.
- 2) Click "Unload Mod" option on lower right corner. Game will automatically unload the mod and replacing them with backup files (not included your own items in "items.dat", this one must be done by yourself)
- 3) Game would exit upon completing process.
- 4) Restart the game and game would be back to become original Caster of Magic for Windows without Warlord mod.

Book System and Retorts has been modified:

- How many spells are granted per book. The new system is fully symmetrical (1-3-4-5-6-7-8-10)
- being able to research a single common-tier spell at random for all realms without books chosen.
- Starting Power Changed. Every book always grants starting power and skill, not just when you have 4+ books of a type. Book 3 to Book 4 no longer grants +6 starting power.
- Starting Power Formula is now 9 + 1 for books 1-7 + 2 for books 8-9 + 3 for books 10-11 and +4 for book 12
- Starting skill follows fairly closely, though due to different method of calculation may be slightly lower for first 3 books of a type.
- Guaranteed very rares eliminated
- Guaranteed rares limited to book 10 only (as guaranteed early rare)
- Book-based discounts changed from 8% research / 5% spell per book starting book #9 to 5% research (starting book #6) and 3% (starting book #7)
- Books 9 and 10 grant an additional starting common spell.

The amount of starting overland skill is approximately 2 to 4 below Caster of Magic (reduction of 1 per 3 books) to balance city vs magic production early in the game (given the changes that took place in city mechanics)

Book	Common	Uncommon	Rare*	V. Rare	Starting C	Other	Research	Spell cost
0	(1)*	0	0	0	0	(if picking zero book rule scoring option)		
1	3	1	0	0	0	Trade Common		
2	4	3	1	0	1	Trade Uncommon		
3	5	4	3	1	2	Trade Rare		
4	6	5	4	3	3	Trade V Rare		
5	7	6	5	4	4	Guarantee 1 unc		
6	8	7	6	5	5	Guarantee 2 unc	5%	
7	10	8	7	6	5	Guarantee 2 unc	10%	3%
8	10	10	8	7	5	2 early unc	15%	6%
9	10	12	10	8	6	2 early unc	20%	9%
10	10	12	12	10	7	2 early Unc 2 R	25%	12%

Note that you have 12 uncommon spells and 16 rare spells to choose from, +2 and +4 for these tiers. In the case of rare-tier spells, arrows are provided to scroll up and down during the 10-book 'early rare' selection.

- Book 1 = 10 power
- Book 2 = 11
- Book 3 = 12
-
- Book 7 = 16
- Book 8 = 18
- Book 9 = 20
- Book 10 = 23
- Book 11 = 26
- Book 12 = 30 power

Retorts

Retorts have been reworked with some retorts change, all of them get spells exclusive to their own.

Alchemy Alchemist:

The wizard is an expert in the art of Alchemy.

- Allows the wizard to convert gold to mana and mana to gold at a rate of 1:1.
- All non-summoned units trained by the wizard from non-Barbarian cities gain magic weapons.
- Alchemist's Guild cost 15% cheaper.
- Could access to spell "Philosopher's Stone".
- Costs 2 picks.

Warlord:

The wizard is a renowned militarist.

- All non-summoned units under the wizard's control have their veterancy level increased by one.
- Allows non-summoned units to exceed their normal veterancy limit by one level.
- Barracks, War College, Armory, Fighter's Guild, Armorer's Guild, City Wall, Fortification, Hillfort, and Warlord's Hold cost 15% cheaper.
- Warlord could utilize global ability of Warlord's Hold regardless of home race.
- Could access to spell "Wall of Stone".
- Could access to spell "Mark of Conqueror".
- Mutually exclusive with the Tactician retort at the start of the game.
- Costs 2 picks.

Channeler:

The wizard has mastered the art of channeling spellcraft.

- Allows the wizard to cast spells without range penalties.
- Reduces spell range penalties during banishment by half.
- Reduces overall spell upkeep by 50%.
- Reduces the cost of casting spells in combat by 12%.
- Could access to spell "Marionette".
- Could access to reform "Marionette Ascension".
- Costs 2 picks.

Archmage:

The wizard is a renowned master in teaching and training spell casting.

- Increases both already acquired and newly produced skill points (SP) by 50%.
- Could access to reform "Archmage's Tutition".
- Could access to reform "Archmage's Mentorship".

Artificer:

The wizard is a master craftsman who is an expert in magical engineering.

- Reduces the cost of making items/artifacts by 50%.
- Starts the game with the "Enchant Item" spell already researched.
- The "Create Artifact" spell will be the first researchable Rare level spell.
- All mechanical units trained by the wizard gain +1 Melee/Range Attack, +1 Armor, +1 Resistance, +1 Movement Point, and magic weapons.
- Could access to spell "Clockwork Tinmen".
- Could access to spell "Clockwork Factory".
- Could access to spell "Rebuild".

Conjurer:

The wizard is an expert in conjuring magical creatures.

- Reduces the casting costs of all summoning spells by 25%.
- Reduces the research costs of all summoning spells by 25%.
- Reduces the total upkeep cost of Fantastic creatures by 25%.
- Starts the game with the "Summoning Circle" spell already researched.
- Could access to spell "Conjuring Pact".
- Could access to spell "Spirit Link".

Sage Master:

The wizard is a renowned scholar.

- Increases total research points generated each turn by 33%.
- Increases research points by 15 RP each turn.
- Library, University, Sage's Guild, Academy, and Ludus Agoge cost 15% cheaper.
- Could access to reform "Education Reform".
- Could access to spell "Arcane Conference".

Myrran:

The wizard is native to the plane of Myrror.

- Starts the game with a fortress on the plane of Myrror.
- Allows the player to choose Myrran races as their home race.
- Adjusts the starting positions of AI wizards accordingly.
- Could access to spell "Astral Gate".

Guardian:

The wizard is respected as the guardian protector of his people.

- Increases the maximum population of the home race's city by 6 units.
- In combat, all units controlled by the wizard gain +10% To-Hit, +10% To-Defend, and +1 Resistance when defending the city controlled by the wizard.
- Could access to reform "Lord Liberator".
- Could access to reform "Lord Protector".
- Costs 2 picks.

Famous Benefactor:

The wizard is well-known as a benefactor who willingly lends a hand to those who serve under them.

- Starts the game with 30 fame, and the "Heroic Heart" spell already researched.
- All heroes controlled by the wizard gain +2 Melee/Range Attack, +1 Armor, and +1 Resistance.
- 2x chance for artifact merchants, and 4x chance for mercenaries offer.
- If have enough gold, a hero is guaranteed to appear for hire in January, an item merchant appears in July and mercenaries always show up in April and October starting in 1502.
- Heroes and mercenaries offering to join will be at a 1 level higher than usual and hiring cost of them do not increase by their level.
- Could access to spell "Bountiful Festivity".

Runemaster:

The wizard has mastered the power of rune language.

- Reduces research costs of Arcane spells by 50%.
- Reduces casting costs of overland spells (except Arcane, summons, and enchantments) by 25%.
- Reduces casting costs of overland Arcane spells (except item creation, and summons) by 50%.
- Reduces casting costs of combat Arcane spells by 25%.
- The effects of dispel-type spells cast by the wizard are 100% more effective.
- Starts the game with the "Dispel Magic" spell already researched.
- Could access to spell "Rune Formation Array".

Charismatic:

The wizard possesses an unnatural presence that dramatically improves his dealings with others.

- Reduces the costs for hiring heroes, mercenaries, and purchasing magical items by half.
- Reduces the unrest level in all cities owned by the wizard by 1.
- Halves all diplomatic penalties from negative actions.
- Doubles all positive diplomatic effects.
- Offers made by the wizard are significantly more likely to be accepted.
- Could access to spell "Rally".
- Could access to spell "Denouement".
- Could access to spell "Persuasive Whisperer".

Specialist:

The wizard invests their skill and effort into mastering their primary realm. Primary realm is determined by the realm with the highest number of books. In case of a tie, specialist realms are prioritized in this order: Nature, Sorcery, Chaos, Life, and Death.

- Reduces the casting costs for spells in the wizard's primary realm by 12%.
- Reduces the research costs for spells in the wizard's primary realm by 12%.
- Increases dispel resistance for spells in the wizard's primary realm by 50%.
- Could access to reform "Gaia Mastery".
- Could access to reform "AEther Mastery".
- Could access to reform "Chaos Mastery".
- Could access to reform "Life Mastery".
- Could access to reform "Death Mastery".

Tactician:

The wizard is renowned for their skill in maneuvering troops in combat.

- The wizard can sneak attack, making defenders lose their first action unless it's another wizard's fortress, they have Tactician, or Supernatural Primal power protects them.
- All the wizard's units gain +1 Armor.
- The wizard's teleporting units gain First Strike.
- The wizard's Non-Corporeal units gain Negate First Strike.
- The wizard's units with a terrain bonus gain double the bonus, First Strike, and Negate First Strike.
- Gets a bonus in strategic combat.
- Could access to spell "Tactical Drill".
- Could access to spell "Tactical Recall".
- Could access to spell "Strategic Recall".
- Costs 2 picks.
- Mutually exclusive with the Warlord retort at the start of the game.

Omniscient Procurator:

The wizard is an expert in managerial and statecraft.

- Reduces "Indirect Control" and "Banished" city penalties by 25%.
- Triples the "Administrative Skill" bonus.
- Could access to spell "Town Portal".

Cult Leader:

The Wizard is the leader of a religion/cult with strong influence over the believers. Religious buildings include the Shrine, Monastery, Witches' Convent, Cathedral, and Temple. Certain buildings and city enchantments may be sanctified into religious buildings through certain spells.

- Increases the power generated by religious buildings by 100%.
- Increases the unrest reduction by religious buildings by 50% (rounded down).
- Could access to spell "Gospel of Evangelism".
- Could access to spell "Divine Judgement".

Astrologer:

The wizard is an expert in predicting and manipulating destiny by reading stars.

- Nodes controlled by the wizard produce +2 power for each year passed since the start of the game.
- Immune to spell-countering effects from nodes.
- Could access to spell "Dishearten Prophecy".
- Could access to spell "Lucky Star".
- Costs 2 picks.

Spellweaver Enchanter:

The wizard is an expert in the art of enchantment.

- Reduces the cost of enchantment/curse spells cast by the wizard by 25%.
- Increases dispel resistance of all enchantments/curses cast by the wizard by 150%.
- Could access to reform "Tatto Magic".
- Could access to spell "Domain of Enchanter".
- Costs 2 picks.

Difficulties

Game difficulty settings in Warlord mod have been adjusted relative to Caster of Magic, with the following key points:

- AI upkeep multiplier is for the most part removed. AI doesn't need upkeep immunity to stay challenging. This reduces unit spam considerably.
- AI overland spell casting cost multiplier is toned down.
- Easiest 2 difficulties do not penalize AI resources. Instead, player is rewarded with power and production bonuses
- Hardest difficulties do not reward AI resources as much. Instead, player is handicapped with various city economy penalties.
- The 'stalling' AI tactic is introduced in 'advanced' difficulty, tailored towards challenge-seeking players

	Beginner	Easy	Normal	Fair	Advanced	Expert	Master	Lunatic	Phantasm
Score Multiplier	100%	100%	100%	130%	160%	200%	250%	300%	400%

Human Penalty gold,res,food,prod (round down)							10%	20%	25%
Human Penalty Unrest						5%	10%	15%	20%

Building and City Changes:

Summary: Early city progression is slowed due to generally higher production costs, reduction in early fixed production bonuses, and less accessible higher-tier production buildings. The changes partially bring back the city progression pace of the original Master of Magic early game through late game. The amount of starting overland skill is approximately 2 to 4 below Caster of Magic to balance city vs magic production early in the game.

Economy buildings are more interconnected via pre-requisites (dependencies) and are inspired by a few building tree mechanics choices from the original Master of Magic. Tree of knowledge carries a higher research and casting cost (2000 and 250, respectively) and also unlocks Maritime's Guild, Wizard's Guild and Amplifying Tower. Unlocked economy buildings all share the same building prerequisite: Sage's Guild.

Several economy buildings take more time to build, but gold maintenance of economy buildings generally reduced with a city with all buildings typically saving roughly 20 gold per turn. However, there are 2 contributors to gold loss in this mod: non-capital income penalty, and higher unit upkeep costs. What makes you poor is not your own cities simply existing, but having an excessive number of units. This helps make game less cluttered and come with end turn savings.

Early military aided by bringing back Master of Magic's Armory as an early recruitment building. It requires more investment to develop a military city that pumps out experienced and magic-weapon units. This was needed to balance the superior, less disposable nature of normal units.

Non-Capital cities are less productive, they receive a penalty to gold, food, production, power based on their distance from capital city.

Mountain terrain have a 5% production bonus (instead of 7%). Volcanic terrain retain their 7% bonus.

Trade income cap per city is now 2% per pop (from 3% per pop).

Early Buildings:

Mill (cost 80/1) – No longer a massive production boost to new towns. Redesigned to grant 1 prod + $\frac{1}{2}$ production per active farmer, yielding significantly more hammers in large cities (v 1.4.17 adjusted rounding issues). Sawmill is no longer an essential early building to jump start a new town's production.

Dock (cost 120/0) – Now grants 1 food per ocean, coast, and rivermouth tile

NEW! **Shipyards** (cost 300/1) – Split from Dock and become requirement for Galley and Fire Galley

Smithy (cost 75/0) – Grants 3 fixed production (4+ in good terrain) and most units no longer require it.

Alchemist's Guild (cost 150/2) Alchemist Guild now grants +2 research – bringing back the original master of magic feature of it granting a minor economy bonus. Cost is noticeably higher however.

Barracks (cost 200/1) – Barracks, which now require armory, delays starting experience boosts similar to Original Master of Magic. This is needed to balance the enhanced stats among starter units and helps keep them viable for a bit longer due to their low recruitment cost, while benefiting later units as well.

NEW! **Armory** (cost 150/1) – Armory has been restored from original Master of Magic, being the building for recruiting the next tier of spearmen units (e.g. halberdiers), a few unique racial units below the level of Fighter's Guild, and a secondary requirement for many support units like magisters. Units from armory typically a midpoint between starter units and fighter's guild units. They tend to be cost effective and melee-oriented.

Fighter's Guild (cost 200/2) – Recruits the next tier of swordsmen, bowmen, and cavalry units (all unique to Warlord mod) if permitted by race, as well as a few unique racial units. Troops more advanced than what is provided by Armory.

War College (cost 540/3), now requires Fighter's Guilds and grants a racial unique unit for two races (Dwarf, Gnom), both cost effective given they recruit with a minimum of veteran experience level. War College help keep bottom-tier and mid-tier units viable due to their lower recruitment cost while waiting for Tree of Knowledge.

Stables (cost 120/2) – Grants 4 fixed production (5 to 6 in good terrain).

Miner's Guild (cost 200/2) - Considerably more expensive, worth building once town is reasonably grown.

Mechanician's Guild (cost 400/4) – Changed to give +1.5 prod per worker (w/ +1/2 from town hall it adds to +2). Considerably more expensive, worth building once town is reasonably grown. This building increasing opportunity cost when accomodating food upkeep.

Also grants 2 mid-tier mechanical units of higher usefulness than Caster of Magic's catapult.

Town Hall (cost 80/0) – (previously known as Builder Hall) Allows buildings associated with advanced civilizations, but also grants 0.5 production per worker, which is approximately a 15-20% production boost.

Marketplace (80/0). Income reduced to 7 (from 8).

Farmer's Market (cost 150/1) – Population growth bonus reduced by 10. Instead of granting food, Farmer's Market grants 0.5 gold per population.

NEW! **Brewery** (cost 200/2) – Consume portion of Foods produce in city based on number of pop unit and convert to gold at rate 4 Gold per Food.

Forester's Guild (130/1). Grants 4 food but gives +2 for each wild game resource in vicinity.

Magic Market (100/0) – had power income reduced to 4.

Library (80/0) – had research income reduced to 4.

Monument (75/0).

University (180/1).

Monastery (aka. Parthenon) (cost 200/1) – Priests no longer recruited here.

Cathedral (cost 500/2) Cathedral allows inquisitors (high men) and now grants 2 unrest reduction.

NEW! **Temple** (cost 400/1) – the alternative of Cathedral for some races, allows priests. The alternative Temple building only grants 4 power and 1 unrest, but can be built faster and grants 3 power and 1 unrest for each nightshade, orihalcon, and wild game tile in the vicinity of town.

NEW! **Witches' Convent** (cost 400/3) – Generates 4 religious power and curses enemy units when the city is attacked.

NEW! **Fortification** (cost 600/5) – Requires mechanician guild and wall – All units inside city walls gain 'large shield' effect and city in combat is surrounded by ocean tiles, thus impassable unless water walking, non-corporeal, or flying. If playing with automatic combat, it grants +4 defense to units.

NEW! **Hillfort** (cost 300/3) – Only available for a few races, surround city with impassable cliff face with some choke point to move through. Units inside city area also get Missile Immunity.

NEW! **Warlord's Hold** (cost 400/5) – Only available for raider races, double strength of unrest reduction through garrison and reduces cost of unit recruitment by 25%.

Oracle (cost 360/2)

Advanced Buildings:

Sage's Guild (400/2). Requires University. Grants access to most advanced economy buildings: Linking Towers, Amplifying Tower, Wizard's Guild. All 3 are now linked to 'Tree of Knowledge'

Amplifying Tower (900/7) **Wizard's Guild** (800/3) **Linking Towers** (500/4) all require Sage's Guild and Tree of Knowledge and intended to be part of late game. You will no longer see high caster units dominating the early game.

- Note: Wizard's Guild now grants 12 power and 2 research.

Maritime Guild (cost 450/3) and requires Tree of Knowledge. However, warships are far superior in this mod.

Armorer's Guild (cost 600/4) and Fantastic Stables (cost 750/4) with a significantly less accessible 'Tree of Knowledge' delays their usage by a couple of years relative to unmodded Caster of Magic.

NEW! **Hangar** (cost 400/3) is a requirement for flying mechanical units.

The units recruited from these buildings typically cost 240-300, require 2 Food, and are far more advanced than their Caster of Magic counterparts. These units are not part of the Caster of Magic design of being disposable and inferior to summons and spammed all over the world to the point of clutter. These units, many of which benefit immensely from buffs, can compete against uncommon and rare tier summons and in groups assisted by spells be capable of defeating top tier summons.

Building Tree:

Ships: Sawmill → (Shipyard + Fighter's) → Maritime

Wood Production: Sawmill → Forester's Guild

Production: (Miner's Guild + University) → (Mechanician's Guild + Wall) → Fortification

Food: (Granary + marketplace) → Farmer's Market

(Granary + Forester's) → Animist Guild

Research: Library + Builder's Hall → (University + Alchemist Guild) → Sage's Guild

Magic: Marketplace → Magic Market + Sage's Guild → Wizard's Guild

Combat Skill: (Monument + Sage's Guild) → Linking Tower

Overland skill: Sage's Guild → Amplifying Tower

Gold: (Marketplace + University) → (Bank + shipyard) → Merchant's Guild

Military: Armory → Fighter's Guild → Coliseum/War College/Armorer's Guild/Fantastic Stables

Armory → Barracks → War College (with Fighter's Guild)

Fighter's Guild + Barracks grant Colosseum, also grants War College (with Fighter's Guild)

Religion: (Shrine + Town Hall) → Oracle and Monastery. Monastery → Cathedral/Temple

(Shrine + Magic Market) → Witches' Convent.

Note that Tree of Knowledge unlocks Amplifying Tower, Linking towers, Wizard's Guild, Armorer's Guild, Fantastic Stable, and Maritime Guild

Stock Unit Base Stats

	Figure	Attack	Range/ammo	Armor	Resist	HP	Move	Abilities or Notes	Cost
Spearmen	8 (+2)	2		2 (+1)	3	1	2	Negate FS	15/0 (+5)

Spearmen used mainly for unrest reduction at a minimum cost, but the high figure count allows buff strategies against non-ranged units and cheap early game stacks. The original spearmen's role was too limited to be of use, filling a mostly useless slot (given that swordsmen are more durable for sacrificial units when engaging in wars of attrition via spells). Delayed access to barracks keep these from getting too useful.

Swordsmen (smithy), **Bowmen** (sawill + smithy), and **Cavalry** (stables + smithy) are the stock low-tier units. Swordsmen have decent melee, high armor vs ranged and spells, and perform well if aided by experience boosters and unit enchantments. Bowmen are your traditional ranged units, the extra 5% to hit helps them be more accurate at mid-range. Cavalry (unchanged from caster of magic) are your fast, tactical unit, but highly vulnerable to multi-figure attacks. Delayed access to barracks keep these enhanced bottom-tier units balanced.

Halberdiers (armory) are superior to swordsmen, particularly when facing other melee units. They are designed to be more like their Master of Magic armory units in terms of cost and effectiveness, thus they lose 1 resistance, 1 racial special attack, and 10 cost.

Crossbowmen (fighter's guild + library) are the next bowmen tier, have fewer figures, but attack with armor piercing shots and protect themselves with large shield. They are however vulnerable to melee.

Shieldbearers (fighter's guild) are the next swordsmen tier. These have mediocre melee damage output for the cost (same as halberdier), but come with higher movement and very high armor, particularly against ranged and magical attacks thanks to their large shield perk.

Heavy Cavalry (fighter's guild + stables) are the next cavalry tier, with higher stats across the board but 1 less movement. First strike can be highly effective with 7 base attack, and the armor deficiency of Cavalry is lessened with 4 base armor rating, making this a well-rounded tactical unit.

Shamans (shrine) and **Monks** (monastery) only differ by their movement rating. **Priests** (cathedral) now carry 2 healing charges and 1 resist to all making them a very impactful support unit, but have poor damage potential, high upkeep cost, and require Temple, a pretty advanced building. These units do not count as trespassers when you have a wizard's pact.

Disciples (sage's guild) are low-tier mages. **Magisters** (wizard's guild + armory) are mages that have large shield instead of missile immunity, to simulate magic resistance. Along with 2 extra shots, this is generally an improvement, thus are balanced out by having 1 fewer movement point.

Mechanician's Guild is much harder to build, thus stock units from it are superior. **Catapults** are now more damaging, durable, and carry more ammo. **Ballista** is an alternative mechanical unit that loses wall crushing, vulnerable to missile immunity in favor of armor piercing shots. These units give economy-oriented races viable defenses

Triremes (dock) and **Galleys** (shipyard + armory) are unchanged but gold upkeeps are returning to ships **Fire Galley** (shipyard + mechanician guild) are a more melee-oriented, faster ship that can attack flyers. **Warships** come with higher stats and a much higher cost and upkeep with fewer races being able to build these and tree of knowledge now needed to unlock Maritime's Guild.

Engineers (university + town hall) can now move, cast 'sapping wall' and buff mechanical units by +20% To-Hit and +10% To-Defend, giving them tactical use in battle. Their cost and building requirements have been increased due to them building roads 50% faster than unmodded engineers.

Pioneers (town hall + fighter's guild) are inferior engineers for some races that do not specialize on road building, build 33% as fast as a modded engineer (and 50% as fast as unmodded engineers). These may be subject to change as effect on elves and halflings are being reviewed.

Armorer Guild and **Fantastic Stable** unit – typically cost 240-300 5-6 gold upkeep 2 food upkeep. These top-tier units are not part of the Caster of Magic design of being disposable and inferior to summons. These units, many of which benefit immensely from buffs, can compete against uncommon and rare tier summons and in groups assisted by spells be capable of defeating top tier summons.

Racial Unrest Table:

Homerace	Barbarian	Gnoll	Halfling	HighElf	HighMen	Klackon	Lizardmen	Nomad	Orc	Beastmen	DarkElf	Draconian	Dwarven	Troll	XuanYuan	Hawkmen	Rakhshasa	Goblin
Barbarian			2	2	3		1	2		2	2			1				3
Gnoll			2	3	3		2	2	2	2	2			2				3
Halfling				1	1													1
High Elf	2	2		1	3	2		2				2		1		2		3

Goblin	3	3	1	3	4	3	3	3	3	3	3	3	3	3	3	3	3	2

It's important to note that your leader's race now depends on your choice at the beginning of the game and is not affected by the location of your fortress

Race Summary / Units:

Intro: Brief race descriptions and general strategies have been included in the manual to ease the player into trying out each race. Unit stats were kept hidden in the manual for conciseness and also to preserve the excitement of discovery when noticing new units.

Note that some normal units will come with **spell charges**, some of which cannot be countered.

Barbarian:

Military-Oriented Gameplay

Characteristics: 90 growth, +30 outpost growth, Cheap settlers,

Special Building: Altar of Storm (required shore)

Building Limitations: Alchemist's Guild, (+Sage's Guild, +Wizard's Guild, +Amplifying Tower, +Linking Towers), Monastery, (+Cathedral/Temple), Bank, (+Merchant's Guild), Armorer's Guild, Fantastic Stables, Mechanician's Guild (+Fortification, +Hanger)

Barbarian design is to overwhelm opponents early on with mobile overland units (pathfinding) that deal very high-damage due to having an innate +10% to hit and extra thrown secondary attacks. The high outpost and city growth and cheap settlers ensure you have numerous sufficiently developed military centers producing strong mid-tier units (Barbarians lack a top tier unit). If military superiority on land is not enough, barbarians also rule the seas via a unique naval ship.

Note: barbarians no longer have a resistance penalty.

They have access to the majority of unrest-reduction and production buildings to ensure population remains loyal and productive to your cause. However, Barbarians have severe limitations to strictly gold and power sources, thus players must engage in conquest to stay competitive. The current design addresses some of the issues that made race inferior in Master of Magic. However, a different balancing method was applied to restore the race's themes and challenges the notion that a race must have access to several advanced buildings, even wizard's guild, to stay competitive.

Normal Units: +10% To-Hit, Pathfinder, +Thrown (up to 4 per figure)

Spearmen, Swordsmen, Bowmen, Cavalry, Shamans, Heavy Cavalry.

Generic Mechanical Units: +10% To-Hit, Pathfinder

Trireme, Galley, Warship

race	unit	cost	Figures	Melee	throw/breath	Range	Ammo	Armor	Resist	Health	to hit	Move	Poison	ToDefend
Barbarian	Spearmen	15	8	2	1			2	3	1	0.4	2		0.3
Barbarian	Bowmen	30	6	1		3	8	2	4	1	0.45	2		0.3
barbarian	Swordsmen	30	6	4	2			4	4	1	0.4	2		0.3
Barbarian	Cavalry	40	4	5	3			2	4	3	0.4	5		0.3
Barbarian	Shamans	50	4	2		3	4	3	6	1	0.4	3		0.3
Barbarian	Berserkers	90	6	7	3			4	4	3	0.4	3		0.3
Barbarian	Heavy Cavalry	100	4	7	4			4	6	4	0.4	4		0.3
Barbarian	Spellserkers	120	4	3	5			4	6	4	0.4	3		0.3
Barbarian	Longship	140	2	16	4	8	4	5	7	15	0.4	5		0.3
Barbarian	Gladiators	175	4	6	4			6	7	7	0.5	3		0.3

Special Units:

Berserkers (Fighter's Guild, Cost 90) More durable than in Caster of Magic. These continue being high damage dealers and vulnerable to curses and ranged attacks.

Spellserkers (Fighter's Guild and Animist Guild, Cost 120): Now requiring only Fighter's Guild and Animist Guild, these sturdy melee mage units are also the most easily accessible Caster 20 unit in the game.

Gladiators (Coliseum, Cost 175): These are the most durable units Barbarians can offer. They operate in a similar fashion to stock unit shieldbearer with more advanced stats and hp.

Longship (fighter's guild + ship yard, Cost 140): Far superior to galley with reasonable building requisites and cost. The only ship that comes with more than 1 figure and specializes in speed and melee (ranged attacks are present with only 4 ammo). If Mariner Mastery is present, this ship can reach enemies in 1 turn. If enchanted with flying, Longship turns into a general purpose upper-tier unit.

Gnoll:**Military-Oriented Gameplay****Characteristics:** 60 growth, avg outpost growth, +2 attack, +1 move**Special Building:** Altar of the Moon (required swamp)**Building Limitations:** Monastery (+Cathedral/Temple), Maritime Guild, Armorer's Guild, Fantastic Stables, University, +Bank, +Merchant's Guild, +Sage's Guild, Mechanician's Guild, (+Hanger, +Fortification), (+Wizard's Guild, +Amplifying Tower, +Linking Towers)

Gnoll is designed to be an early rush aggressive race, even more so than Barbarians. This means terrible economic potential on their own, but outstanding and mobile military units ideal for early war. A unique theme of Gnolls is how some units appear to be a tier above what the unlocking building would otherwise provide. Players starting with Gnolls cannot excel without early conquest.

Unlike Barbarians, Gnolls cannot build beyond the starter buildings and have merely average growth potential (towns, outposts, settler production). Their armies, if unsuccessful at conquest early, will not be able to keep up against more advanced, productive civilizations. Units are also unable to hit flying units effectively. Because of these limitations, it did not seem fair to punish Gnolls with a poor armorer's guild unit, thus Jackal Riders improved and moved to require War College instead (which can be rushed without Tree of Knowledge). Additionally, as an early rush race, the magic market limitation was too harsh, thus had to be reevaluated. The race is balanced by adding advanced building limitations instead.

Normal Units: +2 Melee, +1 Movement

Spearmen, Swordsmen, Halberdiers

Generic Mechanical Units: +2 Melee, +1 Movement

Tireme, Galley

race	unit	cost	Figures	Melee	throw/breath	Range	Ammo	Armor	Resist	Health	to hit	Move	Poison	ToDefend
Gnoll	Spearmen	15	8	4				2	3	1	0.3	3		0.3
Gnoll	Swordsmen	30	6	6				4	4	1	0.3	3		0.3
Gnoll	Hunters	40	6	3	1	3	8	3	4	1	0.35	3		0.3
Gnoll	Halberdiers	50	6	7				4	4	2	0.3	3		0.3
Gnoll	Wolf Riders	80	4	7				3	5	5	0.3	5		0.3
Gnoll	Witch doctors	90	4	4		3	4	2	6	2	0.3	3	2	0.3
Gnoll	Marauders	120	6	8				4	6	3	0.3	3		0.3
Gnoll	Jackal Riders	190	8	7				4	7	4	0.3	4		0.3

Special Units:

Hunters (Replaces Bowmen, cost 40): Initially underwhelming, but with 3 modes of attack (melee, thrown, range), ability to install trap, and a small 5% to hit bonus, it becomes formidable with experience, special magic weapons, and attack buffs like 'fiery fury'

Wolf Riders (Stables, cost 70): Stables granting you access to a tier-2 like unit. Besides 5 move, it comes with pathfinder to hunt for easy victims and be assisted by other mobile units and summons (e.g. hell hounds). 80 cost was evaluated as being too high for a rush race, thus reduced to 70.

Witch Doctors (shrine, magic market, cost 90): Shaman with mid-tier unit properties, such as high ranged poison damage, double hp, and 2 charges of weakness spell. This is a viable unit for players who prefer to develop the town economically first (see building requisites) and this unit's fullest potential is early in the game when 'weakness' and poison work best.

Marauder (fighter's guild, cost 120): Updated beyond a first-strike shieldbearer with extraordinary stats. With high base damage, they can defeat a unit without taking damage. Outside of melee, they are hard to defeat with 18 base hp and large shield, making them effective garrison units.

Jackal Riders (war college, cost 190): Mobile melee unit with 'cause fear' and top-tier qualities without the need of Tree of Knowledge and thanks to being unlocked by War College, comes with additional stats. It does come with several vulnerabilities due to its high figure count and low armor (e.g. immolation) as well as mediocre resistance. Nevertheless, this is an outstanding unit for the low cost.

Halflings:

Economy-oriented Gameplay

Characteristics: 60 growth, +40 outpost growth, +1 research per pop, +2 food per pop, low unrest of conquered towns

Special Building: Academy (required mountain/hill/volcano)

Building Limitations: Barracks (+Colosseum, +War College), Monument, (+Linking Towers), Armorer's Guild, Temple, Hanger, Brewery, Hillfort, Warlord's Hold, Witches' Convent

Halfling are an economy race that needs spell support to assist in aggression. They can develop outposts into towns faster than any other race, can build most economy buildings, and their population comes with food and research bonuses, encouraging numerous well-developed gold, research and power centers and summon-oriented gameplay. Note that animist guild can be built and modded accordingly to allow halfling farmers to produce 8 food. Race can now even build roads, albeit slowly, with 'pioneer' unit.

Their troops are however mediocre to poor due to higher recruitment costs of early units combined with lack of access to barracks and war college, requiring use of 'heroism' to be viable. In fact, a swordsman unit with heroism + holy armor + discipline is borderline overpowered this early in the game, an option available to players. All combat units revolve around 1hp per figure and are primarily ranged, making them highly vulnerable to large shield and especially missile immune units.

For the late game, they needed something in terms of units and something not fully dependent on buffs. It was decided a tactical flying unit with fairly low attack power fits the overall theme of the race best. As a balancing factor, a few building restrictions that entirely impact battles (e.g. monument, linking towers) were introduced.

Normal Units: Lucky, higher unit cost, -1 Melee

Pioneers, Spearmen, Swordsmen, Bowmen, Disciples, Shamans, Magisters

Generic Mechanical Units: Lucky, -1 Melee

Trireme, Galley, Fire Galley, Warship, Catapult, Ballista

race	unit	cost	Figures	Melee	throw/breath	Range	Ammo	Armor	Resist	Health	to hit	Move	Poison	ToDefend
Halfling	Spearmen	15	8	1				2	4	1	0.4	2		0.4
Halfling	Bowmen	40	6	1		3	8	2	5	1	0.45	2		0.4
Halfling	Swordsmen	40	8	3				4	5	1	0.4	2		0.4
Halfling	Shamans	75	4	1		3	4	3	7	1	0.4	3		0.4
Halfling	Disciples	75	4	1		4	6	3	6	1	0.4	2		0.4
Halfling	Slingers	80	8	1		4	6	2	6	1	0.4	3		0.4
Halfling	Scouts	90		2				2	6	3	0.4	6		0.4
Halfling	Magisters	150	4	1		7	6	3	9	1	0.4	2		0.4
Halfling	Rocs	280	2	8				7	9	9	0.4	6		0.4

Special Units:

Scouts (stables, cost 90) – clearly not a combat unit, but you have access to a 'stealth' unit for exploration of enemy territory and to keep in nodes near opponent cities.

Slingers (armory, cost 80) – improved somewhat with lower cost and higher mobility, and most importantly becoming again a unit that can be recruited with armory. It remains surprisingly poor outside of life wizard 'heroism + discipline' strategies which fulfill unit's full potential to deal significant range damage while being able to withstand a few attacks.

Rocs (Fantastic Stables, cost 280) – A flying 6 move first strike unit that can dodge arrows (missile immunity) but suffers from lack of barracks and war college, resulting in mediocre stats unless buffed. Its main strength is having the highest movement speed alongside Doom Bats for exploration, sneak attacks, combat stalling strategies, and picking off ranged units.

High Elf:

Economy/Military Mix Gameplay

Characteristics: 30 growth, +20 outpost growth, +1/2 power per pop

Special Building: Tree of Life (required forest)

Building Limitations: Maritime Guild, Temple, Hanger, Brewery, Hillfort, Warlord's Hold, Witches' Convent

High Elves have economic potential due to access to all economy buildings, citizens that provide passive power income, and outposts that develop faster than average. They are now capable of building roads, albeit slowly. Their downside is a very low city population growth rate and with smaller population, gold and production is therefore lower as a result.

Their generic troops are good due to the racial bonuses. Mid tier stock units with these benefits become formidable troops with heavy cavalry's first strike, combined with to hit bonus can result in killing an opponent before they get the chance to strike back. They also have 3 top tier units with very different roles, for you to shift around your strategies based on your opponents or lair targets.

The race design is not much different from Caster of Magic, but Pegasi were reevaluated and made into a proper top-tier unit with high cost and maintenance, not a buff-dependent cavalry + bowmen that flies unit.

Normal Units: +10% To-Hit, Forester, +1 Resistance

Pioneers, Spearmen, Swordsmen, Disciples, Cavalry, Halberdiers, Shieldbearers, Heavy Cavalry.

Generic Mechanical Units: +10% To-Hit, Forester, +1 Resistance

Trireme, Galley, Fire Galley, Catapult, Ballista

race	unit	cost	Figures	Melee	throw/breath	Range	Ammo	Armor	Resist	Health	to hit	Move	Poison	ToDefend
High Elf	Spearmen	15	8	2				2	4	1	0.4	2		0.3
High Elf	Swordsmen	30	6	4				4	5	1	0.4	2		0.3
High Elf	Cavalry	40	4	5				2	5	3	0.4	5		0.3
High Elf	Halberdiers	50	6	5				4	5	2	0.4	2		0.3
High Elf	Longbowmen	50	6	1		4	8	2	5	1	0.4	2		0.3
High Elf	Disciples	60	4	2		4	6	3	6	1	0.4	2		0.3
High Elf	Shieldbearers	90	6	5				5	7	2	0.4	3		0.3
High Elf	Heavy Cavalry	100	4	7				4	7	4	0.4	4		0.3
High Elf	Druids	150	4	1		7	6	3	8	1	0.4	2		0.3
High Elf	Rangers	200	4	6		7	8	3	7	3	0.4	3		0.3
High Elf	Elven Lords	250	4	6				6	10	5	0.5	4		0.3
High Elf	Pegasus Riders	290	4	7		5	8	4	9	5	0.4	5		0.3

Special Units:

Longbowmen (forester's guild, cost 50): significantly boosted, matching the relative power of the original Master of Magic unit by having higher ranged, to hit, and even long range.

Druids (wizard's guild, cost 150): Magicians with priest-like properties that can also cast 'resist elements'. Their racial bonus helps them deal high damage.

Rangers (armorer's guild, cost 200) : The most damaging bow-and-arrow unit in Arcanus, moved from Nomads and given High Elf's excellent racial bonuses. The unit also has pathfinder, helpful to increase mobility of Elven Lords, and stealth. The problem with this unit is how 'animate ammo', 'wall of darkness' or other counters can render it useless.

Elven Lords (armorer's guild, cost 250): Damage and durability boosts, but with a significant cost increase. This unit specializes in sheer melee force with first strike armor piercing and is a great candidate for buff spells.

Pegasus Riders (fantastic stables, cost 280): Higher stats across the board, particularly in regards to melee, but at more than double the cost. This is a tactical unit that works best when Pegasus Riders can use all available ammo. Pegasus Riders are however vulnerable to missile counters like 'animate ammo' and their melee capabilities are comparable to a mid-tier unit.

High Men:

Tilted Towards Economy Gameplay

Characteristics: 60 growth, +10 outpost growth, Buildings cost 20% less, +1 rebel,

Special Building: Sancta Basilica (required desert)

Building Limitations: Fantastic Stable, Temple, Hanger, Brewery, Hillfort, Warlord's Hold, Witches' Convent

High men have average to strong economic potential due to access to all economy buildings and citizens that can construct buildings at a 20% lower cost (including military buildings). Their downside is having an unrest citizen for every city in addition to unrest modifiers.

This race had some controversial design choices. For starters, a -2 resistance penalty is far too severe to be fun. The crusader unit in Caster of Magic was absurdly overpowered in the hands of a smart player to the point of causing tedium. By reducing the resistance penalty, adjusting mid-tier units, and adding a more pure-might but lower cost top unit, the race feels more three dimensional, varied, and ultimately fun. The race still specializes quite well against defeating lairs and nodes with powerful high-figure units. The +2 figures theme has also been expanded to more units, mainly support-type units.

Normal Units: +2 Figures to some stock units, -1 Resistance

Spearman, Swordsmen, Bowmen, Engineer, Cavalry, Monks, Crossbowmen, Disciples, Magisters

Their troops start out weak with no bonuses other than a resistance penalty. However, the later stock units come with +2 figures, increasing durability and damage output. High Men also offer a great variety of units, thus can adapt to different battle needs.

Generic Mechanical Units: -15% Cost, -1 Resistance

Tremer, Galley, Fire Galley, Warship, Catapult, Ballista

race	unit	cost	Figures	Melee	throw/breath	Range	Ammo	Armor	Resist	Health	to hit	Move	Poison	ToDefend
High Men	Spearman	15	8	2				2	2	1	0.3	2		0.3
High Men	Bowmen	30	6	1		3	8	2	2	1	0.35	2		0.3
High men	Swordsmen	30	6	4				4	3	1	0.3	2		0.3
High Men	Cavalry	40	4	5				2	2	3	0.3	5		0.3
High Men	Monks	50	6	2		3	4	3	4	1	0.3	2		0.3
High Men	Pikemen	60	8	4				4	3	2	0.3	2		0.3
High Men	Disciples	60	6	2		4	6	3	3	1	0.3	2		0.3
High Men	Squires	80	8	6				5	4	2	0.3	2		0.3
High Men	Crossbowmen	90	6	1		5	8	3	3	2	0.35	2		0.3
High Men	Inquisitors	120	4	3		5	4	4	8	2	0.3	2		0.3
High Men	Knights	120	4	8				5	6	4	0.3	5		0.3
High Men	Magisters	120	6	1		7	6	3	6	1	0.3	2		0.3
High Men	Crusaders	170	6	7				6	7	4	0.3	3		0.3
High Men	Paladins	270	4	7				6	12	5	0.3	4		0.3

Special Units:

Pikemen (Armory, 60 cost). These come at a lower cost in this mod, but with weaker defensive stats. These carry the design of spearmen-like units being fragile (especially against ranged) but dealing high damage, in this case 8 armor piercing hits at a base swordsmen attack level. Their high 8-figure count makes it an excellent target for buff spells.

Squires (Fighter's Guild, 80 cost). Replacing Caster of Magic's overpowered 60 cost "Crusaders" with a more damaging unit, with more armor but less resistance, and without healing spell at 80 cost. These still have large shield, making them robust units against ranged attacks. Their high 8-figure count makes it an excellent target for buff spells.

Knights (Fighter's Guild + Stable, 120 cost). Now follows the 'heavy cavalry template', but with boosts to mobility, damage, and durability (large shield) benefits to being a racial unique. This is a very solid unit for general use.

Inquisitors (Cathedral, 120 cost). Priest-like unit with a weak version of exorcise ability for melee and ranged attacks, allowing it to banish lower resistance fantastic units if they fail a resistance check. This ability has a stronger effect against raise undead units.

Crusaders (Armorer's Guild + Monastery, 170 cost). Crusaders have been redesigned as a top tier unit and with different visuals. These are now 6 figure large shield troops with higher movement (3), good upper-tier melee and durability stats, and can cast 'holy armor' on self or others.

Paladins (Armorer's Guild + Cathedral, 270 cost). Top Tier support unit (Holy Bonus) with decent but unspectacular melee capabilities. Paladins can now cast bless spell (twice) and come with much higher resistance, making them nearly immune to all curse-like attacks and spells and restoring some of the enjoyment from the original where the paladin just couldn't be cursed. They also are immune to illusions.

Klackons:**Economy/Military Mix Gameplay**

Characteristics: 110 growth, +20 outpost growth, +1 hammer per citizen, -4 rebels (if starter race), + rebels (if not), bad race relations

Special Building: Undercity Hive Network

Building Limitations: Fantastic Stable, Coliseum, Monastery, (+Cathedral/temple), Merchant's Guild, Hanger, Brewery, Hillfort, Warlord's Hold, Witches' Convent

Klackons enjoy the fastest city growth in the game. When combined with extra worker productivity and far lower unrest (if starter race), they are able to surpass other races in getting cities fully developed, and earn excessive amount of gold via taxes. Playing with retort 'alchemist' and converting gold to mana is a very powerful strategy.

The high production also can lead to producing a large number of military units, helpful when units (especially later) are unimpressive on a power to cost ratio. Your military is defined as 'quantity over quality' and with quantity comes accumulating upkeep costs.

It is preferable to rush settlers and cover as much land as possible with klackon cities to enjoy their low unrest, and thus build your economy. You may raze enemy cities to allow room for additional klackon cities overrunning each continent.

One problem with this concept in Caster of Magic is the sheer lack of unit diversity: pretty much just halberdiers and stag beetles and they are rather boring units themselves. When the obvious strategy is to maximize the number of klackon cities, it gets repetitive. There is more diversity in this mod, covering one of the main weaknesses of the race in Caster of Magic and making it far more satisfying to play.

Normal Units: +2 Armor

Spearmen, Swordsmen, Engineer

Generic Mechanical Units: +2 Armor

Trireme, Galley, Fire Galley, Catapult, Ballista

race	unit	cost	Figures	Melee	throw/breath	Range	Ammo	Armor	Resist	Health	to hit	Move	Poison	ToDefend
Klackon	Spearmen	15	8	2				4	3	1	0.3	2		0.3
Klackon	Swordsmen	30	6	4				6	4	1	0.3	2		0.3
Klackon	Stingers	70	6	5				6	4	2	0.3	2	1	0.3
Klackon	Mantises	100	6	5				7	6	2	0.3	3		0.3
klackon	Antlions	120	4	6				7	6	4	0.3	2		0.3
klackon	Maiden Queen	240	5	5				7	9	2	0.3	3		0.3
Klackon	Stag Beetle	240	1	17	8			6	8	22	0.3	4		0.4

Special Units:

Stingers (Armory, Cost 70): a halberdier unit with an added poison 1 attack per figure (6 poison).

Mantis (Fighter's Guild, Cost 100): 6-figure military troops that also has first strike and higher mobility. However, with 5 base melee, the first strike is not overly impactful, but is yet another element that adds to the high durability (e.g. 7 base armor) of this unit. The seemingly mediocre unit has been proven to win the game on lower difficulties with warlord retort and unit buff strategies.

Antlion (Stables, Animist Guild, cost 120): A teleporting heavy cavalry type unit (lacking first strike) with lower melee but 'merging' (teleporting) ability. This ability is restrained by a very low 2 movement, making it impossible to use hit and run tactics. This is among the less cost-effective mid-tier units in the game, but a player has opportunities to exploit the rare 'merging' ability (the only teleporting normal unit) with mobility spells, allowing hit & run tactics.

Stag Beetle (Stables, Armorer's Guild, cost 240). As Caster of Magic described it, a true avatar of mediocrity. It has been enhanced in this mod but with a 50% cost increase and a much more significant upkeep increase (the upkeep cost of 1 in Caster of Magic was baffling and made race snowball in gold income). Base armor was reduced to 6 but base to defend increased to 40%, thus has the potential to be very hardy with adamantium, experience and holy bonus.

With Klackon's high production output, it is easy to generate a full stack of 8+ fairly easily and cover replacements as needed. This is also Klackon's answer to flying units, being able to hit flyers.

Maiden Queen (Wizard's Guild, Animist Guild, cost 240). Later in the game, the mantis units (or Stag Beetle's resistance) need a boost. This is a special support unit that grants +1 to all stats, heals, and also has caster skill 20. It is also relatively hard to kill, engages in melee, and even flies. Wizard's Guild is a hard to access building, thus these will not come into play until the second half of your game.

Lizardmen:

Economy/Military Mix Gameplay

Characteristics: 70 growth, +30 outpost growth, NEW +1/4 max pop per tundra, cheaper, faster swimming settlers (note, no longer with fewer rebel bonus)

Special Building: Baray (required river)

Building Limitations: Fantastic Stables, Ship Yard, (+Maritime Guild, +Merchant's Guild), Miner's Guild (+Mechanician Guild, +Fortification, +Hanger), Cathedral, Brewery, Hillfort, Warlord's Hold, Witches' Convent

Lizardmen excel at early expansionism: marking your territory outside your main continents via fast, swimming settlers. As an incentive to player, settlers are cheaper, more faster, swim, and their outposts grow much faster than average. Early military is oriented towards expansionist playstyles thanks to favorable military logistics and high hp units.

Race has limitations to gold and especially production buildings, slowing down construction and unit-recruitment on an individual city basis. However, allowed enough time, Lizardmen cities are rather comprehensive in economic bonuses and late military units excel at city defense.

More unit types were added, including a cavalry unit and a mage-like unit., and the design of an Armorer's Guild unit costing only 100 (And acting like one) was challenged.

Normal Units: +1 Health, -1 Resistance, Swimming

Spearmen, Swordsmen, Bowmen, Shaman, Shieldbearer, Priests

Generic Mechanical Units: +1 Health, -1 Resistance

Trireme

race	unit	cost	Figures	Melee	throw/breath	Range	Ammo	Armor	Resist	Health	to hit	Move	Poison	ToDefend
Lizardman	Spearmen	15	8	2				2	2	2	0.3	2		0.3
Lizardman	Bowmen	30	6	1		3	8	2	3	2	0.35	2		0.3
Lizardman	Swordsmen	30	6	4				4	3	2	0.3	2		0.3
Lizardman	Reptile Riders	45	4	5				3	4	4	0.3	4		0.3
Lizardman	Shamans	60	4	2		3	4	3	6	2	0.3	3		0.3
Lizardman	Marines	65	6	5				4	4	3	0.3	2		0.3
Lizardman	Shieldbearers	90	6	5				5	5	3	0.3	3		0.3
Lizardman	Javelineers	100	6	5	4	4	6	3	5	2	0.3	3		0.3
Lizardman	Priests	120	4	3		4	4	4	7	3	0.3	2		0.3
Lizardman	Sea Hags	120	3	5				4	6	4	0.3	3	2	0.3
Lizardman	Dragon Turtle	240	1	13	8			9	12	24	0.3	3		0.4

Special Units:

Carrack (forester's guild and requires coast, cost 80) – Lizardmen's boat, helps with logistics.

Reptile Riders (stable + armory, cost 45) – a cavalry unit with lizardmen's hp racial bonus, and sacrificing a bit of speed for armor. They are the only lizardman unit that cannot swim.

Mariners (armory, cost 65) – halberdiers with first strike. However, when fighting in the ocean, mariners gain extra mobility and fire immunity (from submerging)

Javalieneers (fighter's guild, cost 100) – now comes with higher movement and thrown ability. The race's buff - friendly unit in terms of damage output, but fairly fragile for the cost and mediocre if no buffs are applied to unit.

Sea Hags (wizard's guild and requires coast, cost 120) – a mage-like unit with low caster points but 1 spell charge of confusion. Their attacks is poison-based melee, a downgrade from a magister's ranged magic attacks but appropriate for a race that does not specialize in magic.

Dragon Turtle (Armorer's Guild + stables, cost 240) was allowed to be a top-tier unit with proper movement, cost and maintenance while keeping the feeling of being a tanky unit. Keep in mind Tree of Knowledge which unlocks Armorer's Guild comes a bit later, thus unit needs to be able to do something besides taking hits and stalling for time. With 40% to defend and the right tools, your dragon turtle can become a borderline unkillable unit with some potential of reaching targets and damaging them.

Nomad:**Economy/Military Mix Gameplay**

Characteristics: 70 growth, cheap settlers, road-like gold bonuses (without roads), NEW population cap trading bonus removed, NEW +1/2 max pop per desert, NEW +1 Food per desert/tundra tile and +2 food per grassland tile.

Special Building: Caravanserai (required desert)

Building Limitations: Granary, (+Farmer's Market, Animist's Guild), Fortification, Hanger, Brewery, Hillfort, Warlord's Hold, Witches' Convent

Nomads suffer heavily from lack of food buildings, requiring a larger number of farmers to maintain army, growing slower than 70 base growth implies (which is 10 less than in Caster of Magic), and reaching population caps, an incentive for players to pick low-production territories or even disregard some locations altogether. One added benefit to race is removal of a population cap trading bonus, which synergizes well with the original road-independent trade bonus. Your typical nomad town will have 50% gold bonus as a minimum which is a significant boost to your economy. While Nomads do not need roads for economy, their race can now hire road-builder units, though these build very slowly.

Nomad units are highly resistant to curses and poison, and their typical combination of melee, thrown, and arrows make them great targets for damage-oriented buffs and the effects of experience points. Chaos goes well with this strategy with spells like fiery fury or blazing march, and if combined with life spells, units become near-unstoppable when not facing missile immunities.

Normal Units: +3 Resistance, weak bow Attack with 4 Ammo
pioneers, spearmen, swordsmen, discipline, priests, magisters, shieldbearers

Generic Mechanical Units: +3 Resistance, +2 Ammo, +1 Overland Movement (Catapult & Ballista only)
Trireme, Galley, Fire Galley, Warship, Catapult, Ballista

race	unit	cost	Figures	Melee	throw/breath	Range	Ammo	Armor	Resist	Health	to hit	Move	Poison	ToDefend
Nomad	Spearmen	15	8	2		1	4	2	6	1	0.3	2		0.3
Nomad	Swordsmen	30	6	4		2	4	4	7	1	0.3	2		0.3
Nomad	Derishes	100	4	2	1	4	4	3	8	3	0.3	5		0.3
Nomad	Horsebowmen	50	4	2	1	4	6	2	7	3	0.3	5		0.3
Nomad	Disciples	60	4	2		3	6	3	8	1	0.3	2		0.3
Nomad	Kardakes	80	6	4		2	4	4	7	2	0.3	2		0.3
Nomad	Shieldbearers	90	6	5		3	4	5	9	2	0.3	3		0.3
Nomad	Priests	100	4	3		5	4	4	12	2	0.3	2		0.3
Nomad	Magisters	120	4	1		7	6	3	11	1	0.3	2		0.3
Nomad	Sipahis	120	4	5	3	5	4	5	8	4	0.3	4		0.3
Nomad	Cataphracts	250	4	7	4	6	4	7	10	5	0.3	4		0.3
Nomad	Griffin Riders	260	2	9				6	9	12	0.4	4		0.3

Special Units:

Horsebowmen (stables + sawmill, cost 50) – redesigned to be essentially what it says it is: bowmen on a horse, not a melee unit with bows, thus melee reduced in favor of more ammo

Kardakes (armory, cost 80) – their pikemen were given 4 bow attacks (please note armor piercing carries to all attack types). This is among the most advanced units coming out of armory and kept as is by design as a special racial unit.

Dervishes (stable + monastery, cost 100) – mounted monks unit that serves role as explorer unit and mobile clergy support for nomad. This unit trade magic ranged attack for high mobility of light cavalry with pathfinding, and arrow physical ranged attack.

Sipahis (stables + fighter's guild, cost 120) – With all 3 damage types and enjoying dependable traits like high resistance, mobility and durability, this strong racial unique is a good target for buffs.

Cataphracts (stables + armorer's guild, cost 250) – across-the board improvement over sipahis and similar in design as a mobile, durable unit with 3 attack types. A very good target for buffs, which tend to be a better investment on high-cost units.

Griffin Riders (fantastic stables, cost 260) – similar in design (flying first strike unit), just with more armor, hp, and to-hit at a higher cost. Its weakness is the average resistance score – an anomaly for the race – but having an option for a flying melee unit for this race should come with a drawback.

Orcs:

Economy-oriented gameplay

Characteristics: 90 growth, -10 outpost growth

Special Building: Ludus Agoge (required desert)

Building Limitations: Cathedral, Hanger, Brewery, Hillfort, Warlord's Hold, Witches' Convent

The Caster of Magic design of Orcs remains in place. This is an economy-oriented race with cities growing rapidly and access to all buildings, ultimately making orc population extremely productive while paying high taxes. Additionally, all Orc units have lowered maintenance costs, so if you produce large armies for defense, for lowering unrest, and for offense, you will save a significant amount of gold per turn. One could argue Orcs is the top (or at least top 3) races in regards to gold income. Given that gold is expected to be plentiful, picking 'alchemist' retort can convert that into significant mana income and as an added bonus help your generic early troops cause more damage in battle with magic weapons.

This is a solid beginner race, allowing access to most stock units without any racial modifiers, a couple of top-tier units that are fairly easy to use, and practice with the empire building elements of the game.

Normal Units: lower gold upkeep

spearmen, swordsmen, bowmen, engineer, cavalry, disciples, shamans, shieldbearers, crossbowmen, heavy cavalry.

Generic Mechanical Units: (no bonus nor penalty)

Trireme, Galley, Fire Galley, Warship, Catapult, Ballista

race	unit	cost	Figures	Melee	throw/breath	Range	Ammo	Armor	Resist	Health	to hit	Move	Poison	ToDefend
Orc	Spearmen	15	8	2				2	3	1	0.3	2		0.3
Orc	Bowmen	30	6	1		3	8	2	4	1	0.35	2		0.3
Orc	Swordsmen	30	6	4				4	4	1	0.3	2		0.3
Orc	Cavalry	40	4	5				2	4	3	0.3	5		0.3
Orc	Shamans	50	4	2		3	4	3	6	1	0.3	3		0.3
Orc	Disciples	60	4	2		4	6	3	5	1	0.3	2		0.3
Orc	Hoplites	70	6	6				4	4	2	0.3	2		0.3
Orc	Shieldbearers	90	6	5				5	6	2	0.3	3		0.3
Orc	Crossbowmen	90	4	1		5	8	3	5	2	0.35	2		0.3
Orc	Heavy Cavalry	100	4	7				4	6	4	0.3	4		0.3
Orc	Magisters	120	4	1		7	6	3	8	1	0.3	2		0.3
Orc	Legionary	240	9	7	1			5	7	3	0.3	2		0.3
Orc	Wyvern Riders	290	2	7				5	9	14	0.5	5	7	0.3

Special Units:

Hoplites (armory, cost 70) – a stronger than average armory unit, coming with a higher cost. This combines elements of halberdiers and swordsmen to make a formidable 2-move melee unit. One weakness is the low resistance but given the unspectacular nature of orc military units, hoplites look pretty good by comparison.

Legionaries (Armorer's Guild + Barracks, cost 240) – Caster of Magic horde was incompatible with Orc's advanced technology and were redesigned to follow the roman theme started with hoplites, and now made into a proper armorer's guild unit with high damage and defensive stats. Its signature characteristic is a rare 9-figure count, therefore an excellent target for unit buff spells. The unit also has a few support abilities such as 'healer'. It is a requirement to at least have veteran level experience and/or mithril weapons to make these competitive against other top-tier units.

Wyvern Riders (fantastic stables, cost 280) – Wyverns come at near doubled the cost, but are given a total of 28hp, rare for a flying mobile unit, +20% to hit to increase potential of damage outside of poison, and very high poison damage (14 with both figures). For best poison results, pick off low resistance units with this mobile flyer or find ways to lower their resistance.

Beastmen:**Tilted towards economy gameplay****Characteristics:** 70 growth, -5 outpost growth, +1/2 power per citizen**Special Building:** Idol of Heavenly Bull (required desert)**Building Limitations:** Maritime Guild, Cathedral, Hanger, Brewery, Hillfort, Warlord's Hold, Witches' Convent

Beastmen are the most traditional of the Myrran races. On the economy side of things, you can build nearly everything and even have some passive power income through their population. On the military side, you have a wide variety of stock and racial unique units covering various needs.

Normal Units: +1 Health, +1 Melee

spearmen, swordsmen, bowmen, engineer, monks, disciples, priests, magisters, halberdiers, crossbowmen, shieldbearers

Generic Mechanical Units: +1 Health, +1 Melee

Trireme, Galley, Fire Galley, Catapult, Ballista

race	unit	cost	Figures	Melee	throw/breath	Range	Ammo	Armor	Resist	Health	to hit	Move	Poison	ToDefend
Beastmen	Spearmen	15	8	3				2	3	2	0.3	2		0.3
Beastmen	Bowmen	30	6	2		3	8	2	4	2	0.35	2		0.3
Beastmen	Swordsmen	30	6	5				4	4	2	0.3	2		0.3
Beastmen	Halberdiers	50	6	6				4	4	3	0.3	2		0.3
Beastmen	Monks	50	4	3		3	4	3	6	2	0.3	2		0.3
Beastmen	Disciples	60	4	3		4	6	3	5	2	0.3	2		0.3
Beastmen	Crossbowmen	90	4	2		5	8	3	5	3	0.35	2		0.3
Beastmen	Shieldbearers	90	6	6				5	6	3	0.3	3		0.3
Beastmen	Priests	100	4	4		5	4	4	9	3	0.3	2		0.3
Beastmen	Centaurs	100	4	5		5	6	3	6	4	0.3	5		0.3
Beastmen	Magisters	120	4	2		7	6	3	8	2	0.3	2		0.3
Beastmen	Chironean Guards	260	4	8		7	6	4	8	7	0.3	4		0.3
Beastmen	Minotaurs	270	2	16				4	8	13	0.4	3		0.4
Beastmen	Gugalanna	290	2	9				7	9	11	0.5	4	1	0.3

Special Units:

Centaurs (stables + fighter's guild, cost 100) – Versatile melee + ranged unit with high movement. First strike and other slight boosts were added in the mod to balance the cost increase.

Chironean Guards (armorer's guild, stables, cost 260) – Essentially centaurs with far more impressive stats across the board and nearly double the hp, but mediocre resistance.

Minotaur (armorer's guild, cost 270) – Reduced to hit but increased to defend (which benefits greatly from 'large shield'). Stats adjusted accordingly but overall boosted to follow the mod's vision of top-tier units. This is your option for extreme melee damage and buff potential to be hardy against ranged attacks.

Gugalanna (fantastic stables, cost 290) – Gorgon unit image from Master of Magic is back! This is a flying unit with a -1 modifier stoning gaze (which has its uses against death units or with black prayer) and a high 50% base to hit. Their resistance is higher than the other beastmen top tier units in case you need better protection against curses.

Manticores were moved to Rakhshasa.

Dark Elf

Tilted Towards (late) Military Gameplay

Characteristics: 30 growth, +20 outpost growth, +1 power per citizen

Special Building: Tree of Magic (required forest)

Building Limitations: Maritime Guild, Cathedral, Hanger, Brewery, Hillfort, Warlord's Hold, Witches' Convent

Dark Elves have the original design - being the best race at using magic. This comes in the form of power income bonuses via population and magic-oriented military units having ranged magic attacks, caster skill, magic resistance, or advanced abilities. One downside to this is their fragility relative to other Myrran races and inability to deal high physical damage. However, the top-tier units of Dark Elf, while difficult to obtain and mass-produce, are among the most powerful in the game.

Emphasis on caster units gives synergy to 'astrologer' retort, allowing your stacks of caster units to avoid having their spells countered by nodes.

The slow population growth dilutes the powerful magic income feature and also negatively impacts gold and production output. However, the race can now hire units to build roads, albeit slowly, boosting gold economy.

The most significant changes to this race were additions to mounted mages (magic knight), eliminating the overpowered library-required apprentices, and added emphasis on late-game military domination with abnormally powerful units with high cost and building requisites.

Normal Units: Ranged magic attack, +2 Resistance, +1 Scouting range

Pioneers, Spearmen, swordsmen, cavalry, halberdier, shaman, priests

Generic Mechanical Units: Ranged magic attack, +2 Resistance

Trireme, Galley, Fire Galley, Catapult, Ballista

race	unit	cost	Figures	Melee	throw/breath	Range	Ammo	Armor	Resist	Health	to hit	Move	Poison	ToDefend
Dark Elf	Spearmen	15	8	2		1	4	2	5	1	0.3	2		0.3
Dark elf	Swordsmen	30	6	4		2	4	3	6	1	0.3	2		0.3
Dark Elf	Cavalry	40	4	5		3	4	2	6	3	0.3	5		0.3
Dark Elf	Halberdiers	50	6	5		2	4	4	6	2	0.3	2		0.3
Dark Elf	Shamans	50	4	2		5	4	3	8	1	0.3	3		0.3
Dark Elf	Adepts	90	6	2		7	4	4	7	1	0.3	2		0.3
Dark Elf	Priests	120	4	3		7	4	4	11	2	0.3	2		0.3
Dark Elf	Magic Knight	120	4	5		6	4	4	9	4	0.3	4		0.3
Dark Elf	Warlocks	180	4	1		9	4	4	9	1	0.3	3		0.3
Dark Elf	Nightblades	270	6	6				4	8	4	0.3	3	2	0.3
Dark Elf	Nightmares	340	2	6		6	6	5	12	9	0.4	4		0.3

Special Units:

Adepts (Sage's Guild, cost 90) – Replaces disciples and acts mainly as a magister with caster 20 that costs less and is more accessible.

Magic Knight (Fighter's Guild + Stables, cost 120) – The offensive stats may be mediocre for the cost (5 attack, 5 range w/ 4 ammo, caster 12), not much better than the cost 40 apprentices it replaces and less damaging than an experienced halberdier. It is still considered among the best mid-tier units of the Warlord mod and will likely be a staple unit for dark elf players.

Warlocks (Wizard's Guild, cost 180) – largely the same, but now a bit less fragile to magic and ranged attacks (large shield)

Nightblades (Armorer's Guild, cost 270) – Unit is able to reliably hurt units unaffected by poison and is surprisingly hardy with the added hp points. They also now have stealth and 3 movement.

Nightmares (Wizard's Guild + Fantastic Stables, cost 340) – A heavily redesigned unit, with weaker but illusionary attacks, higher ammo, ability to cast 'terror', and modest boosts in durability. Its jack-of-all-trades nature comes with weaknesses. For starters, all the bells and whistles pushed it to be the most expensive normal unit in the game and also the unit with the most challenging building requisites. Its flying, mobile traits help keep nightmares from trouble, but spells can easily defeat it. The 'terror' spell can only be cast once per combat, diluting the relative power of an army of nightmares.

Dark Elf Catapult – loss all range attack and gains 4 charges of Fireball instead.

Draconians

Economy/Military Mix Gameplay

Characteristics: 60 growth, -10 outpost growth, flying settlers, +1/2 power per citizen

Special Building: Dragon Mound (required mountain/hill/volcano)

Building Limitations: Fantastic Stables, Temple, Fortification, Brewery, Hillfort, Warlord's Hold, Witches' Convent

The flying race in the game, Draconians can scout the map very fast, help settle territory outside your continent, and are great for strategies that rely on combat-cast spells while the enemy can't engage them. They stay close to the Caster of Magic design, with a few adjustments relative to newly introduced units.

Their units are excellent due to a combination of added stats, flying abilities, and access to an early 'holy bonus' unit. Ranged units can benefit from being harder to reach with bowmen taking a similar role to Caster of Magic's sprite unit when scouting lairs. Melee units are more convenient with flying with shieldbearers being a great unit to mass-recruit due to lack of noticeable weaknesses.

Normal Units: +1 Armor, +1 Resistance, +Fire Breath, Flying, generally +1 Scouting range
Spearmen, Swordsmen, Bowmen, Halberdier, Shieldbearer, Monks, Disciples, Magisters

Generic Mechanical Units: +1 Resistance
Trireme, Galley, Fire Galley, Warship, Catapult, Ballista

race	unit	cost	Figures	Melee	throw/breath	Range	Ammo	Armor	Resist	Health	to hit	Move	Poison	ToDefend
Draconian	Spearmen	15	8	2	1			3	4	1	0.3	2		0.3
Draconian	Bowmen	30	6	1	1	3	4	2	5	1	0.35	2		0.3
Draconian	Swordsmen	30	6	4	2			5	5	1	0.3	2		0.3
Draconian	Halberdiers	50	6	5	2			5	5	2	0.3	2		0.3
Draconian	Monks	50	4	2	1	3	4	4	7	1	0.3	2		0.3
Draconian	Disciples	60	4	2	1	4	6	4	6	1	0.3	2		0.3
Draconian	Shieldbearers	90	6	5	3			6	7	2	0.3	3		0.3
Draconian	Magisters	120	4	1	1	7	6	4	9	1	0.3	2		0.3
Draconian	Saints	140	4	3	1	5	4	6	8	2	0.3	2		0.3
Draconian	Air Ship	200	1	5		15	10	5	8	20	0.3	4		0.3
Draconian	Doom Drakes	280	2	10	7			6	8	13	0.4	5		0.3

Special Units:

Saints (Monastery + Cathedral, cost 140) – Saints have +1 stats to all (holy bonus) instead of just resistance while enjoying other traits of priests such as 2 healing charges and decent armor. While this is designed as a support unit, its ranged attacks are slightly stronger than ones from priests.

Air Ship (Maritime Guild, cost 200) – Air ship now loses wind-walking ability and not able to perform transporting role but fully dedicated its roles as flying gunship/artillery piece instead.

Doom Drakes (Armorer's Guild, cost 280) – Doom drakes have been enhanced with more armor, hp, and +10% to hit and as relatively better units relative to other top-tiers than how they've been in Caster of Magic (they were overpriced and low in damage output).

Dwarves

Economy/Military Mix Gameplay

Characteristics: 20 growth, expensive settlers, +50% gold income, 2X resource bonus, +1 production per worker

Special Building: Lava Smelter (required mountain/hill/volcano)

Building Limitations: Monument +Linking Towers), Stable, (+Fantastic Stable) Magic Market, (+Wizard's Guild) Sage's Guild, (+Wizard's Guild, +Amplifying Tower, +Linking Towers, Hanger) Monument, Merchant's Guild, Hillfort, Warlord's Hold, Witches' Convent

Dwarves are possibly the most overhauled race in Warlord mod. Economically speaking, their building limitations have been shifted around with significant lack of magic-oriented buildings, making 'Alchemist' a retort worth considering when playing race. Their gold and production potential is somewhat improved, if that was even possible.

Military-wise, Dwarves have been improved. When consulted with other players, the general consensus was that Dwarf was Myrran's worst race, having severe military deficiencies and gold building limitations that ironically left them with weaker gold income than Beastmen and a few other races.

Therefore, Dwarves were given a set of mechanical units and troop-like units, mainly associated with top tier buildings and very high magic resistance.

Normal Units: +1 Health, +2 Resistance, Mountaineer
Swordsmen, Crossbowmen

Generic Mechanical Units: +2 Resistance, +3 Armor, Mountaineer, +25% Cost
Tireme, Galley, Fire Galley, Warship, Catapult, Ballista

race	unit	cost	Figures	Melee	throw/breath	Range	Ammo	Armor	Resist	Health	to hit	Move	Poison	ToDefend
Dwarven	Swordsmen	30	6	4				4	6	2	0.3	2		0.3
Dwarven	Arquebusiers	65	6	2	5	3	4	3	5	3	0.3	2		0.3
Dwarven	Hammerhands	90	6	5				4	8	4	0.3	3		0.3
Dwarven	Crossbowmen	90	4	1		6	8	3	7	3	0.35	2		0.3
Dwarven	Combat Engineers	100	4	1		6	8	3	8	2	0.3	2		0.3
Dwarven	Steam Cannon	120	1	0.1		16	10	5	9	12	0.4	1		0.3
Dwarven	Musketeers	160	6	3	9	5	4	5	7	4	0.3	2		0.3
Dwarven	Huskarls	250	6	6				6	10	5	0.3	2		0.3
Dwarven	Golem	280	1	14				7	15	20	0.4	4		0.4
Dwarven	Steam Tank	300	1	1	14	12	8	9	12	14	0.6	2		0.3

Special Units:

Arquebusiers (alchemist guild + armory, cost 65) – very unique troops, Their mobility and defensive stats are quite poor, relying on cause fear and initial attack acting like first strike, but falling prey to ranged attacks. These also come with weak ranged attacks. This is the kind of complex unit that is mediocre or excellent, based on how you utilize it.

Hammerhands (Town hall + fighter's guild, cost 90) – demoted to a mid-tier unit with less melee stats (but flame blade/fiery fury compensates for this weakness). Hammerhands do however move faster and break walls and are far cheaper to produce. They could also work as engineer in building roads too when not as war.

Combat Engineer (University + Town Hall, cost 100) – now with triple the road construction speed and redesigned as a support combat unit that has 1 charge of 'flame blade' spell instead of 'disrupt' that other engineers have – this spell is excellent on low-damage but sturdy hammerhands. Combat Engineers also have a moderately damaging portable mortar ranged attack and can build roads very quickly.

Musketeer (war college + university, cost 160) – carries a similar design to arquebusiers, but with much higher stats. Their mobility and defensive stats (including resistance) are relatively poor and still relying on cause fear and initial attack acting like first strike, but falling prey to ranged attacks. This is a very good target for buff strategies and adamantium minerals and already get recruited with high experience (see building requisite).

Steam Cannon (University, cost 120) – Was considered a very disappointing unit, Steam cannon is given more to hit to allow reasonable damage output. They still are nearly immobile and mainly used for defenses. Unit still becomes useless if cast with 'web'

Huskarls (Armorer's Guild, cost 250) – Instead of top-tier hammerhands, we have a top tier swordsmen-like unit that deals extreme pain thanks to armor piercing. It is also one of the most durable recruitable units in the game, fitting the theme of dwarves.

Golem (Armorer's Guild + Mechanician Guild, cost 275) – It was promoted to a top-tier unit. Golem now has added to hit bonus, higher hp and 40% to defend, and high mobility, acting like a heavy cavalry unit with decent damage output. They come with innate resist elements, which benefits greatly from the added 'to defend'

Steam Tank (Armorer's Guild + Mechanician Guild, cost 300) – The ultimate dwarf unit, a ranged mechanical unit that can also deal fire damage in melee (only when attacking). Its various defensive abilities and immunities combined with extreme resistance points limit enemy options that could defeat the unit. However, with only 14hp, these are destructible with the right spells and units.

Trolls:

Military-Oriented Race

Characteristics: 60 growth, -20 outpost growth, +1/4 max pop per tundra

Special Building: Frost Club Hall (required tundra)

Building limitations: Fantastic Stables, Maritime Guild, Monastery, (+Cathedral/Temple), University, +Bank, +Merchant's Guild, +Sage's Guild, (+Wizard's Guild, +Amplifying Tower, +Linking Towers), Mechanician's Guild, (+Hanger)

Trolls have been redesigned to be a purely military and very primitive race, so several new building limitations have been established. Additionally, troll units have higher production costs and noticeably higher upkeep costs, severely hurting your economy the larger armies you control.

Unlike Barbarians and Gnolls, Troll units remain impressive during the later stages of the game. Their military characteristics are defined by regeneration, high damage, and very high hp ratings and have been enhanced further.

Normal Units: +3 Melee, +1 Resistance, +200-300% Health, fewer Figures, Regeneration 1 or 2, approx +50% Cost, +1 Gold Upkeep
Spearmen, Swordsmen, Shaman, Halberdier, Shieldbearer

Generic Mechanical Units: +3 Melee, +1 Resistance, +3 Health, +50% Cost
Trireme, Galley

race	unit	cost	Figures	Melee	throw/breath	Range	Ammo	Armor	Resist	Health	to hit	Move	Poison	ToDefend
Troll	Spearmen	30	5	5				2	4	4	0.3	2		0.3
Troll	Rock Thrower	50	4	4	3	3	8	1	5	3	0.3	2		0.3
Troll	Swordsmen	50	4	7				4	5	4	0.3	2		0.3
Troll	Halberdiers	75	4	8				4	5	6	0.3	2		0.3
Troll	Shamans	80	4	5		3	4	3	7	4	0.3	3		0.3
Troll	Shieldbearers	135	4	8				5	7	6	0.3	3		0.3
Troll	War Trolls	220	4	11	3			4	8	8	0.3	3		0.3
Troll	Chieftains	290	4	5				6	9	6	0.3	3		0.3
Troll	War Mammoths	290	3	12				7	9	13	0.4	3		0.3

Special Units:

Rock Thrower (Mill + Smithy, cost 50) – Troll's answer to bowmen, carries a mix of melee, thrown, and ranged.

War Trolls (Coliseum + Armorer's Guild, cost 220) – now gain Thrown attack, get better stats and more expensive.

War Mammoth (Stables + Armorer's Guild, cost 290) – Similar unit design of extreme durability and high damage but with much higher stats, costs, and 1 more movement

Chieftains (Armorer's Guild + Animist Guid, cost 290) – A Troll support unit that replaces magicians. It carries 2 spell charges of 'Raise Dead', which works only on normal units, making it ideal for keeping your war mammoth units alive and reduce battle losses.

NEW RACE XuanYuan (Myrran)

Tilted Towards Economy Race

Characteristics: 70 growth, 0 outpost growth. +1 food per farmer. +25% maximum population, cheaper settler

Special Building: Military Workshop (required river)

Building limitations: Temple/Cathedral, Hanger, Brewery, Hillfort, Warlord's Hold, Witches' Convent

XuanYuan is a new race introduced by Warlord mod. Eastern Asian inspired with lore about civilization's origins in Arcanus but cursed when seeking immortality and banished into myrror plane.

The race gameplay theme is strength in numbers (figures, higher population).

Economically, XuanYuan enjoys good population growth and late-game economy thanks to the maximum population bonus and having all buildings accessible to them. The slight increase in food help feed the higher population and larger number of military units.

XuanYuan introduces a varied unit roster with different strengths, helping player adapt to challenges. The units come with higher # of figures. The increased figures (+2) benefit the 4-figure units such as crossbowmen and cavalry units the most. A downside is their fragile nature – a 1 armor reduction with no durability bonuses other than their higher figure counts.

Normal Units: +2 Figures, -1 Armor

Swordsmen, Bowmen, Cavalry, Engineer, Shaman, Shieldbearer, Crossbowmen, Heavy Cavalry

Generic Mechanical Units: -1 Armor, -15% Cost

Trireme, Galley, Fire Galley, Warship, Catapult, Ballista

race	unit	cost	Figures	Melee	throw/breath	Range	Ammo	Armor	Resist	Health	to hit	Move	Poison	ToDefend
Xuanyuan	Conscripts	15	8	2				1	3	1	0.3	2		0.3
Xuanyuan	Bowmen	30	8	1		3	8	1	4	1	0.35	2		0.3
Xuanyuan	Swordsmen	30	8	4				3	4	1	0.3	2		0.3
Xuanyuan	Cavalry	40	6	5				1	4	3	0.3	5		0.3
Xuanyuan	Shamans	50	6	2		3	4	2	6	1	0.3	3		0.3
Xuanyuan	Alchemist	60	6	2		5	10	2	5	1	0.3	2	1	0.3
Xuanyuan	Firelancer	65	8	5				3	4	2	0.3	2		0.3
Xuanyuan	Shieldbearers	90	8	5				4	6	2	0.3	3		0.3
Xuanyuan	Crossbowmen	90	6	1		5	8	2	5	2	0.3	2		0.3
Xuanyuan	Heavy Cavalry	100	6	7				3	6	4	0.3	4		0.3
Xuanyuan	War Monk	120	6	5				4	8	3	0.3	3		0.4
Xuanyuan	Elixir Alchemist	180	6	1		7	6	2	8	2	0.3	3	2	0.3
Xuanyuan	Dragon Guards	190	2	8	12			9	8	13	0.4	2		0.3
Xuanyuan	Auto-Crossbowmen	210	6	1	10	9	8	4	7	3	0.35	2		0.3
Xuanyuan	Dragon Horse	225	4	10				5	9	6	0.3	4		0.3
Xuanyuan	Dragon Ship	300	5	9	6	8	6	6	9	8	0.3	3		0.3
Xuanyuan	Immortal	320	3	8				2	10	8	0.4	3		0.4

Special Units:

Conscripts (cost 15) – Spearmen with armor piercing to compensate for not having room for +2 figures.

FireLancer (Armory, cost 65) – 8-figure melee unit with gunpowder, thus 'causing fear' like Dwarf musketeers. Firelancers are strictly melee and excel at it for their low cost.

Alchemist (Alchemist Guild + Sage Guild, cost 60) – ranged unit with poison gunpowder, has caster points, and a charge of 'rust'.

War Monk (Parthenon + Fighter's Guild, cost 120) – A superior monk variant with an extra charge of healing spell, higher melee, durability, mobility. War monk does not have ranged attacks.

War Wagon (Stable + Mechanician Guild cost 100) – A 2-figure ballista with extra mobility

Elixir Alchemist (Alchemist Guild + Wizard's Guild, cost 180) – A caster 20 unit with a charge of 'endurance' spell. Instead of magic ranged attacks, this unit uses ranged poison 2 gunpowder

AutoCrossbowmen (Armorer's Guild + University, cost 210) – A variant of crossbowmen with close range shots ('thrown') that can be followed with a ranged shot for maximum damage. The unit sacrifices armor piercing in favor of higher base attack.

Dragon Guards (Armorer's Guild, cost 190) – A slow and extremely sturdy shieldbearer/swordsmen variant with only 2 figures. These units are equipped with flame throwers, their primary source of damage, thus they should not engage with fire immune units.

Dragon Horses (Fantastic Stable, cost 225) – A flying cavalry (mobile, first strike) unit with well-rounded stats.

Dragon Ship (Maritime Guild + Wizard's Guild, cost 300) – A 'ship' that attacks with multiple heads, not unlike a hydra. The dragon ship has melee, breath, and elemental ranged attacks from its 5 heads, resulting in high damage against lower-armored units. It comes with very high hp.

Immortals (Linking Towers + Armorer's Guild, cost 320) – An arrogant flying mage hero-like unit with caster 25, a charge of regeneration, several immunities, and good life-draining melee damage output. The immortal cultivator has high hp but is not armored, thus can be easily defeated by repeated low-damage attacks.

NEW RACE Rakhshasa (Myrran)**Tilted Towards Military Race**

Characteristics: 50 growth, 0 outpost growth, +0.25max pop per forest. +1/2 power per population.

Special Building: Pool of Repentance (required forest)

Building limitations: Cathedral, Mechanician's Guild, Maritime Guild, Hanger, Brewery, Hillfort, Warlord's Hold, Witches' Convent

Rakhshasa is a new race introduced by Warlord mod.

Feline race with a gameplay theme of fast bloodsucker carnivore units and multiple units (including a starter unit) with stealth ability.

Their military moves fast in the battlefield, their lower-tier generic units are cheap to build, while their more advanced racial uniques all come with the bloodsucker trait (if unit attack deals damage, 3 extra damage is added while unit heals 3 points). This can include separate ranged attacks and thrown attacks, the latter allowing a double-bloodsucker effect. However, a maximum of 1 trigger per attack regardless of # of figures.

Normal Units: +1 armor, +1 speed, -20% cost

Spearmen, Swordsmen, Monk

Generic Mechanical Units: +1 Armor, +1 Movement

Trireme, Galley

race	unit	cost	Figures	Melee	throw/breath	Range	Ammo	Armor	Resist	Health	to hit	Move	Poison	ToDefend
Rakhshasa	Spearmen	12	8	2				3	3	1	0.3	3		0.3
Rakhshasa	Swordsmen	24	6	4				5	4	1	0.3	3		0.3
Rakhshasa	Jungle Stalker	30	6	1		1	8	2	4	1	0.3	3	1	0.3
Rakhshasa	Monks	40	4	2		3	4	4	6	1	0.3	3		0.3
Rakhshasa	Wildhunter	65	6	5				4	4	2	0.3	3		0.3
Rakhshasa	Sky Lantern	100	1	0.1	9	9	10	3	7	12	0.5	1		0.3
Rakhshasa	Weretiger Mages	100	4	4				5	8	3	0.3	3		0.3
Rakhshasa	Jaguar Warriors	120	6	5				6	6	2	0.3	4		0.3
Rakhshasa	Blood Priests	120	4	3		4	4	5	8	2	0.3	3		0.3
Rakhshasa	Rishi	180	4	4		6	6	5	8	3	0.3	3		0.3
Rakhshasa	Ogre Lords	280	3	11				10	8	7	0.4	3		0.3
Rakhshasa	Manticore	280	3	9	2			5	8	8	0.4	4		0.3

Special Units:

Jungle Stalker (Smithy+Mill, Cost 30) – a ranged unit that sacrifices physical damage with poison 1 per figure. This unit has 'stealth' and can be recruited from turn 1, giving Rakhshasa a clear early advantage to lair hunting over other races.

Wildhunter (Armory, cost 60) – This is essentially a halberdier unit with the racial trait bonuses. The unit cost is higher due to the very useful blood sucker trait this early in the game. This unit is very vulnerable against resistance-based spells.

Jaguar Warriors (Fighter's Guild, cost 110) – This is a shieldbearer with the racial trait bonuses, and bloodsucker trait. A versatile tactical unit.

Blood Priests (Temple, cost 120) – The priest gains bloodsucker and racial traits without a unit cost increase. For bloodsucker to work, damage needs to take place and blood priests have very low damage output, so the ability is not as reliable. The ability can also be an opportunity cost to casting the healing spell associated with priests, a guaranteed 5 heal that can apply to any unit.

Weretiger Mages (Smithy + Sage Guild, cost 100) – A sturdy caster 14 melee unit with bloodsucker and good durability stats. Bloodsucker may not trigger if its mediocre damage output is blocked by good armor. Unit also has stealth.

Rishi (Wizard's Guild + Temple, cost 180) – A sturdy caster 20 + psionic blast charge unit that comes with good durability stats. The damage output (while lower than wizard guild units) is still usually sufficient to trigger the bloodsucker trait. Another benefit of Rishi is illusion immunity, allowing you to see opponent invisible units.

Ogre Lord (Armorer's Guild + Coliseum, cost 280) – A powerful, sturdy melee unit with bloodsucker trait. While the unit has impressive attack and armor ratings, the lower hp and resistance make this unit vulnerable in certain situations (against 1-figure units, against spells)

Manticore (Fantastic Stable, cost 280) – The unit has been moved from Beastmen, given racial traits such as bloodsucker in place of Beastmen's poison. Instead of ranged attacks, manticore has a weak thrown attack that can help you trigger bloodsucker twice while attacking lower armored units or when thrown attack is buffed with spells or adamantium.

NEW RACE Goblin (Myrran)

Military-Oriented Gameplay

Characteristics: 150 growth, 0 outpost growth, -50% tax income through tax avoidance, +3 rebels, bad race relations.

Special Building: Mother Fungus (required swamp)

Building limitations: Armorer's Guild, Animist's Guild, Fantastic Stable, Maritime Guild, Oracle, Wizard's Guild, Monastery, (+Cathedral/Temple), Merchant's Guild, Farmer's Market, Fortification

Goblin is a new race introduced by Warlord mod.

Goblins are child-sized humanoid fungi, known for their cunning and cruelty. Most races see them as troublesome pests rather than a race to engage with.

Goblin cities grow very fast but have very high Unrest, Tax avoidance (-50% tax income). Goblin army emphasis on numerical advantages (consume less food, more figures, melee units could budding clones) but fragile and die quite easily. Goblin lack of late game normal units and most of their late game offensive power coming from mechanical units that both wacky and deadly to itself and others.

Normal Units: +2 Figures, -10% To-Defend, -20% Cost, -1 Food Upkeep, melee units could budding clones. Spearmen, Swordsmen, Bowmen

Generic Mechanical Units: +2 Figures, -10% To-Defend, -20% Attack strength, -50% Health. Trireme, Galley, Fire Galley, Catapult, Ballista

race	unit	cost	Figures	Melee	throw/breath	Range	Ammo	Armor	Resist	Health	to hit	Move	Poison	ToDefend
Goblin	Spearmen	12	9	2				2	3	1	0.3	2		0.2
Goblin	Swordsmen	24	8	4				4	4	1	0.3	2		0.2
Goblin	Bowmen	24	8	1		3	8	2	4	1	0.3	2		0.2
Goblin	Hobgoblins	40	8	5				4	4	2	0.35	2		0.2
Goblin	Warbosses	120	3	7				5	7	5	0.3	3		0.2
Goblin	Spider Riders	80	6	3				4	7	4	0.3	4	3	0.2
Goblin	Tricksters	60	4	1	3			7	7	2	0.3	3	1	0.2
Goblin	Rabblers	65	6	2		3	4	3	6	1	0.3	3		0.2
Goblin	Hexers	110	6	2		3	6	3	6	1	0.3	2	1	0.2
Goblin	Arsonists	60	8	4	5			3	5	2	0.3	2		0.2
Goblin	Night Goblins	90	8	2		5	8	3	5	2	0.35	3	1	0.2
Goblin	Mechaniacs	90	6	3				3	6	2	0.3	2		0.2
Goblin	Poxbearers	180	4	4				1	6	3	0.3	2	5	0.2
Goblin	Doom Wheels	110	3	9				2	7	6	0.3	5		0.2
Goblin	Gliders	140	5	2	7			1	7	3	0.3	4		0.2
Goblin	Midget Submarines	190	3	5		12	8	5	8	7	0.3	3		0.2

Special Units:

Hobgoblins (Armory, Cost 40) – A replacement unit of Halberdiers as 2nd tier polearm unit, Hobgoblins serve secondary role as road builders as well as main line holder for goblin race with ability to budding clone of themselves in combat.

Warbosses (Fighter's Guild+War College, Cost 120) – Considered as commander unit among goblin, although they have decent fighting capability and number, they don't have any special fighting ability apart from buffing To-Hit and To-Defend based on number of goblins in the army. Although they could not budding clone, they have ability to regenerate after combat.

Spider Riders (Smithy+Stable, Cost 80) – Different from most of cavalry type units, Spider Riders don't have first strike. The role of this unit is mainly an economical version of Giant Spiders with major damage dealing coming from poison and support other units with 1 charge of web. So, this unit serve more as support unit rather than assault one.

Tricksters (Town Hall+Alchemist's Guild, Cost 50) – The first of Goblin's "wacky" units, Tricksters are an indirect fighters with low melee strength but decent thrown, armor, ability to merge and movement of 3, the unit is designed to hit and run. This unit also has the ability to install trap with fast 2 turns recharge, this allows Tricksters to do indirect fight and harass the enemies.

Rabblrouers (Town Hall+Shrine, Cost 65) – This unit is a replacement for shaman as 1st tier cleric but that could not use healing spell and also politicians instead of clerics. Instead, Rabblrouers have Resistance-for-All +1 and ability to cast a few charges of Blaze of Glory so Rabblrouers are offensive cult leaders that turn cultists into suicide attackers and mitigate effects of magic curses and poison.

Hexers (Sage's Guild+Witches' Convent, Cost 110) – This unit is a replacement for disciples as 1st tier spell caster but losing casting skill but gain illusion attack and a few charges of Liability. Although individual figure's attack power is a bit lower than generic disciples in term of raw strength but higher in figures, illusion attack, and poison ability make their total attack strength decent and prime for buffing.

Arsonists (Fighter's Guild+Library, Cost 60) – This unit is a replacement for shieldbearers in their position in roster but its fighting style is completely different. Instead of fast-moving shielded units, Arsonists are double attackers of both fire breath and melee. This allows Arsonists to able to attack flying units. Main defensive perk of Arsonists are causing fear among enemies by how crazy these pyromaniacs are.

Night Goblins (Fighter's Guild+Miner's Guild, Cost 90) – This is a replacement for crossbowmen as 2nd tier physical range attacker but instead focus on attack power of crossbow, Night Goblins focus more on stealth instead with majority of damage coming from poison attack.

Mechaniacs (Town Hall+University, Cost 90) – This is a replacement for engineers but does not have ability to build road. Instead, Mechaniacs focus on their role as mechanical unit support with ability to construct field catapult, buff other mechanical units, and heal mechanical units by 1 Health at the end of turn if their Health is below 50%.

Poxbearers (Sage's Guild+Witches' Convent, Cost 180) – This is one of "wackier" units of Goblin race. Although Poxbearers have decent attack power with secondary attack as Resistance-check attack, their main gimmick is ability to spread plague to the enemy at the beginning of combat (powerful combat global debuff of -3 Attack, -3 Defend, -3 Resistance) at cost of cause minor debuff on their own side. Although its minor debuff on the same side would be removed upon the death of this unit, great debuff on enemy side would go on until the end of combat.

Doom Wheels (Fighter's Guild+Mechanician's Guild, Cost 140) – This unit is 2nd tier mechanical light cavalry with very powerful offensive power and speed but paper thin defend with main defensive ability is causing fear and large shield. One of the wackier functions of this unit is that once Health reduces lower than 50% the unit would allowed to use its special red button that would trigger self-destruction and bring serious damage to surrounding enemies and allies.

Gliders (Hangar+Alchemist's Guild, Cost 180) – These fighter-bomber hang-gliders are only flying unit of the Goblin and one of a few mechanical flying units in game. Flying by exploit wind from permanent Guardian Wind enchantment, the gliders are fast moving with strength of attack coming from their bomb and their numbers but almost no protection from anything else apart from small missile by permanent Guardian Wind enchantment.

Midget Submarines (Mechanician's Guild+Shipyard, Cost 250) – This unit is the wackiest unit in Goblin roster. Midget Submarines are small submerging craft armed with torpedoes and protection coming from immunities to different kinds of attacks the unit gains upon submerging. Due to its attack and def need to be submerged, Midget Submarines will not fly (even if have enchantment that grant them flying) in combat if possible. If the unit fought combat overland, if the unit does not have enchantment that grant non-corporeal, the unit would not be able to submerge in combat.

NEW RACE Hawkmen (Arcanus)

Tilted Towards Military Race

Characteristics: 40 growth, 0 outpost growth. +0.25max pop per mountain, +1/2 power per population

Special Building: Altar of the Sun (required mountain/hill/volcano)

Building limitations: Dock and Shipyard, Bank, Stables, City Wall, Fortification, Brewery, Hillfort, Warlord's Hold

Hawkmen is a new race introduced by Warlord mod.

Hawkmen are winged humanoid people living in mountainous region of Arcanus. Different from beastmen and other half-animal people, they have 6 limbs. They have strong affinity with primal forces, this makes some scholars consider Hawkmen to be mortal descendents of their heralds.

Hawkmen are spiritual but openminded people, this is the only race that could build both temple and cathedral. Hawkmen economic potential is mainly limited to strategies that exploit religious buildings the most. Otherwise, hawkmen could not build any economic buildings beyond basic marketplace and have the lowest fertility rate among Arcanian races.

Their military is however formidable. It is the norm rather than exception for female hawkmen to participate in combat. Flying combined with first strike is a great tactical combo and nearly all recruitable units are racial uniques. Hawkmen higher tier units dominate with abilities and special traits as opposed to sheer might and have the only recruitable unit with magic immunity.

Normal Units: First Strike, Flying, -1 Figure
Spearmen, Swordsmen

Generic Mechanical Units: Mountaineer
Catapult, Ballista

race	unit	cost	Figures	Melee	throw/breath	Range	Ammo	Armor	Resist	Health	to hit	Move	Poison	ToDefend
Hawkman	Spearmen	15	7	2				2	3	1	0.3	2		0.3
Hawkman	Swordsmen	30	5	4				4	4	1	0.3	2		0.3
Hawkman	Harpies	40	5	1	4	3	3	2	4	1	0.3	3		0.3
Hawkman	Eagle Warrior	65	5	5				4	5	2	0.3	4		0.3
Hawkman	Enchantress	80	3	3				3	6	2	0.3	2	3	0.3
Hawkman	Tomahawks	120	5	5				5	6	3	0.3	3		0.3
Hawkman	Sirens	180	3	4				4	9	3	0.3	3	3	0.3
Hawkman	Huichilobos	230	4	8	3			5	8	4	0.3	3	2	0.3
Hawkman	Holy Mothers	330	1					4	15	10	0.4	3		0.4
Hawkmen	Sky Lantern	100	1	0.1	9	9	10	3	7	12	0.5	1		0.3

Special Units:

Harpies (cost 40, mill) – A skirmishing unit with range attacks (3 ammo), decent mobility, and high thrown rating.

Eagle Warriors (cost 65, armory) – combine the traits of cavalry and halberdier while coming with +1 resistance.

Tomahawks (cost 120, fighter's guild) – These are more damaging and durable than Eagle Warriors, but with 1 lower movement point. The high damage potential combined with flying and first strike adds to unit's survivability, although they are vulnerable to ranged attacks.

Enchantress (cost 80, sage guild) – Replacement of generic disciples. Although they don't use ranged attacks, they can fight properly in melee with poison hex and could curse enemy to unnatural slumber (black sleep)

Sky Lantern (Mechanician Guild cost 100) – A 1-figure slow moving unit with good sight, ranged armor piercing attacks, and thrown.

Sirens (cost 180, Wizard's Guild) – Supernaturally seductive lady (1 charge of possession) that bring unnatural demise to any who oppose her (death gaze), thus they are particularly dangerous in close combat.

Holy Mothers (cost 330, Temple, Cathedral) – Worshipped as goddess on earth. They are excellent healers, could bless allies with much higher resistance, windwalks the army, and have a supernatural immunity to magic. They take prohibitive cost to recruit and they walk the path of non-violence with 0 attack rating, thus their usefulness depends on the armies they support.

Huichilobos (cost 230, Armorer's Guild) - elite sacred warriors of Hawkmen society. Dressed as spirits of the sun and armed with poisonous serpentine hooked sword and throwing weaponry. They are immune to fire and death curse and could summon phantom warriors to aid them in battle.

Buildings:

There are new buildings added in Warlord mod. Each race has at least one unique building, usually tied to terrain type. Raider races (Barbarian, Gnoll, Troll) gain a few more buildings to support their more warlike activity. Some buildings are available to most of the races.

Generic Economy Buildings:

NEW: Dock (150 Production, 0 Upkeep) requires to be constructed on coastal city. This building is split up from old Shipyard/Dock and Shipyard. This part of the old building is for access to sea bounty included trade bonus and food generation from each overland water tile near city with 1 food generated per tile and 2 food for river mouth tile. This building also allows city to build Trireme. Every race except Hawkman could build this building.

Marketplace (80 Production, 0 Upkeep) is a basic economy building. This building serves as a central hub of commerce where additional taxes are easily collected. It produces an additional +7 Gold each turn. All races could access to this building.

Bank (200 Production, 2 Upkeep) requires Marketplace and University to be constructed. This building enhances a town's commercial operations, boosting Gold income from the city by 30%. Every race except Barbarian, Gnoll, Troll, and Hawkman could build this building.

Merchant's Guild (400 Production, 3 Upkeep) requires Bank and Shipyard, and need to be coastal city due to Dock as requirement by extension, to be constructed. This building is a sophisticated and organized hub of prosperity, increasing Gold income from the city by 40%! This building is only available to cities of Beastman, Dark Elf, Draconian, Halfling, High Elf, High Man, Nomad, Orc, Xuanyuan, or Rakhshasa race.

Granary (80 Production, 0 Upkeep) is a basic food and growth building. This building functions as a storage facility for the city's food surplus. It increases Maximum Population by 5 and generates 4 Food. Every race except Nomad could build this building.

Farmer's Market (150 Production, 1 Upkeep) requires Granary and Marketplace to be constructed. This building serves as a centralized hub for trading the city's food surplus. It accelerates Population Growth by 40 and generates 1 Gold for every two Population Units. Every race except Nomad and Goblin could build this building.

Animist's Guild (240 Production, 2 Upkeep) requires Granary and Forester's Guild, which means need forest nearby at point of building Forester's Guild by extension but forest does not require after Forester's Guild is built, to be constructed. This building increases each Farmer's Food harvest by 2 and enhances the healing rate of units inside the city by 66%. Every race except Goblin and Nomad could build this building.

Generic Research Buildings: These buildings generate Research points as main resource. Sage Master retort reduces construction cost of buildings in this category by 15%.

Library (80 Production, 0 Upkeep) is a basic education and research building. This building serves as a repository for knowledge and scholarship. It contributes +4 spell research points. All races could access to this building. All races could access to this building.

University (160 Production, 1 Upkeep) requires Library, and Town Hall to be constructed. This building stands as a bastion of education and scholarship. It contributes +6 spell Research points. This building is also serve as key buildings to many of higher tier of economy and production related buildings too. Every race except Gnoll, and Troll could access to this building.

Sage's Guild (400 Production, 2 Upkeep) requires University, and Alchemist's Guild to be constructed. This building is dedicated to the advanced study of magic and understanding the universe. It adds +12 spell Research points. Progressing beyond this building tier requires the casting of Tree of Knowledge. Disciples units and magician units of similar class usually required this building to recruit. Every race except Barbarian, Dwarf, Gnoll, and Troll could access to this building.

Generic Magic Buildings:

Magic Market (100 Production, 0 Upkeep) requires Marketplace to be constructed. This building accommodates novice mages practicing witchcraft and selling various talismans. It generates +4 magic Power. Every race except Dwarf could build this building.

Wizard's Guild (800 Production, 3 Upkeep) requires Magic Market, and Sage's Guild to be constructed. This building serves as a hub for the study and practice of magic. It enhances magic power by +12 and increases spell research points by +2. This building is also a requirement for recruitment of Magisters and magician units of similar class. Every race except Barbarian, Dwarf, Gnoll, Goblin, and Troll could build this building after casting Tree of Knowledge.

Monument (75 Production, 0 Upkeep) is basic casting skill boosting building. This building aids in channeling magical power across distant lands. It enhances combat casting skill by adding +180 SP to a wizard's skill pool. Every race except Dwarf, and Gnoll could build this building.

Linking Tower (500 Production, 4 upkeep) requires Monument, and Sage's Guild to be constructed. This building connects a city to ley lines, facilitating the channeling of magical power across vast distances. It enhances combat casting skill by adding +1200 SP to a wizard's skill pool. Every race except Barbarian, Dwarf, Gnoll, and Troll could build this building after casting Tree of Knowledge.

Amplifying Tower (900 Production, 7 upkeep) requires Alchemist's Guild, and Sage's Guild to be constructed. This building tunes Aether to facilitate easier spellcasting, increasing Overland Casting Skill by +7. Every race except Barbarian, Dwarf, Gnoll, and Troll could build this building after casting Tree of Knowledge.

Generic Religion Buildings:

Shrine (120 Production, 0 Upkeep) is a basic religious building. This building offers spiritual solace to the people of the city. It increases Religious Power by +2 and reduces Unrest by 1 level. All races could access to this building.

Monastery (200 Production, 1 Upkeep) requires Shrine, and Town Hall to be constructed. This building serves as a central hub for the study and teaching of religion within the city. It adds +4 Religious Power and reduces Unrest by 1. Every race except Barbarian, Gnoll, Goblin, Klackon, and Troll could build this building.

Cathedral (500 Production, 2 Upkeep) requires Monastery and Town Hall to be constructed. This building represent monotheism and Tolkien's freepeople races' religion. It designates the city as the center of worship for the one true divinity. Through its unified and focused faith, a cathedral adds 6 Religious Power and reduces Unrest by 2. This building is only available to cities of Draconian, Dwarf, Halfling, High Elf, High Man, or Hawkman race.

NEW: Temple (400 Production, 1 Upkeep) requires Monastery and Town Hall to be constructed. This building is represent polytheism and an alternative upgrade of Cathedral for some races. It adds 4 religious Power and reduces Unrest by 1. It also provides an extra 2 religious Power and reduces Unrest by 1 for each Nightshade, Wild Game, and Orihalcon resource available in city's vicinity. This building is only available to cities of Beastman, Dark Elf, Lizardman, Nomad, Orc, Rakhshasa, or Hawkman race.

Oracle (360 Production, 2 Upkeep) requires Shrine and Town Hall to be constructed. This building offers the city magical guidance, detecting all enemies within 4 squares and serve as religious building in reducing Unrest by 3. Although this building considered as religious building, it does not generate religious Power. This building could be augmented to generate +4 religious Power under influence of Ruler of Underworld global enchantment. All races could access to this building. All races except Goblin could access to this building.

NEW: Witches' Convent (400 Production, 3 Upkeep) requires Shrine and Magic Market to be constructed. This building offers the city magical protections. It generates +4 religious Power, and may curse units that attack the city with common and uncommon curses. Although this building is considered as religious building, it does not offer Unrest reduction. This building is only available to cities of Barbarian, Gnoll, Orc, Troll, and Hawkman race.

Generic Production Buildings:

Smithy (75 Production, 0 Upkeep) is the basic building for city production and military. This building specializes in developing and producing high-quality weaponry and tools, serving as a fundamental building in any town. It generates 3 Production and is essential for producing most military units. Each outpost receives this building for free at time of founding but it could be destroyed and rebuilt. All races could access to this building.

NEW: Brewery (200 Production, 2 Upkeep) requires Farmer's Market and Town Hall to be constructed. This building consumes food equal to 50% of population units in the city, and +25% if the city has a Dock, and convert them into Gold at rate 3 gold per unit of food consume this way. This building is also reduce unrest in the city by 1. This building is only available to cities of Barbarian, Dwarf, Gnoll, Goblin, or Troll race.

NEW: Warlord's Hold (400 Production, 5 Upkeep) requires Town Hall and War College to be constructed. This building reduces the cost to recruit new units from the city by 25% and doubles the strength of garrison units in reducing Unrest (1 unit per -1 unrest compared to normally 2 units per -1 unrest). For Wizard who start the game with Barbarian, Gnoll or Troll (so called 'Raiders Races') as starting race, This building grants garrison strength of 12 units distribute among cities under wizard's control that does not have Warlord's Hold. This building is only available to cities of Barbarian, Gnoll, Goblin, or Troll race.

Generic Military Buildings: They are generally 20-30% more expensive to build than in Caster of Magic but their upkeep costs are cheaper. Warlord retort reduces construction cost of these buildings by 15%.

NEW: Armory (150 Production, 1 Upkeep) requires Smithy to be constructed and is a prerequisite for Barracks and Fighter's Guild. This building serves as gap between Smithy and Fighter's Guild from Classic Master of Magic is now coming back requirement for Halberdiers level units once again. All races could access to this building.

Barracks (200 Production, 1 Upkeep) requires Armory to be constructed and is a prerequisite for Coliseum and War College. This building enable a city to train and organize regular military units. Without barracks, a city can't train regular military units. All units created in the town gain +1 Level. Every races except Halfling could build this building.

War College (540 Production, 3 Upkeep) requires Barracks and Fighter's Guild to be constructed. This building functions as a hub for teaching battle strategy, tactics, and advanced fighting techniques. All new troops begin as Veterans. This building is also serve as requirement replacement for elite units of raider races that could not build Armorer's Guild. Every races except Halfling could build this building.

Fighter's Guild (200 Production, 2 Upkeep) requires Armory to be constructed and is a prerequisite for Coliseum, War College, Maritime Guild, Armorer's Guild, and Fantastic Stable. This building trains soldiers and unlocks superior unit types (Shieldbearers and their equivalents). Progressing beyond this building tier requires casting the Tree of Knowledge spell. All races could access to this building.

Armorer's Guild (600 Production, 4 Upkeep) requires Smithy, and Fighter's Guild to be constructed. This building represents the pinnacle of the race's military technology, providing troops with training in advanced fighting techniques and basic battle tactics, enabling the construction of even more sophisticated units. Every races except Barbarian, Gnoll, Goblin, and Halfling could build this building after casting Tree of Knowledge..

Stables (120 Production, 2 Upkeep) requires Smithy to be constructed. This building serve as breeding grounds for mounts used by mounted troops, enhancing productivity. They generate +4 Production. Every races except Dwarf could build this building.

Fantastic Stables (750 Production, 4 Upkeep) requires Stable, and Fighter's Guild to be constructed. This building houses and cares for magical beasts, training them to be mounted for warfare. This building is a requirement for flying mounted units for race that could not naturally fly. This building is only available to cities of Beastman, Dark Elf, Halfling, High Elf, Nomad, Orc, Xuanyuan, or Rakhshasa race after casting Tree of Knowledge.

Shipyards (300 Production, 1 Upkeep) requires Dock to be constructed. This building is an upgrade split from old Dock and Shipyards. This building is a requirement for the city to build more powerful ships. Every race except Hawkman and Lizardman could build this building.

Maritime Guild (450 Production, 3 Upkeep) requires Shipyards, and Fighter's Guild to be constructed. This building facilitates the construction of large ships through training, organization, and support for experienced shipbuilders. This building is a requirement for the Warship and other ships of similar class. This building is only available to cities of Barbarian, Draconian, Dwarf, Halfling, High Man, Nomad, Orc, or Xuanyuan race after casting Tree of Knowledge.

NEW: Hangar (400 Production, 3 Upkeep) requires Sage's Guild and Mechanician's Guild to be constructed. This building is a requirement for mechanical flying units. This building is only available to cities of Draconian, Goblin, or Hawkman race after casting Tree of Knowledge.

Defensive Structures:

City Walls (90 Production, 1 Upkeep) is a basic city defending structure. This building is surrounding the city with a tall brick wall that extends the detection range of enemy units to 3 squares. Units positioned behind the wall gain +3 Armor. If a wall segment is destroyed, this bonus reduces to +1 Armor. The defending side can use the Disrupt spell to demolish the wall for emergency exits, provided the unit does not already have a spell charge assigned. Every race except Hawkman could build this building.

NEW: Hillfort (300 Production, 3 Upkeep) requires Miner's Guild and Stable to be constructed. This building grants impassable rock cliff face to the city that could not be cross except by Non-Corporeal unit except 4 access points on each side of the city. The friendly units receive Missile Immunity if the units stay inside city area. This building is only available to cities of Barbarian, Gnoll, Troll, or Hawkman race.

NEW: Fortification (600 Production, 5 Upkeep) requires City Wall and Mechanician's Guild to be constructed. This building grants moat to the city with water terrain that could not cross except with flying or amphibious units surrounding the city wall except two bridge locations. Friendly units receive bonus equivalent to Large Shield if they stay inside the city wall area. If the unit already have Large Shield, unit will receive Missile Immunity instead. This building is only available to cities of Beastman, Dark Elf, Dwarf, Halfling, High Elf, High Man, Klackon, Orc, or Xuanyuan race after casting Tree of Knowledge.

[illegible]

New Racial Unique Buildings:

Altar of Storm (600 Production, 10 Upkeep) is Barbarian's unique building that requires Witches' Convent and shore nearby the city to be constructed. This building grants the city 8 religious power, and all new units trained in the city gain the Lightning Blade ability. In combat, the city is protected by a Lightning Storm combat enchantment.

Idol of Heavenly Bull (1200 Production, 20 Upkeep) is Beastman's unique building that requires Monastery and desert nearby the city to be constructed. This building is a significant cult statue revered in beastman culture. Each worker unit generates 1 food and can receive bonuses from the Animist's Guild. Additionally, all new units trained in the city gain a 25% increase in Health Points, with a minimum of 1 additional Health Point.

Tree of Magic (1200 Production, 20 Upkeep) is Dark Elf's unique building that requires Wizard's Guild and forest nearby the city to be constructed. This building grants newly trained units with Casting Skill equal to their base magical Resistance plus base Magic Range Attack at moment they are recruited and all Magic Ranged units gain +2 Ammo.

Dragon Mound (1200 Production, 10 Upkeep) is Draconian's unique building that requires Stable and hill/mountain/volcano nearby the city to be constructed. This building serves as a crucial site for the Draconians to enhance their dragon powers through communion with the mother drake. Newly trained units from the city receive significant benefits: they gain +2 Fire Breath and +1 Armor. Additionally, the mother drake's hoard also serves as an additional Bank, providing provide gold equal to 30% of base Gold generate in the city.

Lava Smelter (1200 Production, 20 Upkeep) is Dwarf's unique building that requires Alchemist's Guild and hill/mountain/volcano nearby the city to be constructed. This building accesses rare minerals by smelting lava from deep veins beneath hills and mountains. It generates 15 Power and enhances the level of magic weapon upgrades. At level 1, upgrades Magic weapon into Mithril weapon. At level 2, upgrades Mithril weapon into Adamantium weapon. At level 3, upgrades Adamantium weapon by give additional Orihalcon upgrade. Combination of mineral near the city is also grant unit ability. Mithril plus Adamantium grants Weapon Immunity. Mithril plus Crysx grants Missile Immunity. Mithril plus Orihalcon grants permanent Resist Element. Adamantium plus Orihalcon grants permanent Elemental Armor. Adamantium plus Crysx grants permanent Flame Blade. During a siege, the city gains the Wall of Fire enchantment from the outset.

Altar of the Moon (600 Production, 10 Upkeep) is Gnoll's unique building that requires Witches' Convent and swamp nearby the city to be constructed. This building grants the city 8 religious power, all new units gain Poison Immunity, Rage ability. All ranged units get +2 Ranged Attack. Hunters unit gains Poison 2. And Witchdoctors unit has Lifesteal -1 replacing its Poison attack. In combat, the city is protected by greater curses.

Academy (1200 Production, 10 Upkeep) is Halfling's unique building that requires Monastery and hill/mountain/volcano nearby the city to be constructed. This building is a school dedicated to the study, discussion, and application of cutting-edge knowledge for public benefit. It provides research based on the maximum population size, reduces population decrease rate by half, and lowers the cost of ship and siege units by 25%.

Tree of Life (800 Production, 20 Upkeep) is High Elf's unique building that requires Animist's Guild and forest nearby the city to be constructed. This building accelerates population growth by +100 per month, provides food equal to the maximum population unit, and grants Regeneration 0 to all defending units in combat that do not already possess it. It also reduces Unrest by 50% if Wizard's home race is High Elf.

Sancta Basilica (2400 Production, 20 Upkeep) is High Man's unique building that requires Cathedral and desert nearby the city to be constructed. This building is housing sacred relics of past Avatars, generates religious power equal to the city's maximum population unit. All units trained here gain +3 Resistance. Clergy, crusaders, and paladins receive Sanctify. Crusaders also gain Lucky, paladins gain Magic Immunity, and clergy gain improved Exorcise but at higher cost. In combat, the city is blessed by True Light.

Undercity Hive Network (1200 Production, 10 Upkeep) is Klackon's unique building that requires Town Hall and Mechanician's Guild to be constructed. This building is an underground settlement and tunnel network directly beneath the Klackon city. It supports 30% more population capacity but also adds +1 Unrest. Defending units can move swiftly through the underground tunnels for tactical advantage as if they have Merging ability.

Baray (1000 Production, 10 Upkeep) is Lizardman's unique building that requires Monastery and river nearby the city to be constructed. This building is an advanced water system that transforms a dry city into a water paradise for the Lizardmen. It generates Gold equal to the city's maximum population, reduces Unrest by -2. Newly trained ground units from this city gain Amphibious and Mariner. In combat, the city area becomes water, granting all friendly units the ability Amphibious.

Caravanserai (400 Production, 3 Upkeep) is Nomad's unique building that requires Town Hall and desert nearby the city to be constructed. This building serves as a crucial station for caravans traversing the desert, boosting Gold income equivalent to the base trade bonus generated by the city without Nomad bonus. Units trained in this city, excluding sailing units, gain +2 Overland Movement.

Ludus Agoge (1200 Production, 20 Upkeep) is Orc's unique building that requires War College and desert nearby the city to be constructed. This building is an elite school that uses rigorous methods and supplements to enhance children's performance. The city gains +15 Research points, and new units gain +1 Attack, Resistance, and Health, except Legionary units, which gain +1 Movement.

Frost Club Hall (600 Production, 10 Upkeep) is Troll's unique building that requires Brewery and tundra nearby the city to be constructed. This building aims to restore the prestige and secrets of the Frost Club clan. Newly trained War Mammoths gain Regeneration 1, and other Troll units gain Cold Immunity and double their regeneration strength.

Military Workshop (1200 Production, 20 Upkeep) is Xuanyuan's unique building that requires Mechanician's Guild and river nearby to be constructed. This building enables Xuanyuan units to utilize their advanced military missile technology. All units receive +2 to Physical Ranged, Fire Breath, and Thrown attacks if they possess those types of attacks, along with a +1 bonus to Poison attacks. Units equipped with Small Physical Ranged projectiles have them upgraded to gunpowder-infused missiles (Heavy Physical Ranged) instead.

Pool of Repentance (1200 Production, 10 Upkeep) is Rakhshasa's unique building that requires Monastery and forest nearby to be constructed. This building is a revered site where rituals of absolution take place. The Pool of Repentance generates 1 Production for each unit of farmers, reduces Unrest by -3 as a religious building, and grants new units produced in the city +1 Armor and +1 Resistance.

Altar of the Sun (600 Production, 10 Upkeep) is Hawkman's unique building that requires Witches' Convent and hill/mountain/volcano nearby the city to be constructed. This building grants the city 8 religious power, +100 Population Growth per turn, and all new units except Holy Mother trained in the city gain +1 Figure. In combat, the city is protected by a High Prayer.

Mother Fungus (1200 Production, 10 Upkeep) is Goblin's unique building that Witches' Convent and swamp nearby the city to be constructed. Goblins all new units gain +2 Attack, +10% to-Defend, Poison 1, and x2 Spellcharge. Additionally, it is detecting all enemies within 10 squares.

Heroes:

To summarize, changes often revolve around making hero stats and abilities fit the theme of races. Discovery is more exciting than listing all stat changes.

One major overall change is heroes starting with base 40% to hit as a minimum, with some lower stats, particularly in range, to compensate.

Beastmaster had its fame requirement increased to 10, preventing every single wizard tower to be protected by a beastmaster hero.

Hero Experience: +5% to hit earned in level 4, level 6, level 8 and level 9 (instead of +10% earned in level 5 and 9)

There's 3 heroes that have unusual item slot configurations: Gunther with 2 swords and no shield, and war monk and bronze sentinel with no wand/sword (2 accessory slots)

12 heroes have been added: Sagittarius, Crone, Grand Inquisitor, Dwarven Steelbreaker, Elven Dreamwalker, Halfling Gambler, Gnoll Warmaster, Swarm Queen, King of the Deep, Troll War Chief, Planewalker, Elementalist

Item Costs have been modified to be lower for weakest effects but become more incremental, to balance against the 'complexity' cost adjustment formula that encourages fewer traits for cost effectiveness. This should decrease the cost of effects such as +1-2 attack/armor/hp/etc, thus a mixture of weak effects should be similarly priced than a single stronger effect. Some item ability costs have been adjusted with a few overpriced elements addressed in this mod. Unfortunately the 'spell charges' continues having a linear cost and being too cheap for advanced spells.

Attack 50-100-150-250-400-650

- Armor: 75-150-225-375 (Armor caps at +4 for items with just +2 with create item).
- Movement: 250-500-1000
- Resistance: 100-200-300-400-500-600
- Spell Skill: 75-150-225-375
- Spell Save: 200-400-800-1600
- Health: 75-150-300-500-850-1300
- Item flaming ability cost change to 200
- Item destruction ability cost change to 400
- Item wraithform ability cost change to 250 and no longer and can add with enchant item
- Item bless ability cost change to 150
- Item ability lionheart rename to mystic power, cost increase to 2000 and no longer need life book
- Item water walking ability cost change to 75
- Item pathfinding ability cost change to 100
- Item resist element ability cost change to 150
- Item regeneration ability cost change to 1000
- Item guardian wind ability cost change to 150
- Item teleporting ability cost change to 900
- Item amplifier ability cost change to 300
- Healing Aura can be added to artifacts at 700 cost
- Binder (spell lock) can be added to artifacts at 700 cost and requires 7 Sorcery books
- Sacred (chosen) can be added to artifacts at 1800 cost and requires 7 Life books
- Colossal Power (iron skin & colossal strength) can be added to artifacts at 1200 cost and requires 5 Nature books
- Chaos Conduit (blazing march & beat of swiftness) can be added to artifacts at 1200 cost and requires 7 Chaos books
- Plague Lord (causes plague) can be added to artifacts at 1500 cost and requires 7 Death books
- Eye of Storm (lightning storm & hurricane & freezing rain) can be added to artifacts at 1500 cost and requires 7 Nature books

Spell Changes, Comments:

Larger land sizes have a cost modifier to global-type spells (increase)

Larger land sizes have a small cost modifier to localized spells such as unit/city enchantments (decrease)

There have been changes and additions to give each magic realm more of an identity and playing style.

Note that earliest summons have been all weakened overall and early uncommons now come with higher research cost. This was done to balance the normal vs fantastic power balance throughout the game, particularly to address the slower city progression in this mod. Common summons are the least effective tier and may appear more like being support as opposed to playing entirely with summons (unless conjurer trait), requiring player to advance to next tier ASAP.

Note that strength of magic attacks are now based on 60% hit chance, rather than 30%.

Common tier spell research costs reduced among spells costing 260 or more, reducing overall research cost of a realm's 10 commons from 3140 to 2880 (-8%)

Common tier spell research costs shifted around to emphasize strength of certain spells, while staying within the grand total sum of 2880.

Note that you have 12 uncommon spells and 16 rare spells to choose from, +2 and +4 for each of these tiers, respectively. In the case of rare-tier spells, arrows are provided to scroll up and down during the 10-book 'early rare' selection.

Arcane (Generic):

Overall trade value of Arcane spells is decreased due to no wizard that would miss these spells and they would have those spell sooner or later.

Magic Spirit (cost -/30, 1 upkeep) – the most basic summoning magic, the same as Caster of Magic for Windows.

Summoning Circle (cost -/0) – Although spell itself is the same as before except for lower trade value (reduced from 9 to 6), it is no longer guaranteed as early spell for research anymore. This made early gain of this spell by Conjurer retort more powerful.

Heroic Heart (cost 18/-) – 240 research cost (from 440) – we can't justify such an investment for a healing spell with ½ the efficiency of life's healing and only limited to heroes. This deserves an average common-tier cost.

Dispel Magic (cost 10+/-) – 320 research cost (from 640) – there needs to be a counter to mega-buffing multi-figure units early in game, especially in a mod that further encourages buffing normal units. As a result, it was needed to make dispel magic easily accessible and worth researching early in game.

Enchant Item (cost -/0+) – the spell has lower trade value from Caster of Magic version (from 11 to 9) and research cost increases to 400 (from 320). The strength of this spell is depending on built the wizards have.

Detect Magic (cost -/200, 3 upkeep) – the spell is lower in trade value (from 11 to 6) but with more expensive research cost as this spell could be the most important or something you free to ignore depending on what spells and built the wizards have.

Spell of Return (cost -/1000) – free spell you have from the start in Caster of Magic although it is recognized as uncommon spell. This spell is a failsafe that as player would not want to be in situation that need this spell but by having it is still much better than not. So giving it for free is more like helping AI than helping player.

Disenchant Area (cost -/50+, 0 upkeep) – The spell is more or less the same except lower in trade value (from 19 to 17) and some AI behavior about researching it.

Summon Hero (cost -/240) – Trade value of the spell is decreased (from 24 to 20).

Tree of Knowledge (cost -/250) – research cost is increased significantly (from 180 to 2000) due to the city pacing adjustments (see buildings section) and the more advanced nature of top-tier military units (see military section, race section), Tree of Knowledge had to be delayed. The higher one-time upfront cost was a preferred choice over making each of the unlocked buildings take too long to build. Tree of Knowledge unlocks Armorer's Guild, Fantastic Stables, Maritime's Guild, Wizard's Guild, Hangar, Linking Towers, Amplifying Tower, and racial unique buildings.

Resurrection (cost -/35, 0 upkeep) – shifted from Life uncommon to arcane rare with 3200 research cost. This allows all wizards an option to resurrect their fallen hero, but the investment cost is high.

Summon Champion (cost -/600) – trade value of this spell is decreased a bit (from 30 to 28) as there are more powerful champions to summon but result is also much less reliable as well.

Create Artifact (cost -/0+) – although spell is the same but there are more artifacts ability that could be created in Warlord mod to design your own custom-made artifacts.

Disjunction (cost -/375+, 0 upkeep) – this spell is more valuable than in Caster of Magic in term of trade value (from 28 increases to 30) as there are more crazy global enchantment that you would want to get rid off here.

Plane Shift (cost -/120, 0 upkeep) – Research cost down to 6000 (from 8000)

Spell of Mastery (cost -/9000+map scaling) – research cost of the spell is lower (from 440000 to 330000) and arrives a bit earlier to shake things up earlier in game and takes fewer turns to cast, helping put an end to a long game. Note: Enlightenment spell, which was used to rush-research spell of mastery, was redesigned.

Arcane (Retort Exclusive):

Here are spells which only available to wizard with specific retort. Spells could not be trade or discover in lair, and have to be research normally to get them. Wizard could get more of them researchable if they earn new retort during the game.

NEW: Philosopher's Stone (cost -/210, 7 upkeep) – Split from old sorcery's Philosopher's Stone with all economic part with additional abilities to enchant physical Alchemist's Guild to generate 12 gold and add mineral level in place without required mineral. This spell is only available to Alchemist retort holder.

NEW: Education Reform (reform, effect taken upon researched) – All research buildings now generate gold equal to their upkeep cost. War College also generates additional 2 Research points. This spell is only available to Sage Master retort holder.

NEW: Arcane Conference (cost -/800, 10 upkeep) – This allow Sage Master to earn additional research from their own fortress city, +1 for each Library, +2 for each University, +3 for each Sage's Guild of both planes. This spell is only available to Sage Master retort holder.

NEW: Wall of Stone (cost -/100, 10 upkeep) – The spell is not only placing physical City Wall, but also enhanced it to refund their gold upkeep and restore it at the end of opponent turn. But if it destroy in owner turn, the enchantment will be removed at the end of turn. This spell is only available to Warlord retort holder.

NEW: Mark of Conqueror (cost -/300, 10 upkeep) – The spell is not only placing physical Warlord's Hold, but also enhanced it to refund their gold upkeep and restore it at the end of opponent turn. But if it destroy in owner turn, the enchantment will be removed at the end of turn. This spell is only available to Warlord retort holder.

NEW: Astral Gate (cost -/500, 10 upkeep) – Difference from original version in Master of Magic, this Astral Gate is one-way portal to other realm. Make sure you could establish outpost on other side for another gate to travel back. This spell is only available to Myrran retort holder.

NEW: Tactical Drill (cost -/60, 0 upkeep) – Repurpose discipline spell, now it is only castable outside combat. This spell is only available to Tactician retort holder.

NEW: Tactical Recall (cost 30/-) – Instant spell that allow target unit to escape combat and return with full health.... if the caster won the combat. If the combat is lost, the recalled unit also destroyed. This spell is only available to Tactician retort holder.

NEW: Strategic Recall (cost -/100) – Instantly teleport target unit to the Tactician's fortress. This spell is only available to Tactician retort holder.

NEW: Marionette (cost -/100) – Summon special hero (the wanderer) at cheap cost and get it early. Hero ability is customized base on caster's ability. The hero might not strong but hero could always be resummon after irrecoverably destroyed and could not permanently die. The spell will temporarily disable if the caster has Wanderer marionette alive under control. This spell is only available to Channeler retort holder.

NEW: Marionette Ascension (reform, effect taken upon researched) – Upgrade the wanderer hero even further based on ability of the caster. The wanderer also get stronger as the caster get stronger. This spell is only available to Channeler retort holder.

NEW: Lord Liberator (reform, effect taken upon researched) – When ever the wizard attack city with race the same as the wizard own home race or one of the races the Guardian wizard rules over, defender suffer -1 Attack/Armor/Resistance. This spell is only available to Guardian retort holder.

NEW: Lord Protector (reform, effect taken upon researched) – This reform allows guardian retort bonus to extend to all defending combat. This spell is only available to Guardian retort holder.

Earth-Gate Town Portal (cost -/125, 1 upkeep) – Move from Nature realm to Arcane for sake of quality of life in managing empire in large map. The enchantment is also eliminates gold 'indirect control' penalty of non-capital cities that get enchanted. This spell is only available to Procurator retort holder.

NEW: Archmage Tutition (reform, effect taken upon researched) – Reform allows all magic user units trained from fortress city get enhanced in casting skill, spell charge, and ammo if unit have any of these features. This spell is only available to Archmage retort holder.

NEW: Archmage Guidance (reform, effect taken upon researched) – Reform gives all heroes under the Archmage wizard to get +40 casting skill. This also applies to heroes who could not casting spell before. This spell is only available to Archmage retort holder.

NEW: Bountiful Festivity (cost -/75, 2 upkeep) – Alternative spell for population growth and reducing unrest. This spell is only available to Benefactor retort holder.

NEW: Gospel of Evangelism (cost -/100, 0 upkeep) – Special city curse available to Cult Leader. Garrison units and city produced less Religious Power depend on Unrest in the city. The more unrest mean the city produce less power and easy to fall before might of the Cult Leader. This spell is only available to Cult Leader retort holder.

NEW: Divine Judgement (cost -/1000) – Replacement of Final Wave and Great Unsummoning but instead of kill indiscriminately, it only damage units under single wizard. This spell is only available to Cult Leader retort holder.

NEW: Clockwork Tinmen (cost -/120, 5 upkeep) – Summon mechanical engineer unit that could build road very fast and buff mechanical unit in combat. It ables to destroy any mechanical unit in single hit with its special ability. This spell is only available to Artificer retort holder.

NEW: Clockwork Factory (cost -/200, 4 upkeep) – Put magical automate factory into the city operate with magical power and generate 50 production per turn. This spell is only available to Artificer retort holder.

NEW: Rebuild (cost -/150, 0 upkeep) – Permanent unit enchantment that turn unit into mechanical unit with +2 Melee/Armor, Death and Illusion immunity, as well as armor piercing. This spell is only available to Artificer retort holder.

NEW: Lucky Star (cost 35/-) – Combat unit enchantment that grant Lucky to target unit until the end of combat and while Lucky Star still presence in combat, all friendly units get +1 Attack/Armor/Resistance until Lucky Star is removed from the game. Effect of multiple Lucky Star enchantments are not stacked. This spell is only available to Astrologer retort holder.

NEW: Dishearten Prophecy (cost -/100, 1 upkeep) – Special city curse available to Astrologer. City suffers +4 unrest and garrisons suffer -2 Resistance in combat. This spell is only available to Astrologer retort holder.

NEW: Conjuring Pact (cost 40/-) – Attempts to tame fantastic creature. If non-fantastic creature get hit by this would suffer nausea (-10 To-Hit/To-Defend). If tamed fantastic creature survive the combat, Conjurer could research how to summon them if their realm proficieny is high enough (at least twice of normal rarity level). This spell is only available to Conjurer retort holder.

NEW: Spirit Link (cost -/150, 0 upkeep) – Turn unit into non-fantastic creature while still able to receive bonus as if they are fantastic creatures and get additional +2 Resistance. Unit that originally don't have experience level now also able to gain experience level and could be enchanted with normal unit enchantment while unable to be targeted by spell that only affects fantastic creature. This spell is only available to Conjurer retort holder.

NEW: Rally (cost 15/-) – All friendly unit get +2 Resistance until the end of combat. This spell is only available to Charismatic retort holder.

NEW: Denouement (cost -/200) – Deal damage to reputation of the wizard who own target city and reduces their standing among the wizard. This spell is only available to Charismatic retort holder.

NEW: Whispering Echo (cost 150/-) – Attempts to convince all opponents units in combat to switch side or at least sows discord and confusion among them. Strength of the spell depend on caster has Charismtic or Charming or not. This spell is only available to Charismatic retort holder.

NEW: Tattoo Magic (reform, effect taken upon researched) – Reform allows all newly trained unit with non-permanent enchantment to become permanent enchantment and could not be dispelled. When casting overland common unit enchantment, the spell become permanent on the enchanted unit. This spell is only available to Enchanter retort holder.

NEW: Domain of Enchanter (cost -/800, 10 upkeep) – This global enchantment enhances dispel resistance of all enchantment of the caster twice its strength. All unit curses cast by the Enchanter will become permanent and would not be dispelled at the end of combat. This spell is only available to Enchanter retort holder.

NEW: Tabula Rasa (cost 100/-) – This combat enchantment will remove enemy's combat enchantments again and again at a chance of 33% at the beginning of the Caster's turn. This spell is only available to Runemaster retort holder.

NEW: Rune Formation Array (cost -/1200, 100 upkeep) – This spell is repurposed of Caster of Magic's original Power Link. The size of battery is now reduced to 5000. This spell is only available to Runemaster retort holder.

Arcane (Outlander's technology)

NEW: Crop Rotation (reform, effect taken upon researched) – Each farmer unit generates +1 Food and the City generates food equal to 50% of city's theoretical Overfarming penalty.

NEW: Fertilizer (reform, effect taken upon researched) – The City generates food equal to 50% of food output after Overfarming penalty.

NEW: Concrete Construction (reform, effect taken upon researched) – Building cost -20% from base cost.

NEW: Standardization (reform, effect taken upon researched) – Building cost -10% from base cost. Unit training cost -10% from base cost. Increase Gold bonus from trade by 10%.

NEW: Advanced Mining (reform, effect taken upon researched) – Gold and Production bonus from non-magical mineral resources increase by 100%.

NEW: Industrialization (reform, effect taken upon researched) – The city gets +5% Production for each Marketplaces, Bank, Guilds, and Production buildings.

NEW: Printing Press (reform, effect taken upon researched) – All buildings that generate Research generate +2 Research points.

NEW: Bureaucratic Reform (reform, effect taken upon researched) – Reduces city's corruption penalty by 20%. This reduction occurs before corruption cap is applied.

NEW: Xenopsychology (reform, effect taken upon researched) – Each Non-Religious Unrest reduction building reduces unrest by +3. In combat, all regular units own by the outlander gain +1 Resistance.

NEW: Scientific Process (reform, effect taken upon researched) – The City generates +25% of total Research point.

NEW: Radio (reform, effect taken upon researched) – Reduces corruption cap to 20%. All cities get +20% Gold from Trade bonus. In combat, all regular units under the outlander's control gain +10% To-Hit, +10% To-Defend, +1 Resistance.

NEW: Corporate Charter (reform, effect taken upon researched) – All cities get +0.5/1.0/1.5% Trade bonus for each Marketplace/Bank/ Merchant's Guild own by the outlander.

NEW: Sanitation Reform (reform, effect taken upon researched) – Population growth of city or outpost +40 and reduces population loss in cities or outposts by 25%.

NEW: Hospital & Surgery (reform, effect taken upon researched) – Population growth of city or outpost +40. All regular units gain Healer perk.

NEW: Strategic Logistic (reform, effect taken upon researched) – The city could train units as if have Iron, Coal, Mithril, Adamantium, Orihalcon, Quork, or Crysx in vicinity at half resource unit as long as the outlander hold city with these resources. This effect does not cover city enchantment and global enchantment.

NEW: Upgrade & Retrain (reform, effect taken upon researched) – Old units will receive viable permanent unit upgrade available by accessible technology at the end of turn. This reform allows implement upgrade from spell Archmage's Tutition, and Mariner Mastery, as well as upgrade from buildings Lava Smelter, Baray, and Caravanserai. If the unit does not have racial upgrade, this reform allows implementation of an upgrade from Altar of Storm, or Academy.

NEW: Heat Power Engine (reform, effect taken upon researched) – All base production buildings in the city generate +6 production and +3 more production if the city has access to Coal. All newly trained mechanical units coming with Power Engine permanent unit enchantment (+1 Movement speed).

NEW: Explosive (reform, effect taken upon researched) – Double Miner's Guild's output. In combat, Melee or Flying Regular units or Mechanical units or Sapiens summons gain Thrown ability at strength equal to 8-(maximum figures/2) round down. In combat, all Blackpowder units get +2 Range Attack strength and strength of Fire Breath is doubled.

NEW: Ballistics Training (reform, effect taken upon researched) – In combat, all Regular units and Sapiens summons get +20% Range/Breath/Thrown To-Hit.

NEW: Conscription (reform, effect taken upon researched) – Unit training cost -20% from base cost.

NEW: Military Drilling (reform, effect taken upon researched) – All newly trained Regular units gain Discipline permanent unit enchantment. Mechanical units gain +3 Health each turn if unit's Health is lower than 50%.

NEW: Rocketry (reform, effect taken upon researched) – All newly trained Regular units with Physical Ranged Attack or Thrown or Fire Breath gain Blackpowder weapon upgrade.

NEW: Armorclad (reform, effect taken upon researched) – All newly trained Regular mechanical units gain Armorclad permanent unit enchantment (+6 Armor). In combat, all Regular non-Mechanical units gain Battle Armor perk (+3 Armor).

NEW: Magical Physics (reform, effect taken upon researched) – Fire, Lightning, Cold, Poison, Non-Magical direct damage spell deals Non-Magical damage of the same element at 50% strength on their primary target.

NEW: Techno-Geomancy (reform, effect taken upon researched) – Double casting skill output from Monument, Linking Tower, Amplifying Tower.

NEW: Magitek Science (reform, effect taken upon researched) – +100% resource output for Mithril, Adamantium, Quork, Crysx, and Orihalcon. Unit with Armorclad or Battle Armor gains Resist Magic unit enchantment.

NEW: Magitek Engineering (reform, effect taken upon researched) – City under the outlander's control convert 20% of Production output to generate additional power at ratio 3:1. In combat, unit with Power Engine upgrade get additional +2 Movement Speed, +20% To-Defend, and Large Shield.

NEW: Xenoveterinary (reform, effect taken upon researched) – In combat, fantastic creatures get +10% To-Hit, +25% Health (but not lower than +1). All fantastic creatures could access to Armorclad upgrade if Obsolescence Rearmament has been researched.

NEW: Temporal Engineering (reform, effect taken upon researched) – All units with Power Engine upgrade gains Haste. All sailing movement units with Power Engine upgrade gains Flying, Illusion Immunity, and units transport by them gain Stealth.

NEW: Energy Beam Weapons (reform, effect taken upon researched) – Convert projectile of all ranged units with Power Engine upgrade to beam energy, gains +50% Ranged Attack strength and deals Doom damage and triggers Destruction with save penalty -1 for each 15% of Ranged To-Hit. In combat, all regular/Aarmorclad units' Melee Attack deals Doom damage.

NEW: Psycho Converter (reform, effect taken upon researched) – In combat, all regular/Aarmorclad units gain To-Hit and To-Defend percent equal to half of Resistance multiplies with unit Level, round down.

NEW: Pneuma Reactor (reform, effect taken upon researched) – All Undead units gain permanent Bloodlust at the end of Overland turn. In combat, all regular/Aarmorclad units gain Life Steal with strength equal to half of base Resistance.

Nature:

Nature realm is about adaptability and making the best of the world terrain and minerals. If playing a mono-realm wizard, Nature is the least specialized realm. However, the player is more likely to have the necessary tools to do an adequate job on most circumstances.

There have been some additions to unit, city and global enchantments with direct or indirect boosts to unit recruitment strategies, thus conjurer is no longer a near-mandatory retort for nature players.

New spells further establish these realm characteristics.

Removed Nature Spells

Fairy Dust – To emphasize realm uniqueness of chaos, removed this spell as researchable but still using by Sacred Ancient (see uncommon spell below). This spell was potentially more damaging than fireball! Nature creature casters can still cast fairy dust.

Earth Gate Town Portal (cost -/125, 1 upkeep) – Move to Procurator's signature. The spell is replacing by new global enchantment "Ice Age"

Nature Common Spells

Earth Lore (cost -/10) – Same as in vanilla Caster of Magic for Windows

Nature's Eye Nature's Witness (cost -/35, 0 upkeep) – In addition to current effects, grants 4 power and -1 unrest If nightshade present.

Water Walking (cost -/20, 0 upkeep) – Research cost decreases from 260 to 240.

Earth to Mud (cost 20/-) – Research cost increases from 280 to 380.

Wild Boars (cost 15/-, 1 upkeep) – Research cost increases from 280 to 320.

War Bears (cost -/65, 2 upkeep) – Now with 2 figures and higher cost, but with increased melee and hp per figure.

NEW: Sprites Killer Wasps (cost -/55, 1 upkeep) – replaces sprites and maintain a role of being a particularly good unit against lairs/nodes/neutrals but unreliable against wizards. Wasps have useful early perks like 9-figures, missile immunity, and high armor (with 1hp) allowing it to reroll armor every time it loses 1 hp. It benefits greatly from melee and hp buffs. With base stats, it is mainly a low-damaging annoyance that also serves as a counter against bowmen. The unit has been revisited due to claims that it is overpowered. War Bears are more reliable, but wasps have more potential under the right circumstances.

Resist Elements (cost 5/25, 0 upkeep) – Research cost decreases from 440 to 320.

Web (cost 10/-) – Research cost decreases from 480 to 400.

NEW: Survival of The Fittest Natural Selection (cost -/150, 3 upkeep) – Global Common - Units trained gain bonus based on resources in the recruiting town's surroundings including coal (+1 melee), iron (+1 armor), wild games (+1 ranged attack and gain forester), nightshade (+1 resistance). And power minerals (+1 resist per 10 base power income from minerals). This replaces 'fairy dust' and is more consistent with Nature's theme of benefiting from terrain.

NEW: Wargs (cost -/64, 1 upkeep) – This spell could only be learned with Conjuring Pact and 2 Nature spell books.

NEW: Sprites (cost -/70, 2 upkeep) – This spell could only be learned with Conjuring Pact and 2 Nature spell books.

Nature Uncommon Spells

Land Linking → **Nature Link** (cost 13/65, 1 upkeep) – Renamed from Land Linking. Spell is castable in combat and also grants an additional +1 resistance to the enchanted unit (whether normal or fantastic). Rush-research can be a beneficial tactic.

NEW: Venom (cost 12/60 1 upkeep) – Uncommon – target unit gains poison immunity and +1 poison. Please note that poison can trigger during ranged and thrown attacks, thus you have a chance of inflicting poison twice when attacking or once from a distance. The poison immunity benefit may be what draws you to this spell, especially early in game as your low-resistance units get damaged too easily by too-common sources of poison.

Giant Spiders (cost -/110, 2 upkeep) – The unit, while costlier, comes with an extra charge of 'web', greatly expanding its use as a support unit throughout the game. Early uncommon summon strategies weakened to make normal units more relevant, thus spider's research cost has been more than doubled.

Change Terrain (cost -/28) – Research cost increases from 960 to 1000.

Nature's Cure (cost -/50) – Research cost decreases from 1280 to 1100.

Ice Bolt (cost 24/-) – Now spell's cost reduces from 25 to 24 so the spell can be accessed by ultra elite caster 20 units. Strength of attack reduces by half (from 34 to 17) but double hit chance (30% to 60%). Trade value is also increased.

Cockatrices (cost -/150, 4 upkeep) – Although spell cost is still the same, cockatrices's stone touch is no longer able to be triggered by magic ranged attack, so it loses combo with Focus Magic spell.

Iron Skin (cost 21/105, 3 upkeep) – Change from rare to uncommon spell, research cost decreases from 4000 to 1400, and casting cost reduces from 24/120 to 21/105.

Water Elemental (cost 40/-, 3 upkeep) – moved from sorcery as an uncommon nature combat summon, replacing the poor 'construct catapult'. The unit was appropriately adjusted with deal less damage, particularly its ranged attacks. While stats may appear underwhelming, this unit should not be underestimated in the hands of a smart player with the right set of support spells and under the right circumstances (and can also be a good desperate combat spell for a poorly defended city under siege).

Crack's Call (cost 30/-) – Spell now calculates damage and burying chance differently and gives additional penalties to buried units. It now calculates chance to bury unit at 4% * unit armor chance, capped at 75%. A unit that is buried suffers -20% to defend in this mod. Burying a high-armor unit, rather than chance at damage, is more reliable and helps with defensive stalling. Damage is less dangerous in this mod, dealing 4 rolls of 25% chance at dealing 4 points of damage each (if unit is buried, two additional rolls take place)

Transmute (cost -/60) – Research cost increases from 1920 to 2000.

Great Lizard (cost -/200, 5 upkeep) – Given water walking (why wouldn't a great lizard swim?) and ability to blend in nature (stealth) as well as a few damage from poison attack.

Nature Rare Spells

Gaia's Blessing (cost -/100, 3 upkeep) – Trade value increases.

NEW: Transmute Equipment (cost -/90, 0 upkeep) – Rare. Pseudo unit enchantment that gives adamantium and orihalcon to a normal unit or grant permanent buff to a hero. There's a chance you may have many experienced units recruited before you transmuted minerals to adamantium – this is your chance to provide that to them. With this spell, you can permanently buff your heroes with similar value as what normal unit gains as well.

Earthquake (cost -/150) – Still the same as in Caster of Magic for Windows.

Elemental Armor (cost 18/90, 1 upkeep) – Research cost reduces from 3200 to 3000, trade value is also reduced.

NEW: Colossal Strength (cost 24/120, 3 upkeep) – Rare unit enchantment that increases melee and physical ranged strength by 40%. A new opportunity to buff heroes in nature and help make your single figure summons capable of damaging more units.

Blizzard (cost -/120) – Trade value increases but attack strength reduces from 14 to 12 and research cost reduces from 4000 to 3500.

NEW: Sacred Ancient (cost 32/-, 0 upkeep) – Uncommon combat summon. Immobile support units that grant +1 resist to all, have 'fairy dust' charges, and very high durability stats. This spell helps with defensive stalling, grants much-needed resistance, and grants nature a chance to use the otherwise-disabled 'fairy dust' when suitable multi-figure targets are your threat and randomly freeze them to skip a turn. This unit is disabled as rampaging monster. This immobile unit may be obtainable from the very rare global enchantment 'Fairy Ring'. If so, Sacred Ancient generates power income outside combat.

Stone Giant (cost -/250, 5 upkeep) – lowered cost to 250 to ensure nature's summon superiority doesn't solely depend on its only rare-tier 'Survival Instinct'. Its impressive stats for the low cost make this a good spell adaptable to most situations.

Abundance (cost -/150, 2 upkeep) – This enchantment is also additionally eliminated overfarming penalty from the city. Research cost increases from 3600 to 4000.

Petrify (cost 20/-) – Research cost reduces from 4400 to 4000.

NEW: Freezing Rain (cost 45/-) – At the end of each turn, each opponent's unit get hit by fairy dust-like attack. Units that do not have Cold Immunity, Non-Corporeal, or Immolation have a 50% chance to be frozen and fixed to the ground until the end of the next turn.

NEW: Thunderbird (cost 350/7) - Rare. Giant eagle with strong lightning breath (activates only when attacking). The thunderbird is also immune to Hurricane (see below). This is the only relatively advanced flying unit offered by Nature.

Earth Elemental (cost 50/-, 4 upkeep) – Spell is cheaper to research (5600 to 4600) but also reduces in trade value. Earth Elemental is now also get bonus based on resource of the combat tile on overland and what kind of terrain that Earth elemental summon upon in combat.

Gorgons (cost -/320, 8 upkeep) – Slightly lower stats across the board, loses supernatural, and cheaper. Now this is the nature unit with 40 caster, shifted from behemoth. Gorgon is generally more usable after this change and can be optimized by having it cast petrify spell twice. This is also to ensure summon superiority of nature not being as dependent on rare-tier 'Survival Instinct'

Survival Instinct (cost -/600, 15 upkeep) – For flavor, newly created normal units also gain small stat boosts based on city's surroundings: 'to defend' (+3% to +7%) based on gold-producing resources (which may be transmuted to mithril/adamantium otherwise).

NEW: Hurricane (cost 30/-) – Rare, Reduces Ranged to Hit by 20% and breath to hit by 30% to all units including casting wizard. Eliminates flying to all units (except thunderbird and air elemental) including casting wizard's. Nature wizards are least vulnerable to these effects, especially wizards dominating with ground melee units, thus serving as a useful counter at a low cost against specific threats such as dragon units. Enemy AI is fairly smart when cast this spell to its advantage.

~~Call The Wild~~ – **Nature Embrace** (cost -/900, 30 upkeep) – In addition to the existing rampaging monster and lair guardian effects, all newly recruited units start with 'resist elements' if the recruiting town has an animist guild built.

NEW: Ice Comet (cost 50/-) – Drop a gigantic ice comet at a target unit, This spell is acting as single target non-magical multifigure attack and also act as multi-target single turn freeze debuff too.

Nature Very Rare or Higher Spells

Clairvoyance (cost -/800, 20 upkeep) – Costlier but now also comes with an unrest quelling effect (2 rebels) to accommodate the higher population of 'abundance' cities and be able to more effectively protect against unrest-causing spells.

Regeneration (cost 32/160, 5 upkeep) – Research cost reduces from 12000 to 8000.

Fairy Ring (cost -/1200, 40 upkeep) – Now also grants 10 flat overland skill bonus plus 1 for every animist guild in towns controlled by casting wizard.

Great Wyrm (cost -/450, 15 upkeep) – Reduced cost and given higher movement and water walking.

NEW: Ice Age (cost -/1500, 100 upkeep) – This new global enchantment, replacing Earth Gate that move to Arcane, is Nature's equivalent of Doomsday by causing climate change that causing changing in combat landscape, both land and sea, and reduce food production worldwide. As productive land gradually turns into tundra while once useless land of your empire turn into productive land. Additionally caster is coming into combat with free Freezing Rain and their nature creature gain cold immunity while all opponent sailing units losing 50% of movement points due to erratic wind pattern tha they could not handle.

Herb Mastery (cost -/1000, 12 upkeep) - Herb Mastery has two added effects: it increases overall population growth of cities by +33% while halving pop reducing effects, a soft counter to Death realm. Nature has many tools to increase your maximum population capacity, but we need this to make it easier to reach those maximums.

Call Lightning – Lightning Storm (cost 65/-) –lightning bolts are now strength 7 (60% hit chance)

Behemoth (cost -/550, 14 upkeep) – Costlier and without caster 40, but given even higher offense and defense stats and abilities (e.g. armor piercing, cause fear) as well as a stoning gaze of -4 which helps unit hit flyers. It can also walk on water.

Planetary Mastery (cost -/1000, 30 upkeep) – higher research cost and upkeep but now also doubles mineral bonuses to all cities (similar to Dwarf racial bonus), further establishing Nature realm as one dependent on the quality of your territory.

Colossus (cost -/500, 15 upkeep) – Now has higher movement and +10% to defend, but lower ammo and higher cost.

Entangle (cost 50/-) – still the same as in Caster of Magic for WIndows.

Roots of Genesis (cost -/1200, 30 upkeep) – also has additional effect of spawning wild games in forest tiles and tundra tiles and nightshades in river tiles within city area of the caster at rate of 0.5% per tile.

NEW: Gaia Mastery (reform, effect taken upon researched) – Increases enchantment dispel resistance, reduces casting cost of the spells, and buff creature of the Nature realm under wizard control. This reform is only available to Specialist retort holder with Nature as primary realm. Once this spell appears on research page, it will exclude chance to get mastery of other realm.

NEW: Lesser Gaia Lord (cost -/777, 20 upkeep) – This spell could only be learned with Conjuring Pact and 10 Nature spell books.

NEW: Great Gaia Lord (cost -/999, 30 upkeep) – This spell could only be learned with Conjuring Pact and 12 Nature spell books.

NEW: Power of Nature (cost 77/-) – This spell could only be learned by Enchanter wizard who already have access to Resist Elements, Water Walking, Nature Link, Venom, Colossal Strength, Elemental Armor, Iron Skin, and Regeneration. This spell would allow the Enchanter to cast all above unit enchantment all at once on single target!

NEW: Force of Nature (cost 150/-) – This spell could only be learned by Runemaster wizard who already have access to Lightning Storm, Entangle, Freezing Rain, and Hurricane. This spell would allow the Runemaster to cast all above combat enchantment all at once!

Sorcery:

Sorcery realm specializes in utility spells, negating enemy magic, and illusionist trickery. It rewards opportunistic players.

The realm has several means of expanding your abilities as a wizard, whether it is power income, casting skill, gold.

Many spells act as a reaction of a situation, often to shut down threats or bring gameplay mechanics in your favor: ground troops threatening your city? Hold them in place or make your city fly! A spell threatens your game? Counter or dispel it! Don't want to lose a unit or a city to spells in a game revolving around magic? Make them universally immune! At its most powerful, Sorcery can stop time itself. These are generally defensive tools for cautious wizards. The Sorcery school of magic also carries naval advantages with this mod's new spells.

The dispelling nature of Sorcery also applies to banishing creatures altogether. Meanwhile, sorcery summoners have a wide variety of highly strategic combat and overland summons and thus are good candidates for Conjurer retort.

New spells further establish these realm characteristics.

Removed Sorcery Spells

Old Seravy Version of **Power Link** is removed due to its capabilities to break entire game as it is coming early with several wizards still active.

Great Unsummoning is removed due to it cause end turn exceptionally long during its processing of result.

Sorcery Common Spells

Floating Island (cost -/45, 1 upkeep) – the spell is the same as in Caster of Magic but the unit able to be upgraded upon summon by later Mariner Mastery.

Guardian Wind (cost 6/30, 1 upkeep) – trading value is increased from 6 to 7.

AEther Spark (cost 12/-) – attack strength change from 20 at 30% hit chance to 10 at 60% hit chance and research cost decreases from 260 to 240.

Nagas (cost -/65, 1 upkeep) – reduced in cost and upkeep to slightly improve early sorcery game on this front relative to other realms, but overall stats decreased (-1 melee, -1hp). Nagas (amphibious) gain faster movement and fire immunity while fighting in an ocean tile.

Phantom Warriors (cost -/65, 1 upkeep) – research cost decreases from 320 to 280.

Vertigo (cost 10/-) – the spell change to common level and reduction in trade value (from 15 to 11) as well as research cost (from 640 to 280) to common level.

Resist Magic (cost 8/40, 0 upkeep) – research cost decreases from 320 to 280.

Psionic Blast (cost 20/-) – attack strength change from 18 at 30% hit chance to 11 at 60% hit chance and research cost decreases from 380 to 360.

Blur (costs 24/-) – trade value decreases from 19 to 16 but now cost of the spell is decreased from 25 to 24 and has stronger synergy with invisibility (top up damage reduction change from 10% to 20%)

Aura of Majesty (cost -/200, 12 upkeep) – now common-tier but player should double-check before investing on a 12 upkeep spell early on. This was the most appropriate spell to move to common based on the focus magic change.

Sorcery Uncommon Spells

Focus Magic (cost 16/80, 2 upkeep) – now uncommon-tier due to later access to mage-type units and to increase difficulty in successfully applying overpowered combos with other realms. The unit enchantment also felt too advanced and complex to be a common spell, but relative to other changes in this mod, this spell was too limited in use early in the game (casting it on nagas is not as good as it appears). Stoning (and death) touch also no longer can apply in ranged attacks. This eliminates 'focus magic cockatrices' combo. You cannot 'touch' with ranged attacks, makes 0 logical sense. The spell get compensated by new ability to cast in combat, +1 maximum spell charge, and increase of trade value from 12 to 20.

Confusion (cost 16/-) – the spell is moving up from common to uncommon with lower casting cost (from 18 to 16) and higher save penalty (from -2 to -3) with research cost increases from 320 to 700.

Aether Binding (cost -/300, 15 upkeep) – Cost decreased but the dispelling strength effect is halved. It is now a mostly economical spell. The doubled dispel power was moved to the new Power Link.

Flight (cost 22/110, 2 upkeep) – the spell is the same except for research cost is lower from 1280 to 1000.

NEW: Mariner Mastery (cost -/250, 8 upkeep) – Uncommon Global that permanently grants +2 move to all sailing units and mechanical flying ships (when recruited) and floating island and +1 to water walking units during combat as long as spell is active, granting sorcery a naval advantage over other realms

~~Water Elemental~~ Coatl (cost -/150, 3 upkeep) – replaces water elemental (Which was moved to nature as combat summon replacing **Construct Catapult**). This mobile, flying unit with low caster points is meant to be tactical flying cavalry but not very good in stats alone thus not intended to be used as a brute force unit. Caster ability helps it self-cast Guardian Wind or Resist Magic or AEther sparks depending on circumstance.

Spell Lock (cost -/100, 1 upkeep) – the spell is the same as in Caster of Magic for Windows

~~Philosopher's Stone~~ Magic Perimeter (cost -/75, 1 upkeep) – Although it still give magic weapon to newly trained unit, it does not give access to ore utilization. Note: counter magic has also been weakened to strength 60 (from 70).

Counter Magic (cost 40/-) – Cheaper casting cost of 40 (instead of 50) and lower research cost to 1600 (from 2140) but weaker with starting counter strength of 60 (instead of 70).

Phantom Beast (cost 35/-, 2 upkeep) – research cost increases to 1800 (from 1600).

Dispelling Wave (cost 25+/-) – research cost increases to 2000 (from 1920).

NEW: Magocracy (cost -/400, 20 upkeep) – Uncommon Global. All caster cities gain gold from magic markets and wizard guilds equivalent to their power income (base 4 and 12, respectively). Sorcery has many tools to help you progress as a wizard and this has the capacity of increasing your gold income by triple digits.

Sorcery Rare Spells

Disillusionise (cost -/50+) – trade value reduced to 24 (from 28) and research cost decreases to 2400 (from 4000)

NEW: Aether Sink (cost -/100, 2 upkeep) – Rare city curse, Cuts non-religious power (minimum=5) and skill income from city in half, making you even stronger as a wizard relative to opponents.

Flying Fortress (cost -/200, 3 upkeep) – research cost increases to 2800 (from 2400)

Spell Blast (cost -/50) – research cost decreases to 3000 (from 5600)

Stasis (cost 35/175) – the spell get significantly more expensive but coming with a impressively stronger -7 resistance modifier.

Invisibility (cost 30/150, 6 upkeep) – research cost is decreased to 3500 (from 3600) and has stronger internal synergy with Blur (damage reduction top up increases from 10% to 20%).

NEW: Kraken (cost -/310, 8 upkeep) – Rare summon. A swimming creature with high melee and defense stats. Kraken specializes at hunting down transport ships: while at sea it gains stealth and in battles situated at sea (+3 move, fire immunity, invisible, +10% to defend), giving Sorcery realm further naval advantages.

Reinforce Magic (cost -/500, 25 upkeep) – trade value increases to 34 (from 33)

Banish (cost 40/-) – get more powerful with -5 resistance modifier and higher trade value (from 25 to 26).

Mind Storm (cost 35/-) – research cost reduces to 4000 (from 4800)

NEW: Sea Serpent (cost 75/-, 15 upkeep) – rare combat summons. Sea Serpent is a rare level creature with strength as strong as very rare level fantastic creature but could only be summoned on water tile. Apart from usage for naval combat, it might be useful in defending some city with Fortification or Baray.

Air Elemental (cost 50/-, 5 upkeep) – research cost reduces to 4300 (from 4400)

NEW: Cloud Giant (cost -/330, 9 upkeep) – replaces storm giant. This is a different version that attacks with illusion, flies, and has 'lucky' trait. Its stats were significantly lower to balance out these enhancements, resulting in a summon of comparable usefulness to storm giant, just modified to fit the nature of 'sorcery'.

Wind Walking (cost -/200, 7 upkeep) – ability of Wind Walking enchantment is now called "High Wind Walking" to separate from version without overland movement bonus. Research cost decreases to 4900 (from 5200)

NEW: Temporal Twist (cost 40/-) – Rare combat global enchantment – all enemy units lose 1 movement, teleport, first strike, and negate first strike. If the unit is fantastic, it loses an additional movement point. Speed reduces by Temporal Twist would not cause unit speed to go below 0.5. There isn't a counter to first strike/negate first strike in this game and this spell is ideal against summons, something Sorcery is good against.

NEW: Aether Surge (cost 60/-) – Rare combat global enchantment. All caster's units in combat gain +10 casting skill, this includes units which originally does not have casting MP. Each turn, current MP would have MP replenish at rate 5 MP per turn and spell charge would be recharged every 4 turns until the end of combat.

Uranus Blessing (cost -/225, 7 upkeep) – redesigned to grant power equal to city's research income, which can include buildings, town population, enchantments, sorcery procurator. Cost increased to compensate. The overland skill bonus is now granted by various research buildings instead of just amplifier tower. This spell caught a lot of attention for combo potential, but players attempting to maximize combos unintentionally introduce vulnerabilities. If you manage to pull this off with good synergies, this can win you the game.

NEW: Planewalking (cost 30/150, 8 upkeep) – rare unit enchantment, allow unit to plane shift freely on overland map and teleport movement in combat.

NEW: Storm Giant (cost -/330, 5 upkeep) – This spell could only be learned with Conjuring Pact and 6 Sorcery spell books.

Sorcery Very Rare or Higher Spells

Creature Binding (cost 55/-) – buffed with -5 resistance modifier. It was underwhelming that sorcery could kill fantastic creatures at -3 in entire world, death could possess a unit at -3 with an uncommon-tier spell, but sorcery with a single target spell has merely 1 more resistance modifier. This comes with higher research cost of 8000 (from 6000) and higher trade value (from 28 to 38)

Spell Ward (cost -/150, 1 upkeep) – nothing has changed for this spell but more synergy to feed new Power Link.

NEW: Great Unbinding (cost -/1000, 50 upkeep) – powerful very rare global enchantment to replace time ravaging Great Unsummoning. At the beginning of combat all opponent fantastic creatures that participate in combat against the caster have to face Confusion curse with -4 resistance penalty, and even if survive that they still have to deal with significant debuff of -20% To-Hit, -20% To-Defend, and -2 Resistance for the rest of combat.

Haste (cost 50/200, 8 upkeep) – now castable overland with 200 cost and 8 upkeep. Overland movement not impacted, only combat movement. This spell effectively doubles your attack strength while granting a unit so much mobility that almost matches teleport. If you can afford the cost, you can save combat turns by casting and maintaining this spell outside of battle.

Djinn (cost -/395, 10 upkeep) – Now comes with caster 40, helping it cast the stronger banish spell, temporal twist and not be behind efreet's caster capabilities.

Magic Immunity (cost 45/180, 10 upkeep) – higher casting cost prevents Djinn from self-casting (unless buffed with focus magic)

Wind Mastery (cost -/900, 30 upkeep) – the same as before with minor tweak in AI behavior.

Sky Drake (cost -/500, 15 upkeep) – gains mountaineer for sake of synergy with tactician retort, research cost increased to 16000 (from 15000).

Spell Binding (cost -/1200) – research cost decreases to 18000 (from 22000)

Mass Invisibility (cost 80/-) – the same as in Caster of Magic for Windows except for now synergy with Blur is stronger (damage reduction top up increases to 20% from formerly 10%)

NEW: Power Link (cost -/1200, 50 upkeep) – Power Link has been completely changed, including spell image. It now

- grants 10 power per city enchantment in all your cities
- grants 3 overland skill per enemy Amplifying Tower in play
- grants full effect of all enemy monuments and linking towers to your combat skill
- makes dispel-type spells +100% effective. If combined with Aether Binding, it simulates old game's 'True' dispel spells.
- Eliminates non-capital power income penalty

Reason: The original spell was too 'mathematical', caused variable power spikes that could heavily impact domination score and the 'win' button, was too overpowered if obtained early or there are too many players, and didn't seem to affect enemy spell decision logic. The new Power Link has more strategic components while still scaling reasonably well with more players.

Time Stop (cost -/1500, +50 upkeep per turn, +250 upkeep per city taken during Time Stop,) – apart from lower casting cost but higher upkeep, research cost decreases to 22000 (from 24000), combat during Time Stop changes with all opponent units in combat have to resist at -7 or suffered Stasis, no normal overland damage recovery, and casting skill decay by 3% each turn (capped at not lower than 10%, will recovered once Time Stop is no longer maintained) while cast cost of spell increases by 1% for each spell cast during Time Stop. So now Time Stop becomes more combat-oriented and reduced number of things that could be done if maintaining the spell for too long and finishing Spell of Mastery during Time Stop is nigh impossible.

NEW: Cloud Elephant (cost -/550, 15 upkeep) – This spell could only be learned with Conjuring Pact and 8 Sorcery spell books.

NEW: AEther Mastery (reform, effect taken upon researched) – Increases enchantment dispel resistance, reduces casting cost of the spells, and buff creature of the Sorcery realm under wizard control. This reform is only available to Specialist retort holder with Sorcery as primary realm. Once this spell appears on research page, it will exclude chance to get mastery of other realm.

NEW: Lesser AEther Lord (cost -/777, 20 upkeep) – This spell could only be learned with Conjuring Pact and 10 Sorcery spell books.

NEW: Great AEther Lord (cost -/999, 30 upkeep) – This spell could only be learned with Conjuring Pact and 12 Sorcery spell books.

NEW: Power of Sorcery (cost 99/-) – This spell could only be learned by Enchanter wizard who already have access to Resist Magic, Guardian Wind, Flight, Focus Magic, Planewalking, Invisibility, Haste, and Magic Immunity. This spell would allow the Enchanter to cast all above unit enchantment all at once on single target!

NEW: Mystery of Sorcery (cost 150/-) – This spell could only be learned by Runemaster wizard who already have access to Blur, Counter Magic, Aether Surge, Temporal Twist, and Mass Invisibility. This spell would allow the Runemaster to cast all above combat enchantment all at once!

Chaos:

Chaos realm specializes in blitzkrieg tactics with mobile units that excel in offense and combat spells that quicken the pace of combat for earlier resolution. Combat spells are prominent and often focus on damaging individual units and armies.

Later in game, chaos is also aggressive against cities as well as terrain, sabotaging enemy economically on a global scale with caster wizard gaining benefits from such effects at the same time.

New spells further establish these realm characteristics.

Removed Chaos Spells

Flame Blade (becomes unit ability) – grants +3 melee, +2 physical range/thrown, and +1 fire breath (granting ability to hit flyers). This ability could no longer be countered by anything but Chaos Ward. This ability can only be cast by dwarf combat engineers.

Berserk (becomes unit ability) – completely new spell and not relate to original's Berserk. Target unit gains +15% To-Hit and +1 combat Movement but suffers -10% To-Defend. Could only be casted by Troll Medicinemen.

~~**Fate Mastery**~~ → **Dance of Death**. The spell felt misplaced in chaos realm and not worth keeping just to introduce a chaos+death combo. The spell is move to Death realm at rare tier.

~~**Warp Lightning**~~ → **Lightning Rage** (cost 30/-) – Warp Lightning is renamed to Lightning Rage and only available to the Warlock hero.

Chaos Common Spells

Hell Hounds (cost -/54, 1 upkeep) – Boosted to have 5 movement and slightly higher cost (from 40 to 48), it acts relatively similar to a barbarian cavalry unit – great for exploration and to reach the other side of the battlefield in 2 moves. This fits the theme of chaos being an aggressive magic realm and speed is an element that adds to its aggressive nature. The cost effectiveness brings back the original MoM starting game chaos hell hound spam strategies.

Animate Ammo (cost 5/-) – Research cost decreases to 280 (from 320).

Corruption (cost -/30) – Reduced cost by 10 given more options for units with purify ability and faster roads to move them where needed. Research cost also decreases to 240 (from 260).

Fire Bolt (cost 9/-) – Attack strength of Fire Bolt reduces from 24 to 12 but hit chance is doubled (from 30% to 60%). Spell's research cost is reduced to 280 (from 320). The spell's cost get lowered (from 10 to 9) to ensure chaos is best realm at direct damage.

Wall of Fire (cost 30/60, 1 upkeep) – Instead of 10-strength to all figures, it is 12-strength (60% hit chance) but not on all figure. It also grants +1 attack to all defending normal unit non-magic attacks, similar to original game's Metal Fires. Wall of fire now costs 30 to cast while in combat (from 20), has 1 upkeep (from previously 0), reduced in trade value, and its research cost is reduced to 280 (from 320).

Warp Creature (cost 10/-) – spell research cost is reduced to 320 (from 380) but trade value is increased as the spell get upgrade to be cursed by 3 types of warp creature effects at once once caster casted Doom Mastery.

~~**Shatter**~~ – Spell move to rare tier to allow room for the similar but more interesting 'Rust'

NEW Rust (cost 7/-) – common-tier combat unit curse. Resistance roll of -5 penalty. If successful:

- Unit with magic weapons or orihalcon lose those bonuses **permanently**, have regular weapons
- Unit loses 3 of its physical attack
- All thrown attack is eliminated until end of combat
- Large shield, if present, is eliminated until end of combat.

Rust is the only spell in the game that invalidates magic weapons altogether – the strategies around weapon immunity bring significant synergy with death.

~~Flame Blade~~ **Fiery Fury** (cost 10/50, 1 upkeep) – Now also grants +2 to all non-magic, non-elemental ranged attack types, and thrown, not just some ranged attack types. Also, if cast on a fantastic creature, it turns that creature into chaos (thus benefiting from chaos global effects) and gives first strike. Research cost of the spell is cheaper than Flame Blade (360 compared to Flame Blade's 480) and has a bit more trade value.

NEW Blaze of Glory (cost 20/-) – Combat only unit enchantment – shifts armor points to melee, ranged points also to melee, grants armor piercing, but enchanted unit loses first strike (if present). This is similar in spirit to the original game's berserk, but chaos tends to be the most 'reckless' realm, thus fitting here. It is one of the common-tier combat spells that is powerful throughout game (just like web)

Breakthrough (cost 9/-) – This new combat enchantment is made by Seravy as replacement of the most useless spell to be casted by wizard in game, Disrupt. The spell has multiple effect which is basically enchant melee attack, especially to combat summon and Non-Corporeal units, and grant all units Wall Crashing ability.

Chaos Uncommon Spells

Gargoyles (cost -/100, 1 upkeep) – The creature is more or less the same with research cost increases to 500 (from previously 420) and a little bit lower trade value.

Chaos Channels (cost -/50, 0 upkeep) – The spell is increased in trade value and research cost also increased to 700 (from 640). Fire breath version is now also stack with unit original fire breath. If caster has Doom Mastery, this spell will grants all three effects instead of just one.

Fire Elemental (cost 24/-, 2 upkeep) – Moved to uncommon, given immolation, higher hp, and changed its attack pattern to be entirely 'fire breath' oriented. The 'weapon immunity' early game design is now exclusive to death realm, while chaos is allowed to excel at the start with combat spells.

Immolation (cost 13/65, 2 upkeep) – Now costs 13/65 (from 12/60) due to considered as superior than Fireball, but trade value is decreased to 9 (from 10) and research cost is reduced to 1000 (from 1280) as opportunity to use the spell is lower.

Fire Giant (cost -/110, 3 upkeep) – Fireball spell removed, added +1 range and +1 ammo, +1 armor, +2hp, and large shield. Research cost is reduced to 1100 (from 1280) but trade value of the spell is increased to 20 (from 17).

Raise Volcano (cost -/50) – The spell is more or less the same but volcano is now more useful terrain with recent combo with Chaos' Blessing (+3 power) and Ice Age (+1 Max Population) as well as there are more use of mineral that caster could get from spawning volcano.

Fireball (cost 19/-) – Now strength is increased to 14 (from 12) but with cost increase. Needed more strength to justify its research cost that is also increased to 1280 (from 960).

Lightning Bolt (cost 24/-) – Now costs is decreased to 24 (from previously 25) so it could be accessed by ultra elite caster 20 units. Attack strength is changed to strength 18 at 60% To-Hit (from previously strength 36 at 30% To-Hit) to make damage more consistent and reliable. Research cost is also decreased to 1400 (from 1600).

NEW: Insulation (cost 16/80, 2 upkeep) – New uncommon unit enchantment that provides fire immunity, cold immunity, and lightning resistance. Situationally useful with an obvious combo with Inner Power, but fairly expensive and situational otherwise.

NEW: Corrosive Blast (cost 29/-) – A new uncommon damage dealer that ignores even magic immunity and is irrecoverable. This is a very niche spell when you face the need to damage a sky drake or magic immune hero via spells or really need to deal irrecoverable damage. Otherwise, stick to lightning bolt for better cost effectiveness.

Chimeras (cost -/180, 4 upkeep) – Now moves 4 and is mountaineer, feels more aggressive and threatening as a result and will likely be your staple summoning unit halfway through the game. Research cost is also decreased a bit to 2000 (from 2140).

Blazing March (cost 45/-) – Moved from rare to uncommon so that chaos can get a global combat effect like prayer and black prayer around the same time as those other 2 realms. The spell now also boosts thrown. Research cost is also reduced to 2200 to make it consistent with being Uncommon spell.

Chaos Rare Spells

Mystic Surge (cost 25/-) – Moved to rare from previously uncommon, removes the buggy 'healing immunity', and a bit more likely to grant positive effects, thus more powerful than in Caster of Magic. Research cost is increased to 2400 (from previously 1280) to be consistent with its current status as rare spell.

Fire Storm (cost -/180) – Its attack strength is increased to 14 (from previously 12) and research cost is decreased to 2600 (from 2800) but trade value is decreased.

Chaos Rift (cost -/200, 5 upkeep) – Attack strength from the enchantment reduced to 9 per strike (from previously 11). In addition to current effects, new recruits from cursed city has a 10% chance of permanently receiving 1 random warp creature effect (0 resistance, 1/3 armor, or ½ attack), effect is permanent and could not be dispelled.

Chaos Spawn (cost -/303, 8 upkeep) – Research cost is decreased to 3000 (from previously 3200) but upkeep cost is increased to 8 (from previously 5).

NEW: Chaos' Blessing (cost -/200, 5 upkeep) – Rare level city enchantment that grants chaos channels to recruited units and defending city has Warp Reality cast in combat. It has synergy with Doom Mastery (which has been moved to very rare tier). Chaos' Blessing also grants power to enchanted cities for each mountain (+1) and volcano (+3) tiles in the vicinity. Chaos' Blessing might give you an early advantage as not every city is a unit producing center at that point and if defending primarily with chaos units, warp reality gives you a very significant advantage.

Inner Power (cost -/600, 20 upkeep) – Now casting costs is increased significantly (from previously 390) and slightly increase of trade value due to obvious combo with insulation. Also grants mountaineer to friendly units in combat. Research cost is decreased to 3500 (from previously 3600).

NEW: Warp Lightning (cost 36/-) – Rare level combat spell that replacing old spell with same name that hardcoded could not change. Warp Lightning hits all figures in a target unit with strength 14 lightning damage, providing Chaos wizards and efreet and effective counter to multi-figure units.

Magic Vortex (cost 50/-) – I have struggled with idea of remove or replace this spell for very long time but in the end I decide to just reduced its trade value instead.

Doom Bolt (cost 45/-) – Research cost is reduced to 4000 (from previously 4800) and trade value is reduced slightly.

Doom Bat (cost -/300, 7 upkeep) – Now costs is reduced to 300 (from previously 320) and fiery immolation aura of the original Master of Magic is coming back as well.

NEW: Blood and Iron (cost -/600, 25 upkeep) – New rare level global enchantment, bring chaos supremacist war drum to your populace with cities of caster's home race or integrate to Chaos realm with Chaos's blessing gain +30% production while other cities that alienated by this suffer +3 Unrest (which could be convert to 6 power by Chaos Embrace below). The same for regular units, regular units of the home race or with chaos channel gains bonus while units that not fit racial criteria would suffer penalty instead.

NEW: Shatter (cost 20/-) – Rare level combat curse, Shatter has been revised to target any unit (not just normal units) and with resistance penalty of -5. What makes this spell stand out is casting it with your magisters and other caster units due to its low cost.

NEW: Beat of Swiftess (cost 55/-) – Rare level combat enchantment, all friendly units with melee>range gain +3 movement, the rest get +2 movement. As a penalty, friendly units lose 10% of their armor. This spell further enhances Chaos' strength at quick battle resolution and grants yet another offense advantage.

Efreet (cost -/333, 9 upkeep) – has caster 39 to prevent it from casting the new shatter twice.

Flame Strike (cost 60/-) – Damage scheming changes to strength 16 at 60% To-Hit on all units (from previously strength 32 at 30% To-Hit). Research cost is also decreased to 5200 (from 5600).

Disintegrate (cost 50/-) – Moved down from very rare to rare tier with research cost of 5500 and reduces trade value as this spell resistance threshold is not that justified to be very rare tier spell.

Warp Reality (cost 75/-) – Another spell that move down from very rare in Caster of Magic to rare tier in Warlord. This spell used to be rare tier in original Master of Magic. Lack of doom mastery in rare tier indirectly weakened this spell.

NEW: Incinerate (cost 55/-) – Hit target unit with strong fire attack (strength 18 Magical Fire attack at 60% To-Hit + strength 18 Non-Magical Fire attack at 60% To-Hit) and then hit surrounding with non-magical fire attack with half of the strength (18 Non-Magical Fire attack at 60% To-Hit) of at the center. More effective than Flame Strike when hit enemy that cower behind the wall or stay in tight formation.

NEW: Fire Drake (cost -/390, 10 upkeep) – This spell could only be learned with Conjuring Pact and 6 Chaos spell books.

Chaos Very Rare or Higher Spells

Doom Mastery (cost -/666, 18 upkeep) – Moved to **very rare** (Same as original Master of Magic) – grants all 3 effects if unit recruited in a city with 'chaos blessing' on them, or chaos channels cast on a hero, or new casting attempt of Chaos Channels. Doom Mastery is also boosting Warp Creature spell by trigger all 3 effects instead of just one. The stacking of chaos creature benefits got to be too excessive when considering other chaos spell changes, but you no longer can rely on using such a strategy in every game (unless you pick 10 chaos books)

Hydra (cost -/480, 11 upkeep) – The creature gains more characteristic of Greek mythology; thus it now could swim, breath changed to lightning breath, and high poison damage was also given. Unit also has lightning resistance, thus benefits from inner power global enchantment, and can be an excellent offensive creature when paired with the new 'Beat of Swiftess' spell. The research cost is reduced to 8000 (from previously 10000).

Chain Lightning (cost 65/-) – Attack power scheme changes to strength 20 at 60% To-Hit (from previously strength 40 at 30% To-Hit), Research cost is decreased to 10000 (from previously 20000) due to this spell is that far more superior than Incineration or Flame Strike to justified status as penultimate spell of research tree.

Chaos Surge (cost -/1000, 30 upkeep) – Given Doom Mastery, this spell is comparable to life realm's global spells and even stacks, thus had to be made less accessible with research cost is increased to 12000 (from previously 6000) to keep Chaos from being overpowered in large, crowded games.

Apocalypse (cost 65/-) – Research cost is decreased to 14000 (from previously 15000).

Great Drake (cost -/500, 15 upkeep) – The Great Drake is also given mountaineer, lightning resistance, immolation, and cause fear for consistency (to match doom drakes).

Doomsday (cost -/1000, 20 upkeep) – Although trade value of the spell is decreased slightly due to the spell does not deliver direct benefit toward the caster, the spell is more powerful with the effect of corruption that randomly decay terrain toward less productive land even after corruption has been purified.

NEW: Dissolution (cost 80/-) – This new combat spell is a guaranteed 9 armor-piercing irrecoverable damage (equivalent to 30 strength spell) per figure before shields. This spell's extraordinary power almost always wipes out massively enchanted multi-figure units, thus acting as a counter against mega-buffing strategies.

Call the Void (cost -/500) – The spell is the same as what it ever was in Caster of Magic for Windows. It might be slightly more powerful than previous version due to corruption's terrain decay effect.

~~**Blazing Eyes**~~ → **Chaos Embrace** (cost -/1300, 80 upkeep) – Blazing Eye is renamed to Chaos Embrace and given a far higher casting cost (from previously 900) and research cost is increased to 20000 (from previously 8000), thus reducing the chance of stacking global effects to chaos units (see chaos surge above). This new spell grants 2 power income for each of rebel population in caster's cities. At the same time, each of rebel in the city own by other wizards who not cast Chaos Embrace would deal 0.5 Doom damage to garrison of the city. This would make the caster thrive as the world burned.

Meteor Storm (cost -/990, 10 upkeep) – Casting cost and trad value are slightly increased. Spell now also has additional effect to give additional hit to the target when ever casting Fire Bolt, Fireball, or Fire Storm with Magical Fire attack strength 75% of the original preceeding attack.

Armageddon (cost -/1250, 40 upkeep) – Now is considered the highest Chaos spell by research cost, but it is slightly weaker than in Caster of Magic due to AI is more eager to disjunct it and damage to relationship with other wizards is much more severe.

NEW: Chaos Mastery (reform, effect taken upon researched) – Increases enchantment dispel resistance, reduces casting cost of the spells, and buff creature of the Chaos realm under wizard control. This reform is only available to Specialist retort holder with Chaos as primary realm. Once this spell appears on research page, it will exclude chance to get mastery of other realm.

NEW: Lesser Chaos Lord (cost -/777, 20 upkeep) – This spell could only be learned with Conjuring Pact and 10 Chaos spell books.

NEW: Great Chaos Lord (cost -/999, 30 upkeep) – This spell could only be learned with Conjuring Pact and 12 Chaos spell books.

NEW: Power of Chaos (cost 66/-) – This spell could only be learned by Enchanter wizard who already have access to Fiery Fury, Immolation, Insulation, and Chaos Channels. This spell would allow the Enchanter to cast all above unit enchantment all at once on single target!

NEW: Conduit of Chaos (cost 150/-) – This spell could only be learned by Runemaster wizard who already have access to Breakthrough, Blazing March, Beat of Swiftmess, and Warp Reality. This spell would allow the Runemaster to cast all above combat enchantment all at once!

Life:

Life realm specializes in stacking enchantments on your recruitable units to a level where they can easily defeat more advanced foes or defeat entire armies single-handedly unscathed. Careful management of unit enchantments on a turn-by-turn basis rewards the most detail-oriented players that can micromanage and keep track of these buffs.

Given that the Warlord mod intends to keep normal units relevant throughout all stages of the game, this often translates to unremarkable units being boosted individually to an unmatched level at the beginning or at the end of a game. The importance of these units is addressed by giving life wizards tools to preserve such units or their enchantments.

Cities can be viewed similarly in that they can individually perform far beyond other wizards with the help of city enchantment stacking.

New spells further establish these realm characteristics.

Removed Life Spells

Discipline (cost -/-) – No longer researchable, but become Life ability that could be cast by Centurion hero and can now also target heroes. The spell, stacked with herosim, broke the balance of very early game for wizards with life books, resulting in units too strong against lairs and wizards before dispel magic is researched. The enchantment is also granted to unit upon create if Enlightenment is casted (see below) and make the powerful discipline+heroism combos more difficult to achieve at the beginning of the game.

Zeal (cost -/-) – used to be castable in earlier version but now become Life ability that could be casted by Inquisitors unit and Grand Inquisitor hero, grants first strike and negate first strike to unit until rest of combat.

Resurrection (cost -/325) – shifted to arcane rare with 3200 research cost.

Life Common Spells

Star Fires (cost 12/-) – One of the more efficient direct damage spell in term of cost with no elemental properties but could only damage fantastic creature. Damage scheme is changed to strength 12 at 60% To-Hit (from previously strength 23 at 30% To-Hit). But as it is now much less efficient than Fire Bolt, trade value is decreased.

Guardian Spirit (cost -/60, 1 upkeep) – The creature has 1 less armor, but comes with healer, giving it a more supportive role. Trade value of the spell is increased.

Holy Weapon (cost 8/40, 0 upkeep) – Research cost is decreased slightly to 240 (from previously 260) and trade value is increased.

Bless (cost 7/35, 0 upkeep) – grants 4 resistance (-1 from original) and 7 armor (+2 from original) against chaos/death effects as well as all attack with fire or lightning element. Research cost is decreased to 240 (from previously 320).

Healing (cost 15/-) – Research cost is decreased to 280 (from 320).

Holy Armor (cost 10/50, 0 upkeep) – Research cost is decreased to 280 (from 320).

Heroism (cost 15/75, 1 upkeep) – Research cost is decreased to 280 (from 320).

NEW: True Light (cost 20/-) – Combat enchantment that grants +1 to all stats for life units, -1 to all stats for death/undead units. True light also weakens illusion attacks by -10% to hit. Warlord mod restores a spell from original Master of Magic, but has more synergy in mod thanks to uncommon spell sanctify. The minor extra effect against illusion helps keep realm balanced after the loss of a major spell.

Heavenly Light (cost -/60, 1 upkeep) – Research cost is decreased to 400 (from previously 440) and trade value is decreased significantly.

NEW: Spirit of Community (cost -/300, 9 upkeep) – Grants +4 production to all cities and doubles output growth ideal for boosting growth of new towns, but not overly effective on well-developed cities. One of the best spells to pick as 'starting common' for players that like to build up their empire peacefully. However, this spell can also help out when conquering towns that had their production-generating structures destroyed in battle.

Life Uncommon Spells

True Sight (cost 12/60, 1 upkeep) – Casting cost is now lower (from previously 15/75) and also grants +5% to range. Research cost is increased to 500 (from previously 420).

Exorcise (cost 18/-) – Casting cost is decreased (from previously 20/-) but research cost is increased to 700 (from previously 640).

Sanctify (cost -/60, 2 upkeep) – Spell gains additional effect with units also become life-realm non-fantastic units during combat, helping protect against normal-unit oriented death spells. If cast on a 'cleric' unit (e.g. priest), it turns unit into life fantastic creature during combat, grants +2 spellcasting skill per base resistance of unit. When combine this with Pillar of Faith, some of cleric units would able to cast powerful life spell such as Prayer.

Just Cause (cost -/300, 5 upkeep) – The spell moves up tier to Uncommon (from previously Common) spell and unrest reduction changes from -1 to -2. Spell gains additional effect of buffing hero and units within the same stack as hero in combat.

~~**Altar of Peace**~~ → **Altar of Duality** (cost -/100, 4 upkeep) – Grants either 12-32 research or 6-16 production depending on how positive (or negative) wizard relations are. The spell was considered too weak as a conditional 0-24 research spell that costs research to learn it and discouraged aggression, which is needed by life to stay competitive. By gaining production when relations are negative, you can build up troops and conquered towns with more ease.

Endurance (cost -/60, 2 upkeep) – Trade value is increased.

New: Divine Protection (cost 22/110, 1 upkeep) – New rare tier unit enchantment, giving a regular unit Lucky (+10% To-Hit, +10% To-Defend, +1 Resistance) and Death Immunity. This cheaper counterpart of Lionheart is based on Life realm item power of the same name. The spell cost is intentionally allow to be within castable range of elite Magisters or sanctified cleric with base Resistance higher than 10.

Stream of Life (cost -/120, 4 upkeep) – Research cost is increased to 1400 (from previously 1280).

Unicorn (cost -/190, 4 upkeep) – The creature is now coming with Purify, helping clean corrupted land. Unicorn also gains Forester.

Raise Dead (cost 40/-) – Research cost is decreased to 1800 (from previously 1920).

NEW: Hierophany (cost 23/-) – Combat curse with half resistance roll. If resistance roll unsuccessful, unit loses half armor, all immunities, lightning resistance, negate first strike, and all mobility-related perks.

Prayer (cost 40/-) – Now grants +1 attack, armor and resistance when stacked with high prayer (to hit and to defend do not stack). Research cost is increased to 2200 (from previously 2140).

NEW: Simurgh (cost -/140, 3 upkeep) – This spell could only be learned with Conjuring Pact and 4 Life spell books.

Life Rare Spells

Prosperity (cost -/120, 2 upkeep) – The spell is retained its characteristic from Caster of Magic for Windows.

NEW: Inquisition (cost -/200, 4 upkeep) – Life gets 1 city curse, but not a traditional one. Inquisition penalizes religious centers (for religious power beyond 6, each additional point reduces research by 3 and adds ½ unrest). This city curse causes a minimum of 2 unrest, but unrest penalty will exceed it if religious power of cursed city exceeds 10. Its high cost and effect on average towns disappoint, but with ideal targets it will eliminate all research, weaken Uranus blessing, and punish Ruler of Heaven, Dark Ritual, by causing considerable unrest.

NEW: Heart of Solidarity (cost -/500, 15 upkeep) – Global Enchantment that eliminates unrest penalty from racial relations and garrisons that are not full (morale treated as if full garrisons were in every town). It will help boost taxes without harming your conquered cities, which suffer from racial unrest and small garrisons. The spell is game changing when playing with or conquering klackons or goblins.

Exaltation (cost 25/-) – casting cost is decreased (from previously 30) while retained its healing effect. Research cost is increased to 3000 (from previously 2800).

NEW: Angelic Guardians (cost -/500, 35 upkeep) – Global enchantment that in combat, it gives all normal units under your command the ability to exorcise at -0, all life and sanctified units under your command the ability to exorcise at -1, and if the unit already has exorcise ability, it gains added -2 strength (normal units) or added -3 strength (life unit). Note that undead units suffer -3 extra penalty, making this global enchantment extremely dangerous for death wizards!

Mass Healing (cost 35/-) – Research cost is decreased to 3500 (from previously 4000).

Divine Order (cost -/600, 30 upkeep) – Originally underwhelming with the chance of backfiring in you. Cost penalties of +25% for attack spells, unit and city curses apply only to enemy wizards. 25% cost bonuses apply to buffs and healing spells. Additional 10% cost bonuses and penalties apply to global spells while summons cost 10% more. All cost increases affect opponents only so it would only limit opponent but caster still retain option to continue their preferred strategy. Two additional small effects also introduced: +1unrest penalty and half power income from magic markets to wizards with fewer life books than non-life books (+2 unrest and no magic market bonus if wizard has no life books at all!). Due to spell becomes more powerful, trade value of this spell is increased significantly.

Angel (cost -/310, 8 upkeep) – Spell and creature is more or less the same as it was in Caster of Magic for Windows. The only difference is now summon artwork is more beautiful.

Invulnerability (cost 30/150, 5 upkeep) – The spell is the same as it was in Caster of Magic for Windows.

Lionheart (cost 36/180, 3 upkeep) – The spell is the same as it was in Caster of Magic for Windows.

NEW: Pillar of Faith (cost -/180, 5 upkeep) – City buff that gives 20% of granting lucky to recruited units and +1 to +8 Resistance depending on how many religious buildings you have in it. This allows wizard an opportunity to gain a lucky unit to cast common tier buffs and addresses the loss of permanent discipline early in game. It also generates 0.5 overland casting skill for each unrest reduction generates by religious buildings.

Altar of Battle (cost -/275, 5 upkeep) – Casting cost is decreased (from previously 300) and research cost is decreased to 3800 (from previously 4400).

Inspirations (cost -/150, 4 upkeep) – Research cost is increased to 4600 (from 3200).

NEW: Valkyries (cost -/370, 9 upkeep) – A flying teleporting support unit with +2 resist to all, 2 charges of exaltation, flying teleporting, and decent melee stats. A similar role as unicorn, but far superior.

Holy Word (cost 60/-) – Research cost is increased to 5200 (from previously 4800).

Incarnation (cost -/700, 15 upkeep) – Research cost is increased to 5500 (from previously 5200) and upkeep is increased to 15 (from previously 12). The hero is no longer the “Chosen”, but now the “Avatar”.

Holy Arms (cost -/600, 10 upkeep) – Reserch cost is increased to 5800 (from previously 5600). The spell was used to be Very Rare in original Master of Magic and Caster of Magic for DOS. The spell is moved down to rare tier since Caster of Magic for Windows and this continues in Warlord mod.

New: Eye of Heaven (cost 60/-) – new rare tier Life realm combat enchantment, grants all friendly units True Sight. The spell used to be only castable by Life creatures but now transfer to be castable by wizard instead.

Life Very Rare or Higher Spells

Consecration (cost -/200, 2 upkeep) – Enchanted city now produces bless to newly recruited units (only if cathedral or temple exists in city). Research cost is increased to 8000 (from previously 6000)

Enlightenment (cost -/900, 50 upkeep) – the research bonus is reduced by half. However, newly produced units now come with 'discipline'. This can be very useful when you have 'altar of battle' or 'crusade + warlord'. Upkeep was increased to 50 to compensate for this powerful new effect, despite the halved research effect.

Phoenix (cost -/450, 12 upkeep) – this underwhelming creature was given some fire breath, immolation and slightly higher defense stats. Research cost is decreased to 10000 (from previously 12000).

Destiny → **Apotheosis** (cost -/360, 10 upkeep) – Casting cost is decreased (from previously 400), and could removes no-healing status from an undead unit. Trade value of the spell is increased slightly while research cost is decreased to 12000 (from previously 15000).

Ruler of Heaven (cost -/1000, 25 upkeep) – Now adds 50 combat skill points for every religious power in your cities, thus fully developed religious centers may gain about half of the effect of 'linking Towers' thanks to this spell. Research cost is increased to 14000 (from previously 12000).

High Prayer (cost 70/-) – Now High Prayer's and Prayer's could stack but not at full effect (as discussed earlier).

Life Force (cost -/900, 40 upkeep) – The spell is retained its characteristic from Caster of Magic for Windows.

Supreme Light (cost 70/-) – Research cost is decreased to 16000 (from previously 18000).

Call to Arms → **Spirit of Chivalry** (cost 80/-) – It didn't feel 'awesome' for a very rare spell to summon an already-existing normal unit. What this spell summons is a hero-like life unit with supportive effects and paladin-like stats, albeit as a single-figure unit. It is overall superior to a 0-experience paladin, thus comes with a higher cost (from previously 70). However, do not expect it to single-highhandedly win battles late in the game. It remains a spell that boosts surrounding units and can be used as desperation if what you need is an additional melee unit in play. Research cost is increased to 18000 (from previously 15000).

Crusade (cost -/1200, 20 upkeep) – Cities with armorer's guild + cathedral/temple grant holy armor to newly produced unit. All those building requirements must be met for this added effect, so only some races can benefit and only if you dedicate the time to construct these buildings. This can help reduce spell buff micromanagement by providing holy armor to some units.

Arch Angel (cost -/600, 18 upkeep) – Now Arch Angel can cast hierophany in addition to caster 29, mostly for flavor.

Charm of Life (cost -/1500, 30 upkeep) – Research cost is decreased to 22000 (from previously 24000).

NEW: Life Mastery (reform, effect taken upon researched) – Increases enchantment dispel resistance, reduces casting cost of the spells, and buff creature of the Life realm under wizard control. This reform is only available to Specialist retort holder with Life as primary realm. Once this spell appears on research page, it will exclude chance to get mastery of other realm.

NEW: Seraph (cost -/999, 30 upkeep) – This spell could only be learned with Conjuring Pact and 12 Life spell books.

NEW: Power of Life (cost 55/-) – This spell could only be learned by Enchanter wizard who already have access to Bless, Heroism, Holy Armor, Holy Weapon, Endurance, Divine Protection, True Sight, Lionheart, and Invulnerability. This spell would allow the Enchanter to cast all above unit enchantment all at once on single target!

NEW: Day of Life (cost 150/-) – This spell could only be learned by Runemaster wizard who already have access to True Light, Eye of Heaven, Prayer, High Prayer, and Supreme Light. This spell would allow the Runemaster to cast all above combat enchantment all at once!

Death:

A heavily adjusted realm, given its underwhelming performance by players and opponent wizards.

More opportunities for raising undead were introduced throughout all stages of the game. Reliance on plentiful and cheap undead armies, best amassed by defensive and calculating players, is a feature of Death. This helps overwhelm the enemy with sheer numbers while building up your city garrison unit counts across the world at little to no cost. Alongside your large armies of arguably weaker units you have various curse and debuff tools at your disposal. Death gameplay is the opposite of life gameplay: it relies on weakening the enemy to win the game, rather than strengthening itself. This theme applies to units, cities, and wizards themselves.

Death realm no longer associated with poison damage.

Note: Cult Leader now grants +100% power bonus from religious buildings, but dark rituals redesigned and stacks less significantly.

Removed Death Spells

Final Wave – Now resistance roll of -1 (from 0), due to more opportunities to raise resistance in Warlord mod, and top tier units innately having higher resistance.

Death Common Spells

Skeletons (cost -/25, 0 upkeep) – There is no change in spell and creature itself but ai has more incentive to cast the spell.

Weakness (cost 8/-) – Casting cost is increased (from previously 7) and now the curse has no resistance roll. The curse also has additional reduction of breath strength. This is now one of Death's staple common-tier curse spells and worth picking as a starting common.

Cloak of Fear (cost 12/60, 1 upkeep) – Trade value is increased slightly while research cost is decreased to 240 (from 260).

Black Sleep (cost 15/-) – Trade value is decreased significantly due to it is only useful early and mid game. Research cost is decreased to 240 (from previously 320).

Zombies (cost 24/-, 0 upkeep) – Received a 'resident evil update', now move 2 and have 5 base attack. These are now a more reliable tool for raising undead (including with zombie mastery). These are also a higher threat as rampaging monsters and lair defenders (their value increased). Casting cost is increased to 24 (from previously 20) and research cost is decreased to 280 (from previously 320).

Life Drain (cost 10/-) – Research cost is decreased to 280 (from previously 320).

Ghouls (cost -/80, 1 upkeep) – Casting of the spell is lower (from previously 88). The unit get overhaul with +10% to hit, but without poison. Death no longer involved in poison damage. Research cost is reduced to 320 (from previously 380).

Darkness (cost 20/-) – The spell is not changed from Caster of Magic for Windows.

Wraith Form (cost 11/55, 2 upkeep) – unchanged but weapon immunity now grants +10 armor and wraithform is the only common-tier source of weapon immunity (fire elemental buffed and moved to uncommon-tier). Research cost is decreased to 360 (from previously 440).

~~**Misfortune**~~ → **Liability** (cost 13/-) – Research cost is decreased to 400 (from previously 480).

Death Uncommon Spells

Blood Lust → **Bloodlust** (cost 21/63, 0 upkeep) – Research is decreased to 500 (from previously 640) and trade value is decreased. The spell is no longer grants the various immunities and enchanted units can heal naturally (if enchanted overland). Blood Lust can be cast in combat for 21 cost. This is a great benefit for mono-death wizards who lack tools to defeat blessed units and now you no longer have to deal with the consequences of enchanted unit becoming undead. If cast on an appropriate melee unit next to a hero or other valuable normal unit, it can turn the tide of battle.

Lycanthropy (cost -/95, 2 upkeep) – Werewolves gains Forester, +1 resistance, and Rage ability (+1 Attack strength for each fallen figure in the unit), and cost 10 less (95 mana). Trade value of the spell is decreased but research cost is increased to 700 (from previously 420). The cost of sacrificing a unit (spearmen more expensive in mod), the higher research cost (700 from 420) led to lycanthropy being a disappointing spell. With small bonuses and a lower cost, it should stay competitive.

Night Stalker (cost -/225, 1 upkeep) – Now the creature has stealth, because it is already invisible. Research cost is decreased to 900 (from previously 1920).

Mana Leak (cost 20/-) – Research cost is decreased to 1000 (from previously 1280).

Syphon Life (cost 30/-) – Research cost is decreased to 1100 (from previously 1280).

New: Shadow Strike (cost 18/90, 2 upkeep) – This death uncommon unit enchantment, grant unit thrown attack at strength 1/3 of melee strength. If thrown already a unit trait, then gain 1/3 of melee strength as additional thrown damage. Ability to hit flyers is not a death realm trait, but this spell grants an opportunity to do so for your ground military. While this all sounds underwhelming for the cost, please note that thrown is an additional attack, therefore abilities like poison or life steal get to trigger twice while attacking!

Warp Node (cost -/120) – moved to uncommon-tier to grant death realm an economy boost spell in early to mid game that is not overly powerful, but can harm opponents as a bonus. Trade value and research cost are decreased to proportional to its current uncommon status.

Possession (cost 35/-) – Research cost is increased to 1400 (from previously 1280).

Black Prayer (cost 35/-) – Trade value is decreased significantly.

Wall of Darkness (cost 30/90, 1 upkeep) – Research cost is increased to 1800 (from previously 960) and trade value is increased slightly.

Shadow Demons (cost -/175, 4 upkeep) – Research cost is decreased to 2000 (from previously 2140) and trade value is decreased.

New: Revenant (cost 25/-) – New death uncommon combat unit enchantment, grant unit melee death touch 0 and regeneration 1 but unit permanently becomes undead. Note that death touch triggers once per attacking figure, becoming devastating when using multi-figure melee units against lower resistance units. Death touch does not apply to ranged attacks. This spell is also useful for preserving units you expect to die in combat while enjoying the benefits of undead (added immunities, synergy with darkness).

NEW: Werewolves (cost 30/-, 2 upkeep) – Different from Lycanthropy, this spell is combat summon version. This spell could only be learned with Conjuring Pact and 4 Death spell books.

Death Rare Spells

Drain Power (cost -/100) – Trade value is increased slightly.

Reaper Slash (cost 44/-) – The spell is now on rare-tier. The spell is damaging with cold undead-raising damage, rather than poison. Strength increased to 22 (60% hit chance). Death no longer associated with poison damage. Trade value is increased slightly and research cost adjusted to 2600 (from previously 1280) as it is now rare tier spell.

Evil Presence (cost -/200, 3 upkeep) – Casting cost is increased (from previously 180) and trade value is significantly increased. The spell does not only prevent units from being recruited with experience or magic weapons, but now also prevents positive recruitment effects introduced by warlord mod, such as effects from Survival Instinct, free disciplines/resist elements, doom mastery, etc

Drought (cost -/200, 3 upkeep) – Casting cost is increased (from previously 150) as now the spell also reduces city food production by 25% and newly recruited units, malnourished, are debuffed with 1 less melee and 2 less armor. Trade value is decreased slightly and research cost is decreased to 3000 (from previously 3200).

Wraiths (cost -/250, 5 upkeep) – Casting cost is cheaper (from previously 350) and research cost decreased significantly to 3200 (from previously 4800). But this comes with weaker stats, particularly in the melee compartment. This may increase the chances (with black prayer) to raising undead. Earlier versions of mod has guaranteed raise undead, but the ability was instead given to Vampire (more thematic). Trade value is decreased slightly as result.

Dark Rituals (cost -/150, 0 upkeep) – Now grants 8 base power + 100% of religious power (instead of 0 +200% religious power) due to major stacking imbalances around other mod changes. Research cost is decreased to 3500 (from previously 4000).

Terror (cost 40/-) – Research cost is decreased to 3800 (from 4000).

~~**Fate Mastery**~~ → **Dance of Death** (cost -/444, 17 upkeep) – The spell is moved from Chaos realm to Death realm due to it fits better under death, can help boost some of the curse combat spells. Moved to rare tier for better progression on resistance-reducing effects. Research cost is increased to 4000 to match its current status as rare tier spell. Trade value is also increased significantly due to how important the spell is for Death realm playstyle.

NEW: State of Rot (cost -/600, 30 upkeep) – New global enchantment, all enemy non-undead units in combat lose regeneration, cannot heal in combat. Additionally, your undead units outside of combat heal by 3hp per turn.

Gate of Hades (cost 40/-) – The spell does not change from Caster of Magic for Windows.

NEW: Arch Liches (cost -/360, 8 upkeep) – New Death rare tier summon creature. These dark priests of the Death are combination of priest, magisters, and ghouls with ability to cast death realm spells, grant Resistance for all, deal long range attack with life steal, and summon a lot of zombie to aid the combat. This creature is a great aid to death realm that overall suffer from low resistance.

~~**Vampire**~~ → **Vampire Lord** (cost -/395, 10 upkeep) – Slightly name change to make them classier and match with another newly added spell in term of theme. The creature now has Lower hp, regeneration, and melee output. However, it now has higher resistance and comes with a free charge of syphon life to assist with self-healing and undead creation and the vampire is guaranteed to raise undead via melee damage. Trade value is increased to match its new additional role as main undead creator and research cost is decreased to 4300 (from previously 4400).

NEW: Soul Flay (cost 45/-) – Combat irresistible curse to normal units or heroes that reduces 1 melee, 2 armor and 2 resistance for each experience level (-2 recruit, -8 elite for armor and resistance). This spell can be devastating for heroes that leveled up 5+ times and ultra-elite or champion units, most commonly seen from life wizards. This spell now establishes itself as the ultimate anti-hero tool, taking the place of 'crack's call'

Wave of Despair (cost 72/-) – Trade value is decreased significantly and research cost is decreased to 4900

New: Vampirism (cost -/100, 3 upkeep) – New Death very rare overland unit enchantment, normal unit becomes undead, cannot gain experience (but heroism still able to buff them), creates undead, gains bloodsucker, and has all thrown/breath transferred to melee and reduced thrown/breath strength to 1 (so it still able to attack air). Note that enchanted unit cannot gain experience so keep this drawback in mind when casting this spell on heroes. The thrown/breath shift to melee was done to reduce abusable double-triggering of blood sucker.

Summon Demon (cost 50/150, 3 upkeep) – A slightly name changes and move down the spell from very rare to now a rare-tier spell. Casting cost is increased to 50 (from previously 41) to prevent positive return of casting skill by summoning them in combat. Demon also comes with slightly increased stats and the ability to raise undead via melee damage. It is also a more expensive spell. It is difficult for it to win battles with mediocre melee stats, thus proven not to be game breaking. The most reliable raise-undead feature from the original unit (caster 40, thus 4 life drains or syphon life) remains. This is also an indirect enhancement to Demon Lord. Research cost is decreased to 5500 (from previously 6000) but research priority is significantly higher.

Zombie mastery (cost -/800, 40 upkeep) – This global enchantment (now more costly to maintain) grants +1 to stats, including movement, to zombies and undead units to further enhance your undead-raising gameplay. Research cost is increased to 5800 (from previously 5600) and trade value is increased significantly as result.

NEW: Necropolis (cost -/200, 4 upkeep) – New rare tier economic-oriented city enchantment for Death realm, turn city of the livings into city of the deads binding to the wizard's will. Population units no longer affect by Unrest and no longer Growth or Shrinkage normally. All newly trained units from the city become Undead. In combat, Necropolis is protected by Gate of Hades combat enchantment.

NEW: Ghost Ship (cost -/220, 4 upkeep) – This spell could only be learned with Conjuring Pact and 6 Death spell books.

Death Very Rare or Higher Spells

Animate Dead (cost 50/-) – Research cost is decreased significantly to 8000 (from previously 15000).

Ruler of Underworld (cost -/1300, 50 upkeep) – Research cost is decreased to 8000 (from previously 10000). The spell now grants +4 religious power for each oracle in play (consults the dead), helping pay upkeep and allowing minor combos with cult leader and ruler of heaven. Additionally, mod mechanics make it more usable (weapon immunity boosted to +10 effect, more relevance of top-tier melee normal units)

Cloud of Shadow (cost -/250, 5 upkeep) – The spell is move up tier to very rare from previously rare tier. Its trade value increased significantly along with casting costs increased (from previously 200). Research cost and trade value increased significantly to match up with its current status as very rare spell.

Death Knights (cost -/420, 8 upkeep) – The creature get 1 spell charge of Cloak of Fear. Trade value is slightly decreased.

Massacre (cost 60/-) – Research cost is decreased to 14000 (from previously 15000).

Annihilate (cost 41/-) – The spell has not changed from Caster of Magic for Windows.

Pestilence (cost -/250, 5 upkeep) – The city enchantment was powerful in theory, but difficult to properly use, invalidating the claim that it 'wins the game'. The population killing rate of this spell has been increased substantially, making it the ultimate economy-killing spell in the game. The spell has also gain new use as combat debuff as garrison would suffer plague debuff in combat. Research cost increase (from 8000 to 15000) was necessary to delay its introduction and require significant investments given the impact it has on the game.

Darkest Hour (cost -/1200, 40 upkeep) – the underwhelming global enchantment now comes with 3 unrest to all opponent cities (and can stack with +2 when multiple versions in play), adding to the negative economy impact. Wizard who casts darkest hour is immune to other wizards' darkest hour unrest effect. Research cost is increased to 16000 (from previously 15000).

Eternal Night (cost -/1000, 24 upkeep) – In addition to the original effects, now makes all enemy non-death units lose 2 range (poor sight) during combat as long as spell is in effect. Trade value and casting cost are increased (from 800) as result.

Death Reckoning (cost -/1000, 30 upkeep) –

Evil Omens (cost -/1250, 25 upkeep) – now second or later copies give additional 25% casting cost and effect could be prevented by own a copy of Evil Omens.

Demon Lord (cost -/666, 18 upkeep) – Research cost is decreased to 22000 (from previously 24000).

NEW: Death Mastery (reform, effect taken upon researched) – Increases enchantment dispel resistance, reduces casting cost of the spells, and buff creature of the Death realm under wizard control. This reform is only available to Specialist retort holder with Death as primary realm. Once this spell appears on research page, it will exclude chance to get mastery of other realm.

NEW: Arch Demon Lord (cost -/999, 30 upkeep) – This spell could only be learned with Conjuring Pact and 12 Death spell books.

NEW: Power of Death (cost 88/-) – This spell could only be learned by Enchanter wizard who already have access to Cloak of Fear, Wraith Form, Bloodlust, Shadow Strike, Revenant, and Vampirism. This spell would allow the Enchanter to cast all above unit enchantment all at once on single target!

NEW: Night of Death (cost 150/-) – This spell could only be learned by Runemaster wizard who already have access to Darkness, Mana Leak, Black Prayer, Terror, and Gate of Hades. This spell would allow the Runemaster to cast all above combat enchantment all at once!

Other Gameplay Changes

Overland global spells cost more in games with higher # of opponents and larger land size than average. Overland spells that are individual-based or localized cost slightly less in games with higher # of opponents and larger land size.

Spell text now includes pictures that represents such spells.

Road and city tiles cost 0.5 movement point, but are more difficult to build.

AI wizards have altered decision-making, particularly when it comes to rush-buying buildings. They are now discouraged (rather than strongly encouraged) to rush-buy wizard guild, amplifying tower, linking tower.

Combat terrain in forest and nature node has 55% rough terrain (from 95% and 35%, respectively) while mountain and chaos node has 35% of rough terrain (from 8%).

Weapon immunity now grants +10 armor against non-magic weapons.

- First turn one could obtain 'rare' or 'very rare' spell in treasure much earlier.

It is more common to earn gold and mana rewards from lairs and less common to earn weak artifacts.

Advanced rewards such as high-tier spells, picks, vials, and hero prisoners require a higher minimum reward threshold, but only consumes a portion of this minimum, allowing space for other rewards (e.g. gold, mana, items)

Neutral-only unit additions, such as the return of manticores, storm giants, sprites and a new 'ghost ship'. Manticores no longer have weapon immunity.

Unit mercenaries can be hired as early as turn 18 (from 30), helping out wizards with benefactor (aka. famous) and charismatic retorts. Items and heroes still show up no earlier than turn 30.

Aether Flux cost reduction effect weakened from 50% reduction to 33% reduction.

Good/Bad Moon religion power effect weakened, from -50% and +100% effects to -33% and +50% effects.

Rampage-only Lord Units

Lesser Chaos/Gaia/Aether Lords will begin showing up as rampaging monsters if game goes for too long. - Lesser Lords are boss-type monsters that combine many traits of their respective realms and can single-handedly defeat unprepared armies – these show up around final Spell of Mastery stage of the game.

-The greater lords (and a Seraph and an Arch Demon Lord) show up even later with greater stats, spellcasting abilities and realm traits.

Experience Level Bonuses

+1 mp for each level of experience

Ultra Elite: +5% to hit, +1 attack, +1thrown/breath +1 armor, +1mp
(from the underwhelming +1 attack, +1 armor)

Champion: +5% to hit, +1 attack, +2 armor, +1 resistance, +1mp
(more balanced set of boosts instead of just +10% to hit, +1hp)

Endgame

Although the mod has no set time limit about how long game would drag long but there are a few factors that would limit how long you could keep playing in single playthrough.

1) Rampaging Monsters

Rampaging monster will become more and more powerful as game continue and at some point monster would become too powerful to deal with any place and anywhere. This could be lessen by clear out monster lairs that kept spawning monsters but presence of Nature Embrace make the stream of monsters go on. If your wizard does not have Nature Embrace, those monsters would overwhelm you at some point of the game as Lords class monsters coming along with monster rampaging stack. In advanced difficulty, this could occur around year 1525 (turn 300 onward) and this could occur in year 1513 (turn 150 onward) in highest difficulty like Phantasm.

No.	Total Budget	multiplier	start (1502/4)	year 1505	year 1510	year 1515	year 1520	year 1525	year 1530

2) Spell of Mastery

Spell of Mastery is equivalent to scientific victory of other Civilization clone game. It is ultimate goal of every wizards and all wizards who already have this spell would cast it sooner or later. Once the Spell of Mastery coming into play, game reach its last phase once any wizard finished this spell, the game end with that wizard's victory and could not continue any further.

New Game+

There are many options to play and deal with more difficult challenge in Warlord mod as scoring options add over Caster of Magic included.

- 1) **Desolated Outpost:** Outpost growth of each races are depending on their favorable/unfavorable terrains surrounding the outpost. This condition is more punishing for player especially in higher difficulty due to AI have outpost growth bonus increases for each difficulty.
- 2) **Gods Play Dices:** At the start of combat, each unit rolls for resistance penalties between -2 and +2
- 3) **Unstoppable Stampede:** In combat, all neutral Fantastic creatures gain Regeneration 0.
- 4) **Nodeborne Souls:** All nodes have combat enchantment attached to them. Nodes also grant Common or Uncommon unit enchantments from the same realm as the node to all defending neutral creatures.
- 5) **Cosmic Chessboard:** Any combat involving neutral Life or Death Fantastic creatures will trigger intervention from gods of their side, granting common or uncommon combat enchantments and unit enchantments to support their minions.
- 6) **Uphill Battle:** Whenever AI units are in combat against the human player, those units gain +10% To-Hit, +10% To-Defend, and +1 Resistance.
- 7) **Khan the Conqueror:** Neutral units will fight as if their commander has the Warlord and Tactician retorts.
- 8) **You Too, Adamantium:** All opponent wizards start with access to adamantium ore and free Alchemist's Guild in their starting city.
- 9) **You Too, Orihalcon:** All opponent wizards start with access to orihalcon ore and free Alchemist's Guild in their starting city.
- 10) **Demon King's Castle:** Opponent wizard have extravagant fortress as if they are final boss in JRPG. All opponent wizards start the game with City Wall, Hillfort, Fortification, Baray, Undercity Hive Network, and Tree of Life in the fortress. Although all of these buildings are destructable, these buildings would be built along with new fortress every time those opponents cast Spell of Return! The tile beneath the fortress of opponent will convert into volcano unless the tile is a river. Opponent fortress would receive upkeep refund from these buildings as long as it last.
- 11) **No Secret in Mastery:** Disable Spell of Mastery victory condition as no one will have it.
- 12) **Among Us...:** There is chance that some master wizards are mysterious outlandish identities with strange tricks. At least one AI wizard is designated as an outlander with following characteristic.
 - Starts with no book and no magic spell but retained all picked retorts and spells gain from retort.
 - Starts with Tree of Knowledge has already been researched.
 - Start with 1 Overland Casting Skill and 0 Combat Casting Skill. Base casting skill is only available after gains a spell book and grows at half rate of normal.
 - Gains access to researchable exclusive to the outlander.
 - Requires 4 Magic Books to able to research Spell of Mastery.
- 13) **The Lord of the Magics:** One of your opponents is ancient tyrant lord of magics who has already casted Spell of Mastery once and earned mastery over all magic spells. Only things that prevent this Dark Lord from instant victory are facts that their power weaken and casting skill gone rusty from slumber for too long, they yet to gathered followers and build up power base after all their properties scattered throughout the planes, and they need long preparation to cast Spell of Mastery again to assert absolute dominance in this era!

Change Logs:

Version 1.5.12.6

Important:

- New Scoring option: No Secret in Mastery, removed Spell of Mastery from Gameplay and no wizard would able to researched this spell.
- New Scoring option: Desolated Outpost, terrain which outpost build upon and area surrounding it has strong influence on survival and growth of the outpost. Each races have different favorable terrain which usually based on their unique building requirements and their generic lore.
- New Scoring option: Accelerated Race, remove turn number requirement from Rare and Very Rare spell rewards.
- New Scoring option: Wizard of Oz, the human player wizard starts the game as outlander with no magic and spell books (only retort retained) except Tree of Knowledge has already researched. What the wizard get in compensate is unique technology research and application.
- New Scoring option: Among Us...., at least one AI opponent is an outlander technologist. You could considered this wizard as boss level threat. They are the strongest opponent if you left them for too long.
- New Scoring option: Return of the Master, human player wizard starts with all spells in spell book have already researched except special spells from retort, outlander technologies, and Spell of Mastery.
- New Scoring option: The Lord of the Magics, one of the AI opponent start with 4 spellbooks in each realm and all magic spells (include realm magic spell that lock behind retort) have already researched except Spell of Mastery, and special reform and arcane spells from retort, as well as outlander's technologies. This opponent is also boss level material due to their fortress is usually guarded with Lord/forbidden level fantastic creatures.
- Now Scoring option: Book Collectors will also give spells apart from books in loser's collection in similar manner to gains magic book from lair with some minor difference. The winner will roll for spell from the list available on loser's pool first. If spell that taken have not yet researched or already appear on research page, the loser will permanently lose that spell. If not enough available spell to fill the quota, winner will gain spell for the rest of quota at random.
- Now Scoring option: Everything Nice will now also excluded new addition spells in Warlord mod. But if get excluded spells as reward from lair will have this spell removed immediately and get no compensation for losing spell this way.
- Now any wizard who loses all their magic books will lose access to personal casting skill (base casting skill = 0). There is some exception on overland casting skill, it will never fall down below 1 (or game would crash when access magic casting menu).
- Due to some players complain that difficulty of this mod is too low and bonus AI receive could not keep up with difficulty scoring options add to the mod, the Difficulty of the mod above Advanced level have been adjusted. AI on Phantasmal level will receive bonus as much as Phantasmal level in CoM for Windows and the difficulty on Expert, Master, and Lunatic are scale down from this proportionally between Advanced and Phantasmal level.

Spell:

- BUG FIX: Research page crash after script try to forcing scripted spells on front page ready for research.
- BUG FIX: Hierophany spell never fail to curse the target.
- BUG FIX: Repeat display of Resist Element, Resist Magic, and Elemental Armor enchantment perk.
- BUG FIX: Game crash due to AI or human player summon Marionette after already have 6 heroes.
- BUG FIX: Counter Magic from Magic Perimeter is not functional.
- BUG FIX: Warp Creature curses does not given penalty exact to its description.
- BUG FIX: Warp Lightning does not attack with strength 14.
- BUG FIX: Rally is in wrong category of spellbook.
- BUG FIX: Whispering Echo is in wrong category of spellbook.
- Tactical Drill is no longer given Life magic aura on enchanted unit.
- Conjuring Pact is now given spell as researched after combat if requirement is met.
- Magic spells which only learnable by Runemaster retort holder (Force of Nature, Mystery of Sorcery, Conduit of Chaos, Day of Life, and Night of Death) now will be learned automatically once all required spells researched to prevent game crash.
- Magic spell which only learnable by Enchanter retort holder (Power of Nature, Power of Sorcery, Power of Chaos, Power of Life, and Power of Death) now will be learned automatically once all required spells researched to prevent game crash.

- Power Link is now given 3 Overland Casting Skill per Amplifying Tower owned by opponents instead of 2. City enchantment is now also generating 10 powers instead of 5.
- Lucky Star is now become Rare tier spell with casting cost increased from 15 to 35 and additional effect of make all friendly unit get +1 Attack/Armor/Resistance as long as Lucky Star still exist in combat, multiple copies do not accumulate.
- Lord Liberator is now on Uncommon tier and effect also included offensive siege combat on any race that under the rule of the Guardian wizard.
- Casting cost of Power of Nature reduces from 105 to 77.
- Casting cost of Power of Sorcery reduces from 160 to 99.
- Casting cost of Power of Chaos reduces from 90 to 66.
- Casting cost of Power of Life reduces from 120 to 55.
- Casting cost of Power of Death reduces from 150 to 88.
- Add new researchable technology: Crop Rotation.

- Colossus gains Sapiens perk.
- Gorgons gain Sapiens perk.
- Nagas gain Sapiens perk.

- Cloud Giant gains Sapiens perk.
- Storm Giant gains Sapiens perk.
- Djinn gains Sapiens perk.
- Gargoyles gain Sapiens perk.
- Fire Giant gains Sapiens perk.
- Efreet gains Sapiens perk.
- Valkyries gain Sapiens perk.
- Angel gains Sapiens perk.
- Arch Angel gains Sapiens perk.
- Ethereal Knight gains Sapiens perk.
- Seraph gains Sapiens perk.
- Zombie gains Sapiens perk.
- Skeletons gain Sapiens perk.
- Ghouls gain Sapiens perk.
- Night Stalker gains Sapiens perk.
- Werewolves gain Sapiens perk.
- Demon gains Sapiens perk.
- Wraiths gain Sapiens perk.
- Vampire Lord gains Sapiens perk.
- Arch Liches gains Sapiens perk.
- Ghost Ship gains Sapiens perk.
- Death Knights gain Sapiens perk.
- Demon Lord gains Sapiens perk.
- Arch Demon Lord gains Sapiens perk.
- Clockwork Tinmen gain Sapiens perk.
- Clockwork Tinmen gain Illusion Immunity, Death Immunity, and Poison Immunity.
- New projectile type: Beam energy, count as Magic Range Attack but deal Doom damage.
- Item power True Sight is now giving +5% Range To-Hit.
- Emergency Repair now ignore irrecoverable damage.
- Midget Submarines are now losing sailing once gain Non-Corporeal or Wraith Form.
- The Wanderer hero of Sorcery wizard without conjurer retort will now gains Psionic Blast instead of Invisibility after researched Marionette Ascension instead of Invisibility.

Cities:

- BUG FIX: Dwarf race city builds Fantastic Stable.
- Change dimension of sprite of Underground Tunnel Network.
- Shipyard does no longer require Mill but requires coastal access instead.
- Maritime Guild does no longer requires Fighter's Guild but requires coastal access instead.
- Halfling's Academy's effect on non-mechanical Magic ranged units and Fantastic Stable units changes from +50% to +2 Figures.
- Description of Ludus Agoge has been rephrased to convey more information.
- Unit production cost minimum cap for human player reduced from 50% to 40% of base production cost.

Others:

- Trim size of big rock on combat map.
- Trim tree on Myrror to be narrower and not fall off the tile.
- Scoring options pages readjusted.
- Hadriex's calm music is changed to calm music of original Horus. He still keep electronically distorted music when he gets angry.
- Myrror's overland desert tiles readjusted.
- Arcanus's overland hill tiles readjusted.
- Outlander wizard has casting skill growth rate halved and start with personal casting skill 0 and could not increase until get at least 1 magic book. Overland casting skill will have minimum cap at 1 due to game would crash due to divide by zero bug. Casting still possible with help of buildings and garrison units with caster abilities.
- Outlander AI will avoid research spell with casting cost until get at least 1 magic book.
- Phantasmal Terrain and Fairy Maze now could be disabled by overland Corruption.
- Corruption radiation damage in combat now deals 1 damage instead of 1xnumber of figures.

- Corruption radiation damage mechanism is no longer applied to Nature/Sorcery/Chaos nodes.
- AI opponent will be more willingly to accept peace once reduced down to 1 or 2 cities.

Version 1.5.12.5

Spells:

- Great Unbinding is now working against lair monsters.
- Divine Judgement casting cost is now scale by land size and game scale setting.
- Spells those unlock by requirement will get spell on research page once requirement fulfilled.
- All new summons that only accessible by Conjurer are now gained custom priority.
- Rally gains casting priority and autocombat bonus.
- Whispering Echo gains casting priority and autocombat bonus.
- Divine Judgement gains casting priority.
- Tabula Rasa gains casting priority and autocombat bonus.
- Force of Nature gains casting priority.
- Mystery of Sorcery gains casting priority.
- Conduit of Chaos gains casting priority.
- Day of Life gains casting priority.
- Night of Death gains casting priority.
- Custom priority of spell "Power of...." are increased.

Units:

- BUG FIX: Wanderer hero summons by Pandora Box ability.
- New hero ability: Righteous Ward, hero gains free permanent enchantments (mostly Life realm enchantments) as hero level increases.
- New hero ability: Arcane Ward, hero gains free permanent enchantments (mostly Sorcery and Nature realm enchantments) as hero level increases.

- The King of the Deep hero class changes from Unspecialized to Warrior/Leader.
- The Bronze Sentinel hero class changes from Unspecialized to Warrior/Mage and gains Arcane Ward ability.
- The Avatar hero class changes from Unspecialized to Warrior/Leader, gains super Righteous Ward but loses 2 random abilities.
- The Paladin hero gains Righteous Ward but super Might reduces to normal Might.
- The Black Knight hero gains Death Ascension but loses Irresistible Charge.
- The Everchosen gains Chaos Boon but lose 1 random ability.

Items:

- Kraken Wand is now able to summon a Kraken.

Buildings:

- BUG FIX: AI city without coast build dock
- Increases chance to build Forester Guild especially for High Elf and Rakhshasa races.
- Ability of Witches' Convent changes from grant unit enchantment to friendly units to curse opponent units at the beginning of combat.
- Ability of Altar of the Moon changes from grant powerful unit enchantment to friendly units to put powerful curses on opponent units at the beginning of combat.
- Sancta Basilica is no longer increase cost of unit but Paladins and Crusaders no longer get permanent Sanctify.

Others:

- Dry climate's drought chance is reduced from 4% per desert tile to 1% per desert tile.
- Wet climate's hurricane and lightning storm could no longer trigger in siege and node combat.
- Most of precombat script move out of UnitCalcPre.CAS to EnterCombat.CAS.
- Toxic smog from volcano and chaos node now no longer effect deployment area.
- Adjust river to fit engine-drawing river mouth.
- Adjust sea color to fit engine-drawing river mouth.

Version 1.5.12.4.1

Units:

- Bug Fix: abilities that perform unit counting or give bonus from heroes do not function properly.

Version 1.5.12.4

Spells:

- Bug Fix: Game crash when cast Mystic Surge in combat.
- Bug Fix: Rebuild, Transmute Equipment, Vampirism, and Spirit Link could be dispelled or abled to become target of the same enchantment when they should not.
- New spell: Tabula Rasa, new Very Rare Arcane combat enchantment signature for Runemaster retort, opponent's combat enchantment has chance 33% each turn to dissipate.
- New spell: Force of Nature, new Forbidden Nature combat spell for Runemaster retort, cast multiple Nature combat enchantments all at once. All Nature's combat enchantments must be researched before able to research this spell.
- New spell: Mystery of Sorcery, new Forbidden Sorcery combat spell for Runemaster retort, cast multiple Sorcery combat enchantments all at once. All Sorcery's combat enchantments must be researched before able to research this spell.
- New spell: Conduit of Chaos, new Forbidden Chaos combat spell for Runemaster retort, cast multiple Chaos combat enchantments all at once. All Chaos's combat enchantments must be researched before able to research this spell.
- New spell: Day of Life, new Forbidden Life combat spell for Runemaster retort, cast multiple Life combat enchantments all at once. All Life's combat enchantments must be researched before able to research this spell.
- New spell: Night of Death, new Forbidden Death combat spell for Runemaster retort, cast multiple Death combat enchantments all at once. All Death's combat enchantments must be researched before able to research this spell.
- New spell: Power of Nature, new Legendary Nature combat spell for Enchanter retort, cast multiple Nature unit enchantments on the same target all at once. Once become target of this spell, the unit could not be targeted of spell in "Power of" series until the end of combat. Majority of Nature realm's unit enchantment spells must be researched before able to research this spell.
- New spell: Power of Sorcery, new Legendary Sorcery combat spell for Enchanter retort, cast multiple Sorcery unit enchantments on the same target all at once.  - Rules that drastically change gameplay
 - Rules for skilled player who looking for challenge
- New score modifier "Book Collectors", Each time a wizard is banished or defeated, there is a chance that one of their spell books will become the winner's possession. The book will then no longer be

legible as far as its previous content is concerned, but it keeps all the other advantages, score modifier = 0.75. Thanks Slingers and More Stuff mod for script content.

- New score modifier “Unstoppable Stampede”, In combat, all neutral fantastic creatures gain regeneration 0, score modifier = 1.25. Thanks Slingers and More Stuff mod for inspiration.
- New score modifier “Adamantium Fortress”, Player wizard start with old adamantium mine right below his fortress and his starting units equipped with adamantium equipments left over from previous owner, score modifier = 0.6. Thanks Slingers and More Stuff mod for inspiration.
- New score modifier “Nodeborne Souls”, nodes will be more active in defending itself in combat by randomly gives unit enchantment from the same realm as node on all defending neutral creatures and randomly cast combat enchantment of the same realm before combat, score modifier = 1.5.
- New score modifier “Uphill Battle”, whenever AI units are in combat against human player, those units gains +10% To-Hit, +10% To-Defend, and +1 Resistance, score modifier = 1.5.
- New score modifier “Gods Play Dices”, at the beginning of combat, each units roll for resistance penalties (1% for -5, 2% for -4, 4% for -3, 8% for -2, and 16% for -1). Non-human players' units also rolls for resistance penalties but only at half chance for each penalty level against the human player, score modifier = 1.5.
- New score modifier “Khan the Conqueror”, neutral units will fight as if their commander have Warlord and Tactician retorts, score modifier = 1.5.
- Frozen and Volcanic climate now triple spawn chance for wildgames on tundra tiles.

Version 1.5.2

Difficulty

- If difficulty higher than expert, AI get -10% unit cost modifier bonus for each difficulty level above expert level.
- Unit cost modifier cap for AI in difficulty higher than expert increase to 80% (instead of normal 50%).
- If difficulty higher than expert, AI would buy magic market, stable, and armory as soon as possible.

AI

- AI will now buy Fighter's Guild if it is rich enough.

Unit

- Kraken's Echo of the Deep now also trigger inside Sorcery node too.
- Separate normal wind walking (3 overland movement) with highwind walking (6 overland movement)
- Holy mother's overland movement increase to 6 due to replacing wind walking with highwind walking

Spell

- Fairy Dust now triggers 50% chance to freeze target.
- Sound of Dance of Death now change and no longer using generic sound
- Hierophany now has no –save modifier but roll at half resistance for non-undead and 1/3 resistance if unit is undead.
- Regeneration item power now requires 6 Nature books.

Item

- New item power: Chosen, give bonus similar to Destiny but not permanent and not grant supernatural, cost 1800 and required 7 Life books.
- New item power: Colossal Power, give unit Colossal Strength and Iron Skin, cost 1200 and required 5 Nature books.
- New item power: Chaos Conduit, combat involve hero who equipped it start with Blazing March, Warp Reality, and Beat of Swiftness already casted, cost 1500 and required 7 Chaos books.
- New item power: Plague Lord, combat involve hero who equipped it start with opponent suffer from plague combat curse debuff. Required 7 Death books.
- +6 Attack item power cost changes to 600.
- Defense item powers cost change to 75/150/250/400/600/900.
- To-hit item powers cost change to 300/700/1100.

- Resistance item powers cost change to 100/200/350/500/700/900.
- Spell Skill item powers cost change to 100/250/450/700.
- Spell Save item powers cost change to 250/500/1000/1750.
- Health item powers cost change to 75/150/250/350/500/700.
- Insulation item power cost changes to 400.
- Bless item power cost changes to 180.
- Lionheart item power cost changes to 900 and now required 5 Life book.
- Invulnerability item power cost changes to 750.
- Divine Protection item power cost changes to 700.
- Cloak of Fear item power cost changes to 300.
- Wraith Form item power cost changes to 330.
- Water Walking item power cost changes to 100.
- Elemental Armor item power cost changes to 450.
- Regeneration item power cost changes to 800.
- Flight item power cost changes to 500.
- Invisibility item power cost changes to 750.
- Teleportation item power cost changes to 800.
- Haste item power cost changes to 1250.
- Immolation item power cost changes to 330.
- Zeal item power cost changes to 300.
- Binding item power cost changes to 700.
- Healing Aura item power now required 6 Life books.
- Pathfinding item power changes to Nature Link with all of its bonus and cost changes to 330.
- Amplifier item power cost changes to 100 and now required only 3 Chaos book.

Others

- Sorcery node now has swamp surge at the beginning of attacker turn and recede at the beginning of defender turn to act as obstacle terrain similar to chaos and nature node.
- Sorcery node now cost to move through tile overland equal to swamp and produces 4 food and 4 gold instead of 8 food previously.
- Bug Fix: wrong setting of BuyPriority of buildings.ini cause AI to not buy buildings when time is right.
- Bug Fix: holy mother display with range attack on overland when it should not.
- Bug Fix: No Healing from State of Rot does not removed properly.
- Bug Fix: Temporal Twist set all units movement to 0.5.
- Bug Fix: Binding not prevent dispel of enchantment.
- Bug Fix: UI on Display combat info for Aether Binding and Mariner Mastery is swapped.
- Bug Fix: Cost of Great Unsummoning, Final Wave, and Spellbinding are not scaled properly

Version 1.5.1.1

- Spell Hierophany now works properly against magic immunity but spell no longer effect by item power reducing spell save.
- Spell State of Rot now heal all units with "NO HEALING" perk instead of just undead but heal at rate 2 HP per turn.
- Vampiricism move to rare level and now not make units losing thrown and breath, just reduced them to 1 to keep ability to attack flying units.
- Spell Cloud of Shadow move to very rare level and now make all attacker's unit suffer -10% to-defend penalty at higher cost of 250/5 MP.
- Adjust position of Coliseum sprite.
- Bloodsucker now deals and heal 2 damages instead of 3.
- Vampire Lord gains -2 Lifesteal to compensate lower damage of bloodsucker.
- Jaguar Warriors lose first strike but cost reduce to 110.
- Wildhunters lose 1 armor.
- Hawkmen outpost growth change from -5 to 0.
- AI will not pick Dwarf race if has Sorcery books more than 6 due to Dwarf could not use some early key spell of this realm.

- Bug Fix: Ruler of Underworld and Eternal Night causing combat info to crash when click display.
- Bug Fix: Forester Guild always displayed as if wild game resource is within city vicinity.
- Bug Fix: Chaos Embrace generate negative power under influence of Divine Order
- Bug Fix: Settlers unit displays its race twice.
- Bug Fix: Music/125.wav not load to data folder.
- Bug Fix: Building41_0.png not load to data folder.

Version 1.5.1

- Works with Caster of Magic 1.50.1
- Mariner Mastery now grants +1 move to water walking units only during combat
- Significantly improved turn waits (due to above change)
- Aether Binding now costs 300/15 but the dispel strength effect is halved (+50%), thus spell is more economy-based. Dispel strength effect was on an earlier version added to Power Link.
- New sorcery item power 'Binder' that preserves unit enchantments (acts like spell lock). Base cost 1500
- Flame Blade (non researchable chaos spell) grants +3 melee, +2 physical range/thrown, and +1 fire breath. This spell can still be cast by combat engineers.
- Bug fix: Fiery Fury, Berserk, Discipline, Divine Protection has no aura
- The One Ring now has Binder instead of Spell Save ability.
- Game text fixes

Version 1.5.0

Game difficulty settings have been adjusted:

- Easy and beginner difficulties do not penalize AI resources. Instead, player is rewarded with 25 and 50 starting power in capital city and +5 and +10 fixed production bonuses in all human cities.
- Enemy Wizards gain stronger production bonuses at 'advanced' (110%→115%), expert (120% → 130%)
- Hardest 3 difficulties do not reward AI resources as much with only Phantasm (highest difficulty setting) showing significant AI boosts relative to expert difficulty.
- Instead, hardest 4 difficulties handicaps player cities with extra unrest (+5%,10%,15%,20%) and a reduction of (0%,10%,20%,25%) for food, production, gold, and research in player cities.

AI

- Enemy wizards far less likely to rush-buy buildings, especially advanced buildings which 'Caster of Magic' taught players to use their gold to rush-buy wizard guild, amplifying tower, and linking towers as a top priority.
- Therefore, enemy wizards will save the gold for needs such as army maintenance.
- AI more likely to cast sanctify
- AI bug of not building Xuanyuan settler fixed
- Enemy wizards retort selection based on what books they pick.

Race:

- **New myrror race introduced Rakhshasa!** See race section for more details.
- **New arcanus race introduced Hawkmen!** See race section for more details.
- Nomad cities receive ¼ max population per desert tile in their vicinity
- Troll cities receive ¼ max population per tundra tile in their vicinity
- Lizardmen cities receive ¼ max population per swamp tile in their vicinity

Cities

- Trade bonus is now capped at 2% per pop (from 3%), reducing income from roads. This is an indirect buff to nomads.
- Dock and shipyard now grants 1 food per coast, ocean, rivermouth tile (instead of a flat +4 food)
- New building: fortification 600/5 cost – requires mechanician guild and wall – All units inside city walls gain 'large shield' effect (+3 extra armor against ranged attacks, spells) city in combat is surrounded by ocean tiles, thus impassable unless water walking, non-corporeal, or flying. In auto-combat, it grants +4

armor instead.

Spells

- **Larger land sizes have a cost modifier to global-type spells (increase) and a small cost modifier to localized spells such as unit/city enchantments (decrease)**
- NEW Aether Surge – Sorcery combat global – Rare Tier – Cost 60 - All caster's units in combat gain +10 casting skill, this includes units which originally does not have casting MP. Each turn current MP would have MP replenish at rate 5 MP per turn until the end of combat.
- Teleport spell no longer researchable
- Fiery fury no longer grants fire breath to enchanted fantastic unit, just first strike and change to chaos.
- Rust spell now also disables 'large shield' (but only for duration of combat)
- Sanctify, if cast on a 'cleric' unit, grants +2 spellcasting skill per base resistance of enchanted unit, and turns the unit into a life fantastic creature, with access to all life spells.
- Sanctify now costs 60/2 (from 50/1)
- State of Rot clarified that units that engaged in combat remain with 'healing immunity' until the end of the overland turn.
- All damage spells except ability immolation have 60% hit chance (from 30%) but strength generally halved rounded up with a few exceptions for low-strength attacks.
- Lightning Storm now costs 65
- Chaos embrace also allows boosts warp creature, when successful, to grant all 3 effects.
- Prayer, if stacked with High Prayer, grants +1 attack, armor, and resistance (to-hit and to-defend do not stack)
- Divine Order no longer affects cost of disjunction (was accidentally affected)
- Lightning bolt now costs 24 (from 25), can be accessed by ultra-elite caster 20 units.
- Corrosive blast now costs 29 (from 32)
- Apotheosis now costs 360, 10 upk, research cost of 12000, removes 'no healing' from undead units, and grants 'supernatural' trait
- Ruler of Heaven now has research cost of 14000
- High Prayer now has research cost of 15000
- Chaos Blessing now grants Warp Reality to defending city, offering strong protection. Spell cost was increased to 200/5
- State of Rot no longer penalizes enemy units with -5% to defend. Instead, State of Rot heals your undead units outside of combat by 3hp per turn.
- Mariner Mastery now grants the +2 movement to sailing and floating island permanently rather than while spell is active (helps with end turn wait)

Wizards:

- Omniscient renamed to Procurator. Its formula reduced from 10+4X to 7+3X (meaning, 1 book=10%)
- Procurator contains a minor bonus of reducing non-capital 'indirect control penalty' by a quarter.
- Procurator also reduces banished wizard city penalties by a quarter.

Units:

- Most halberdier-type units from armory guild cost 5 more but have +1 armor.
- Xuanyuan generic units no longer have a cost discount.
- Xuanyuan elixir alchemist, auto-crossbowman, dragon guard, dragon horses cost slightly more
- Units and heroes with 'healer' and 'pact exemption' gain a 'cleric' icon, used for Sanctify
- Xuanyuan dragon ship has improved sprites.
- Xuanyuan sky lantern moved to Hawkmen
- Wasps no longer have forester
- Hell hounds gain mountaineer
- Vampire renamed to vampire lord
- Cloud giant now has 8 upkeep (from 5)
- Coatl caster points reduced to 13 (from 15) and poison reduced to 2 (from 3).
- Beastmen Gugalanna now has 1 poison (from 3) per figure, stoning gaze -1 (buffed from 0), costs 290 (from 280)

- Manticore is no longer a fantastic unit (see Rakhshasa), buffed significantly.

Other

- Game text fixes
- no longer displaying 'disoriented' warp reality icon on unit from chaos blessing
- Some unit sprites and other graphics reworked
- Coliseum recolored
- Tundra terrain has a small chance of having wild game

Version 1.4.22

Economy:

- New game mechanic called 'indirect control penalty': Non-Capital Cities less productive, losing 20% of production/gold/gold/power rounded down.
- If wizard is banished, all cities become much less productive, losing 40% of production/gold/power/food
- Buildings, particularly non-military non-production ones, have lower upkeeps with many starter buildings having 0 upkeep. This accommodates for the generally higher building costs relative to Caster of Magic. A fully developed city may save up to 20 gold per turn.
- However, military units have higher upkeeps, typically +1 except for higher-tiers gaining +2 or even +3 gold upkeep.
- Ships also now come with gold upkeep just like original Master of Magic. Lower-tier ship upkeep stays low.
- Library provides 4 research (from 6)
- Magic Market provides 4 power (from 6)

End Turn Time Savings

- Unitcalc and unitcalcpre script file overhauled to perform more efficient calculations
- EnterCombat removed to improve end turn waits considerably.
- economy and other script files adjusted to lessen end turn waits
- Tactician makes fewer calculations in strategic (automatic combat), which reduces end turns.

Races:

- Lizardmen now allowed to build bank – needed an economic buff to stay competitive.

Spells:

- wall of fire redesigned to deal stronger damage but as a single attack, no longer targets all figures.
- wall of fire also grants +1 attack to all defending normal units (metal fires effect from original game)
- wall of fire costs 30 if cast in combat.
- wall of fire overland cost unchanged but now has 1 upkeep
- Blaze of glory now also grants armor-piercing (needed a significant buff to be usable) but unit enchanted loses first strike (if present)
- Flame Blade, renamed fiery fury, if cast on a fantastic creature, turns the creature to chaos and grants first strike and +3 fire breath.
- Rust also eliminates 'thrown' attack to cursed unit.
- Chaos Blessing also offers protection by granting -10% to hit to non-chaos attackers
- Power Link now also eliminates all non-capital power penalties introduced in version 1.4.22
- Firebolt costs 9 (from 10)
- Dissolution costs 80 (from 90)
- Mariner Mastery uses fewer calculations. When dispelled it takes a full turn to take effect.
- Wraithform no longer allows ships to travel and transport units inland
- Immolation now boosts existing firebreath by +3. Units without fire-breath do not gain this bonus.
- Dance of Death no longer grants random 'liability' to enemy units – affected end turn waits too much
- Angelic Guardians no longer grants random 'lucky' to friendly units. Spell grants additional exorcise bonuses. (normal -0, life/sanctified -1, existing exorcise gains additional -2)

Buildings:

- Farmer's Market - Instead of granting food, Farmer's Market grants 0.5 gold per population.
- Forester's Guild - Grants 4 food and +2 food bonus from wild game

Units:

- Fire Giant loses 1 ammo, gains 1 armor and 2hp ... becomes roughly as useful as the fireball casting variant of original.
- Maiden Queen costs 240 (+40)
- Stag Beetle costs 1 less upkeep than a typical 240 cost unit.

Wizards:

- Artificer no longer has 25% cost reduction of arcane spells. However, all mechanical units (not just slow ones) gain +1 movement and all mechanical units also gain +1 attack, +1 armor and +2 resistance. (from +2,+0,+1)
- Runemaster now 1-pick retort, loses spell resistance perk, arcane research reduction weakened to 25%, gains 25% cost reduction of arcane spells.
- Spellweaver renamed to Enchanter, now 2-pick retort, gains the 150% spell resistance perk and 25% cost reduction in all enchantment and curse spells overland and in combat.
- Sagemaster no longer grants gold based on research buildings, but its 25% research bonus was upgraded to 33% research bonus.

Other:

- Icon available for units that can be in enemy territory during a wizard pact
- Icon available for units affected by the lesser and greater warp reality effects from Chaos Blessing and Warp Reality spells, respectively
- Icon available to display mechanical units.
- Help.txt spell description fixes

AI:

- Lower priority to cast Great Unsummoning and Final Wave, given they slow down game.
- Higher priority to recruit stag beetles relative to other klackon units

Bugs:

- Fixed a bug preventing Crusade spell from giving the intended holy armor effect (was instead giving +2 armor without the holy armor icon)

Version 1.4.21

Units:

- Fire giant no longer casts fireball, but gains +1 range and +2 ammo
- Ghouls gain +10% to hit and +1 range, but lose poison-based damage. Death no longer associated with poison.

Spells:

- Fireball moved back to uncommon, costs 19, requires 1280 research cost, and has strength 14 (from 12)
- Blaze of glory moved to common. Chaos needs this powerful yet situational spell to stay competitive in lair-hunting.
- Insulation now has 1600rp cost.
- True sight now also grants +5% to range
- Reaper Slash now costs 32 → 44 but causes undead-raising damage, has strength 44 (from 42) and deal cold instead of poison damage
- Altar of Peace changed to Altar of Duality, either granting 12-32 research if relations are neutral to positive, and 6-16 production if relations are negative. Bonuses increase as relations are farther from neutral.
- Angelic Guardian no longer grant lucky to a % of recruited units. Instead, random lucky before combat rise from 20% to 33%.
- NEW Pillars of Faith: City buff that gives 20% of granting lucky to recruited units and +1 to +3 resistance

depending on how many religious buildings you have in it. Unit icon is added to units benefiting from spell.

- Zeal changed to unresearchable and castable only by life creature.
- Eye of Heaven – if a life caster unit has 28mp, it can cast this spell – giving all friendly units illusion immunity.
- Divine Protection – if a life caster unit has 23mp, it can cast this spell – giving a normal unit lucky and death immunity.
- Prayer is strengthened in AI auto-battles
- BUG FIX: Life realm miss one starting common from 6 Life books onward

Other:

- Added icons for units stranded in water, sailing units grounded in land, mariners, and amphibious.
- Zeal and Insulation script of hero item and enchantment no longer work redundantly

Version 1.4.20 – Compatible with 1.4.07 Caster of Magic version

Race:

- **New myrror race introduced Xuanyuan!** See race section for more details.

Units:

- Seraph introduced as a non-summonable unit of great difficulty similar to the 'greater lords' that spawn very late in the game and guard the most valuable treasure.
- Nightmare loses the caster 20 and gain 1 charge of 'terror'

Spells:

- Inquisition does no longer cause unrest from religious 'violence' power from Chaos Embrace
- Aether Sink cause a minimum of 5 power loss.
- Unicorn costs 10 less
- Valkyrie costs 20 more and 1 more upkeep
- State of Rot disallows all healing for enemy non-undead units in combat, essentially making all damage irrecoverable.
- Nature's witness nightshade generate 4 power instead of 6 (was being counted twice)
- NEW Power Link (cost 1200/upk 50) – Power Link has been completely changed, including spell image. It now
 - grants 5 power per city enchantment (15 if city curse) in all your cities
 - grants 2 overland skill per enemy Amplifying Tower in play
 - grants full effect of all enemy monuments and linking towers to your combat skill
 - makes dispel-type spells +100% effective. If combined with Aether Binding, it simulates old game's 'True' dispel spells.
 - Reason: The original spell was too 'mathematical', caused variable power spikes that could heavily impact domination score and the 'win' button, was too overpowered if obtained early or there are too many players, and didn't seem to affect enemy spell decision logic. The new Power Link has more strategic components while still scaling reasonably well with more players.

Graphics:

- Aether Binding graphic vertically flipped

AI:

- AI slightly more likely to cast skeleton.

Version 1.4.19

Heroes:

- Yamrag and Warrax changes in spells to allow access to Lightning Rage and new Warp Lightning, respectively.
- New Champion – Swarm Queen. Sturdy, magic caster, and with many supportive traits.
- New Hero – King of the Deep. Extremely tanky lizard hero.
- New Champion – Troll War Chief – A regenerating high-tier hero with charges of raise dead (same as Troll

Chieftan) and perks suitable for hand to hand combat (constitution and might)

- New Champion – Planewalker – a mage with logistic-related perks (plane shifting, wind walking, abilities such as logistics)
- New Hero – Elementalist – with animation utilizing water, fire, and lightning.
- Yramrag made to look more like a dark elf
- Beastmaster hero now requires 10 fame, less likely to appear in opponent capital cities.

Spells:

- Warp Lightning renamed to Lightning Rage
- New warp lightning spell taking its place is a 18-strength lightning damage to all figures, providing a more advanced spell hitting all figures when facing buffed multi-figure units.
- Doom Mastery also grants all 3 chaos channel effects if chaos channels cast on a hero
- Insulation now costs 18/90 (from 12/60) – was too effective.
- Exaltation now costs 25 (from 30) – a true upgrade from healing in all circumstances, allows champion casters access to it.
- Blood Lust now costs 21 in combat (from 25) and 63 overland (from 50) – the removal of undead effect made it too useful to mass-cast, yet the combat spell was too expensive and out of reach from caster units. This is a reasonable compromise.
- Minor spell cost adjustments, mainly to add incentive to using elite and ultra elite caster 20 units.
- Immolation now costs 13 (from 12), Blaze of Glory 23 (from 25)
- Iron skin now costs 23 (from 24), ice bolt 24 (from 25)
- Blur costs 24 (from 25)
- Exorcise now costs 18 (from 20), hierophany now costs 23 (from 24)
- Inquisition now grants a minimum of 2 unrest to cursed city
- Teleport spell now grants the effect in combat only (decreased end turn wait times)
- Blood lust code more efficient, decreased end turn wait time.
- Bless now grants 4 resistance and 7 armor against chaos/death effects (from +3 to each with additional +1 resist)

AI:

- Chances of wizards starting with 'Specialist' decreased.
- Disjunct prioritization has been recalibrated across the board with a higher emphasis for disjunctioning economy based global enchantments when at peace, disjunctioning military-oriented global enchantments when at war, and other balancing on this matter.

Other:

- A few sound changes for Warlord mod's units.
- Inquisition does no longer crash the game.
- Benefactor code simplified, decreased end turn wait time.

Units:

- Arch Demon Lord introduced, with new unit sprites. This is a non-summonable unit of great difficulty similar to the 'greater lords' that spawn very late in the game and guard extremely valuable treasure.

Version 1.4.18

Retort/Books:

Benefactor - comes with heroic heart researched

Tactician – no longer grants +1 move in favorable terrain. However, it grants +5% to hit and negate first strike instead (end turn time savings)

Buildings:

- Alchemist Guild now grants +2 research – bringing back the original master of magic feature of it granting a minor economy bonus.

Units:

- Dwarf musketeer loses 1 resistance
- Gugalanna gains +1 melee

- Minotaur gains +1 hp
- Doom Drake costs 10 less
- Kraken no longer stealthy in sea (end turn time savings)
- Archangel has a charge of hierophany (new spell)

AI:

- Overhauled how AI values spells in regards to trading with other players, more in line with spell worth and whether the spell is not used at its full potential by dumb AI.

Spells:

- Soul flay costs 45 (from 5)
- Lycanthropy costs 90 (from 105) and has resistance 5 (from 4)
- Divine Order's magic market effect changed from guaranteed to conditional – if opponent has no life books, it no longer provides power. If opponent has more non-life books than life – magic market is 50% as effective. If opponent has more life books – magic market is unchanged. - nerfed
- Plane shift research cost is 6000 (from 8000)
- Focus Magic, if cast in combat and unit does not have ranged attack, grants +3 resist. - buffed, mainly to help AI.
- Inner Power also grants mountaineer to qualifying units.
- Ensuring magic immunity does not counter web
- State of Rot Redesigned without 'healing immunity' at all given the various bugs around it not expected to be fixed - All enemy non-undead units in combat lose regeneration and 8% to defend. Additional State of Rot enchantments in play reduces to defend by 4%.
- Sanctify effect to turn unit into life creature only happens during battle (end turn time savings)
- Angelic Guardians effect of giving your units exorcise only happens during battle (end turn time savings)
- AI values some spells slightly more or less when trading.
- Removed Purity due to impact on end turn processing.
- NEW UNCOMMON - hierophany (24 cost)– Combat curse with -4 resist modifier (-7 if undead). If resistance roll unsuccessful, unit loses half armor, all immunities, lightning resistance, negate first strike, and all mobility-related perks. This spell is most successful against death and undead units which happen to have some of these perks.
- Focus magic no longer can be cast in combat (end turn time savings)
- Vampirism no longer transfers thrown/breath into range, only into melee (end turn time savings and to encouraging melee among enchanted units)

Other:

- This version is all about lowering end turn game speeds, a problem associated with the Warlord mod. The scripts simplified to reduce calculations. In some cases, certain features got simplified or moved to just combat-only effects. Simplified eternal night/state of rot/vampirism/shadow strike/colossal strength/Temporal Twist.

Version 1.4.17

Retort/Books:

- Spellweaver's cost reduction is 20% (from 25%) for non-enchantment overland spells (enchantments still 25%)
- Channeler also comes with 12% combat spell cost reduction (all spells but only if cast in combat)
- Artificer's mechanical unit trait involves +1 resistance (from +2)
- Charismatic now also grants 1 unrest reduction to your cities
- Sage Master now eliminates unrest of library, sage guild, and university
- Famous renamed to 'Benefactor' now grants heroes +2 attack, +1 armor, and +1 resist.
- omniscient formula now $14 + 4X\%$ (from $16 + 3.5X$), favoring mono-wizards
- omniscient chaos formula now includes wizard fortress and combat skill gains from cities
- alchemy named 'alchemist' for consistency in retort names.
- bug fix: wizards with 7 or 8 books of one type were not gaining the 3% and 6% spell cost discount as described with latest Caster of Magic version.

Spells:

- Divine Order costs 600/30 (from 500/10) but calculates bonuses and penalties differently, mostly favoring player (25% cost reduction for buffs and healing spells, +25% cost increase for curses and damage spells that apply only to enemy wizards). Some minor 10% increase/decrease effects elsewhere with the cost increases applying only to opponents.
- State of Rot no longer affects units overland (improves wait turn performance). However, there is an added 'to defend' penalty of 5% to enemy units during combat.
- State of Rot bug around caster units losing spell books prevented. However, this required making them exempt from the healing immunity effect. To balance it out, caster units lose 8% to defend instead of 5%
- State of Rot bug around fantastic units prevented. However, this required making them exempt from the healing immunity effect. To balance it out, caster units lose 8% to defend instead of 5%
- Mystic Surge no longer grants 'healing immunity', is full of bugs in unmodded Caster of Magic.
- Eternal Night's 'poor vision' effect on enemy units now happen only in combat improves wait turn performance).
- Rust now costs 7 (from 8)
- Purity may have a slight tweak to improve wait turn performance.

Cities/Buildings:

- Switching farmer to worker guarantees at least 1 hammer change (impacting non-dwarf/klackon towns that had sawmill but not townhall)

present)

- Mechanician Guild redesigned from +40% all production to +1 ½ per worker. In a mid-size city with a few allocated farmers, production output is about the same. However, this makes food upkeep more costly later in game due to opportunity cost.
- rewrite code in ecoprod.cas to make sure that all remnant production in the form of fractions from farmers, several buildings, percentage bonus would not be discarded as they get included in result from terrain

AI:

- If template is mono nature or have nature books more than 4 and not yet have tactician retort, then there is 30% chance for sacrifice one nature book for tactician retort
- If wizard has more than two magic realms, chance of picking omniscient retort is increased by # of different book types.
- The re-rolling of spell availability now considers new spell combos from Warlord mod.
- AI has low-medium disjunct priority to Divine Order (from near-zero)

Units:

A few hardy recruitable units were rebalanced around 40% to defend to give player a different mega-buff option over multifygures.

- Golem: 7 armor (from 9), 40% to defend, +5 cost
- Stag Beetle: 6 armor (from 8), 40% to defend
- Dragon Turtle: 9 armor (from 11), 24hp (from 25), 40% to defend
- Minotaur: 16 melee (from 13), 4 armor (from 5), 12hp (from 13), 40% to hit (from 50%), 40% to defend
- Gugalanna: 8 melee (from 10), 50% to hit (from 40%)

Experience:

MP is earned +1 per level of experience.

Ultra Elite: +5% to hit, +1 attack, +1thrown/breath +1 armor, +1mp

(from the underwhelming +1 attack, +1 armor. +2mp was present version 1.4.15, but now split as 2 +1s)

Champion: +5% to hit, +1 attack, +2 armor, +1 resistance, +1mp

(more balanced set of boosts instead of just +10% to hit, +1hp)

Heroes: +5% to hit earned in level 4, level 6, level 8 and level 9 (instead of +10% earned in level 5 and 9)

Other:

- Improved end of turn wait time, especially early in game.
- Unit mercenaries can be recruited as early as turn 18 (from turn 30). Heroes and item purchases unchanged.
- Description fixes
- Fixed air elemental's immunity to hurricane spell.

Version 1.4.16

Retort:

- Conjurer starts with Summoning Circle
- Runemaster starts with Dispel Magic
- Artificer allows all mechanical units be recruited with magic weapons (without alchemist guild), +2 resistance and if unit that has speed lower than 3 would gains +1 speed (benefits Steam Cannon, Catapult, Ballista, and Steam Tank).

Spells:

- State of Rot now also disables 'healer' unit trait when in effect.
- Evil Omen cost multiplier now stacks (but at 25 %), but unrest stacking was removed.
- Speed reduces by Temporal Twist would not cause unit speed to go below 0.5.

Version 1.4.15

Spells:

- Tree of Knowledge costs 250 (-150) but research cost is 2000 (+200)
- Corruption costs 30 (from 40) to balance out the higher prevalence of purifying units and being able to move them around faster with roads.
- New chaos common spell that replaces shatter - "rust" which at a resistance modifier of -5 can remove magic weapons permanently. If cast on a unit without magic weapons and unit fails resistance modifier, it loses half its attack rating
- New chaos rare spell (16th spell) – Shatter cost 20 – now can target creatures, affects all attack types, and comes with modifier -5
- New sorcery rare spell (16th spell) -Temporal Twist (cost 40) – combat global enchantment – all enemy units lose 1 movement, teleport, first strike, and negate first strike. If unit is fantastic, it loses an additional movement point.
- New nature rare spell (16th spell) – Transmute Equipment Cost 90 – unit special - gives adamantium and orihalcon to a normal unit or a hero. Not an enchantment, thus cannot be dispelled.
- New Life rare spell (16th spell) – Inquisition – penalizes religious centers (for religious power beyond 6, each additional point reduces research by 3 and adds ½ unrest)
- Reaper Slash returns as a rare spell with low research cost – death does not specialize in direct damage, but at least it has 1 decent option to do so.
- State of Rot expanded to also affect enemy death units as long as they are not undead.
- Hell Hounds cost 48 (from 55), intended to be a superior common-tier summon like in original MoM
- Magic Immunity now costs 45 to cast in combat

- Djinn now costs 395/10 (from 375/9) but comes with caster 40 (from 35)
- Efreet now has caster 39 (from 40)

Building:

- Monument no longer has building prerequisites (used to require magic market + library). Dwarves (who have no access to magic market) still can't build it

Units:

- Griffin now cost 260 (from 280) to recruit
- Werewolves, Coatl, Sacred Ancient, and unicorns gain forester
- Manticore, Chimera, Great Drake, Sky Drake, Storm Giant, Thunderbird gain mountaineer

AI:

- True Light prioritized less by AI, partly due to AI not always using spell correctly.

Other:

Combat terrain in forest/nature nodes has less 55% of rough terrain (from 95% and 35% respectively) while mountain and volcano increased to have 35% of rough terrain (from 8%).

- Ultra elite experience grants +2 mana points (reaching 25 for caster 20 units)

Tactician redesigned:

The wizard has skill maneuvering troops in battlefield. In combat, all units controlled by wizard gain +1 defense. If combat occurs on unit's favorable terrain, it gains +1 movement point. If unit stays on its favorable combat tile, it gains first strike and +2 defense.

Units with "Forester" favor overland forest terrain and Combat tile woodland.

Units with "Mountaineer" favor overland hill/mountain/volcano terrain and combat tile rock/mountain.

Units with "Waterwalking" favor overland swamp/tundra/river terrain and combat tile swamp/tundra.

Units with "Pathfinding" are counted as have both "Forester" and "Mountaineer".

Tactician is mutually exclusive with Warlord.

Additionally, teleporting units gain first strike and non-corporeal units gain negate first strike.

Version 1.4.14

Spells:

- Nagas now cost 1 upkeep (from 2)
- Heroic Heart research cost is now 240 (from 440)
- The 10 common-tier spell research costs sum up to exactly 2880 (prior to this version, sums were not uniform). Chaos was particularly adding up to a high number, benefiting most.
- The common-tier spell research cost rankings shifted around while adding to exactly 2880
- Based on above two points, the average common-tier research cost is down by roughly 10%
- Uncommon-tier, Rare-tier, and Very-rare tier spell research costs standardized so no realm benefits with avg research cost higher or lower than others. For tables visualizing this, go to the beginning of the 'spell changes with comments' section in document

Buildings:

- Monument now costs 75 (from 90)
- Linking Towers now cost 500 (from 550)

Descriptions:

- Hell hound had incorrect cost in game text

AI:

- Nature wizards now start with war bear instead of killer wasps

Treasure:

- Common tier spell rewards have a lower difficulty requirement (technical detail: minimum monster budget allowing a common spell is 200, instead of 300)

Bugs:

- Hurricane's ranged to hit reduction was twice as much as intended due to an error in modding tools. This has now been adjusted.
- Dance of Death was accidentally impacting existing units with misfortune overland for some turns. This was unintentional and thus removed as the effect was only intended to take place during combat.
- Updated code for Angelic Heart to prevent similar bug

Version 1.4.13

Spells:

- Zombie Mastery research cost increased to 5600
- State of Rot reworked, costs 35 upkeep and 4400 research cost, no longer prevents overland healing due to bugs and modding limitations.
- Discipline no longer a researchable spell, but can still be cast by life units and its effect can also apply to heroes.
- NEW common: True Light (cost 20) – restored Master of Magic spell with the same name, but also contains a minor effect to reduce damage of illusion attacks.

Bugs:

- Reworked State of Rot to prevent units from becoming 'mystic' (fantastic) and overland healing prevention was inconsistent at best, not functional at worst.

Version 1.4.12

Units:

- Reduced Barbarian Gladiator cost from 140 to 125 and upkeep from 4 to 3
- Reduced Barbarian Longship cost from 150 to 140

Spells:

- Angelic Guardians now also grants all normal units exorcise 0 while spell is in effect (undead suffer a -3 resistance penalty, making it an effective counter against death). Cost increased to 500 (+100) with 35upk (+5)
- Sanctify and Purity spells add -1 resistance bonus to exorcise originating from "Angelic Guardians"
- Heart of Solidarity now also treats all towns unrest as if they had a full garrison, translating to 0 to 4 unrest reduction depending on town garrison. Cost increased to 500 (+100) with 15upk (+5)
- State of Rot had upkeep raised to 60 (+25) and fixed a bug where units could heal in combat via healing spells.
- Research cost of cloud of shadows and soul flay reduced. Research cost of State of Rot increased.

AI:

- Decision on which race to build settlers revisited and updated, to be more applicable to race and realm changes in Warlord Mod.
- More likely to disjunct State of Rot when not at war.

Bugs:

- Fixed: Units under state of rot, despite having 'healing immunity' had ways of healing via healing spells.
- Fixed: Effect of Aether Sink on Linking Towers corrected.
- Dwarves and Dark Elves not showing intended -2 racial unrest. (from 0)
- Halfling and High Men not showing intended -1 racial unrest (from -2)

Version 1.4.11

Units:

- add proper units' AI flags
- Lizardman Marines and Nagas get "Mariner" perk allow unit to move faster and fire immunity at sea at cost of could not fly even if enchanted by fly-given enchantment
- Kraken gains stealth at sea tiles and also get "Echo of the Deep" perk allow Kraken to move faster, gain fire immunity, +10% to-defend, and invisibility, at sea at cost of could not fly even if enchanted by fly-given enchantment
- Demon upkeeps increase from 3 to 4
- Barbarian Longship cost increase from 120 to 150
- Sacred Ancient's resistance for all reduces from +2 to +1

Items:

- New item power "Healing Aura" now available for wizard with 5 Life books

Spells:

- New Life rare global enchantment "Angelic Guardians", randomly give lucky perk to newly trained normal units and randomly given temporary lucky at the beginning of combat to units that not have lucky perk
- New Nature rare overland summon "Thunderbird", giant bird with missile immunity, lightning breath, and immunity to hurricane's effect
- New Sorcery rare unit enchantment "Teleport" grant teleporting movement for enchanted unit in combat
- New Chaos rare combat enchantment "Beat of Swiftness" give +3 movement to melee only unit and +2 movement to range unit but this cost 10% of units' armor for such reckless move
- New Death rare normal unit unresistable curse "Soul Flay" give cursed unit with penalties proportionate to their veterancy
- New Death rare global enchantment "State of Rot" cursed all non-death units not control by caster to could not heal and lose regeneration perk
- Death spell "Reaper Slash" now only castable by death creatures.
- Hurricane range and thrown to-hit penalty reduced from -25% to -20% and breath to-hit penalty increased from -25% to -30%
- Aether Sink nolonger include religious power as part of penalty effect
- Crack Call's "buried" effect now gives -20% to defend and suffers 50% more damage from crack's call. The Crack's call bury chance and damage reduced by a 20% factor.
- Mystic Surge could now grant Teleport enchantment
- Mariner Mastery nolonger give permanent movement perk but give movement bonus +2 to sail units (as well as air ship) and +1 to waterwalking units directly while enchantment still in effect
- Vampiricism now make unit lose thrown and breath attack but half of their strength would transfer to melee and range attack and trade value of spell increased
- Zombie Mastery's trade value increased and now cost more RP (3200 → 4400) and upkeep get higher (25 → 40) but now also buff all undeads and zombies with +1 attack, +1 resistance, and +1 movement point

- Blaze of Glory lose doom damage but gain attack bonus equal to defense it lose and all range attack convert into thrown
 - Dance of Death now randomly grant temporary misfortune at the beginning of combat
 - Shadow Strike casting cost increased from 15/75 to 18/90 and trade value increased
 - Revenant casting cost reduced from 35 to 25
 - Eternal Night no longer curse caster's own unit (buff) but no longer adds unrest to enemy cities (nerf)
 - Wind Mastery grants +2 movement to originally sailing units (if mariner mastery is also in effect).
 - Mariner Mastery no longer provide +2 bonus to flying ships (unless wind mastery is present) and airships
 - Creature Binding's trade value and research priority increased
 - Blazing March's research priority increased
 - Doom Mastery's trade value increased
 - Wraiths's research cost reduces from 4800 to 4000
 - Wave of Despair's trade value decrease and research cost reduces from 5200 to 4000
 - Demon's research priority increased
 - Dissolution's trade value and research priority increased
 - Spirit of Community's trade value and research priority increased
 - Valkyries's trade value increased
 - Magocracy's trade value increased and upkeep increased from 15 to 20
 - Aether Binding's upkeep reduced from 40 to 35
- Counter Immunity now displayed properly

Version 1.4.10

Caster of Magic New Version

- Integrates new difficulty level and score modifiers from new Caster of Magic version 1.4.4
- Fixes potential compatibility issues

Units

- Master Engineer hero gains long range, spell charge change from flame blade x3 to Construct catapult x1 and ability could not be countered
- Centurion hero spell charges could not be countered
- Engineer ability "Disrupt" and Combat Engineer's "Flame Blade" could no longer be countered.
- Road builders have a take a different # of turns to finish a road, pioneers notably taking much longer (see road gameplay below)
- Hydra, Earth Elemental, Sacred Ancient no longer appear on rampaging monster stack
- Lesser and Great Chaos Lord gain 5 heads with HP split between each heads but lose 2/3 attack strength
- All great lords gain primal force
- Sacred Ancient generates 7 powers (Natural Force) if wizard could pet them.
- Warmaster hero's "bloodlust" could not be countered.
- Sagittarius hero's "Heroism" could not be countered.

Spells

- Dispelling Wave's research cost change from 1920 to 1800 RP
- Phantom Beast's research cost change from 2140 to 1920 RP
- Magocracy's research cost change from 1600 to 2140 RP

Game Help

- Game text corrections, such as in focus magic spell.

Road Gameplay

- Roads cost twice as much time to build, but engineers build faster to compensate. This was done to weaken pioneers for non-road oriented races. (compared to original game's engineers, modded pioneers build 50% as fast and modded engineers build 150% as fast.

Other

- AI will no longer conduct stalling strategies at difficulties Fair, Normal, Easy, Beginner
- Steelbreaker hero image improved

Version 1.4.9

Game Help

- Spell text now includes pictures that represents such spells for better immersion

Spells:

- Nature's Witness no longer contain military unit benefits
- Resistance military bonuses from survival instinct and stat bonuses from Nature's witness moved into its own NEW 'Survival of the Fittest' common global enchantment.
- Fairy Dust no longer researchable, slot taken by 'Survival of the Fittest'

Units:

- Engineers buffed, cost 60/2, require university, but build roads twice as fast.
- Pioneers weakened, base cost 50 and now also require fighter's guild. Halfling equivalent costs 65
- Unicorn no longer comes with first strike but gains purify instead

- Guardian Spirit no longer comes with purify
- Antlion (Klackon) no longer have first strike, have added durability to compensate.
- Maiden Queen costs 200/5 (instead of 180/4)

Terrain:

- Chaos node provides +10% to nearby cities (from +7%)

Other:

- Drain Power spell animation has a different color palette.

Version 1.4.8

Key Change: End turn processing time reduced.

Spells:

- Altar of Battle costs 25 less (275)
- Flame Blade – Now also grants +2 to all non-magic, non-elemental ranged attack types, not just some ranged attack types
- Blaze of Glory no longer grants first strike. Also removes all ammo in exchange for +1 thrown for each ranged attack point.
- Dance of Death no longer has a chance to curse recruits with 'misfortune'
- Chaos rift probability of cursing recruits with warp creature reduced further to 10% (from 20%)
- Eternal Night redesigned. No longer grants 'poor vision' to just recruits. Instead, it grants poor vision to all non-death units, including wizard's own. Effect can be negated by turning your unit into undead.

Heroes:

- Barbarian gains 1 armor, loses 1 melee, can equip two swords (no armor)
- **7 heroes have been added:** Sagittarius, Crone, Grand Inquisitor, Dwarven Steelbreaker, Elven Dreamwalker, Halfling Gambler, and Gnoll Warmaster.
- Some existing heroes have been renamed

Units:

- Engineers now cost 40 across the board. Certain races no longer have cheaper engineers than average.

Items:

- Life realm get new item power "Zeal" which give first strike and negate first strike on hero
- Insulation item power is now also giving cold immunity
- Vampiric item power is now give life steal -5 along with create undead damage
- Mystic Power is now no longer shared slot with Lion Heart unit enchantment
- Precreated items have their ability changes to fit with change in item power

Other:

- Intro Video contains reference to 'Caster of Magic'
- Water elemental idle animation restored
- Increased possibility of being granted a book/pick in lairs (the increased chances of gaining spells made this probability too low)
- Number of minimum pick rewards from lairs increase by 2
- Higher level rewards now require much higher minimum monster budget. Vials also increased as these are more relevant later in game.
- Some unit placements in the units.ini file have changed, may impact current existing games!

Version 1.4.7

Spells:

- 2 uncommon-tier and 2 rare-tier spells added for all 5 realms

- Now all realm has 12 uncommon tier and 14 rare tier spells
- New spell: Zeal, life uncommon combat unit enchantment, grant unit first strike and negate first strike
- New spell: Spirit of Community, life uncommon global enchantment, grant all city +6 productions and all outpost's growth rate is doubled
- New spell: Heart of Solidarity, life rare global enchantment, eliminate racial unrest from caster wizard's cities - - - New spell: Valkyries, life rare overland summon -
- New spell: Venom, nature uncommon unit enchantment, grant unit poison attack +1 and poison immunity
- New spell: Sacred Ancient, nature uncommon combat summon
- New spell: Colossal Strength, nature rare unit enchantment, melee and non-magic range attack increase by 40%
- New spell: Hurricane, nature rare combat enchantment, all flying units lose flying and all range/thrown/breath to-hit -25%
- New spell: Mariner Mastery, sorcery uncommon global enchantment, all newly trained ship get +3 movement (when moddable, will be updated to +2 to all existing ships)
- New spell: Magocracy, sorcery uncommon global enchantment, magic market and wizard's guild generate gold equal to power they generated.
- New spell: Kraken, sorcery rare overland summon
- New spell: Aether Sink, sorcery city curse, enchanted city power output reduced by 50%, base SP (before buff) of Monument, Linking Tower, and Amplify Tower reduced by 50%
- New spell: Insulation, chaos uncommon unit enchantment, grant unit fire immunity, cold immunity, and lightning resistance
- New spell: Blaze of Glory, chaos uncommon combat unit enchantment, grant unit first strike and doom damage but lose all base defense (not included defense from buff) – design is changed in version 1.4.8
- New spell: Chaos' Blessing, chaos rare city enchantment, newly unit trained from enchanted city gains effect of chaos channel and could synergy with Doom Mastery and generate all 3 types of chaos channel on the same unit.
- New spell: Shadow Strike, death uncommon unit enchantment, grant unit thrown attack at strength 1/3 of melee strength

- New spell: Revenant, death uncommon combat unit enchantment, grant unit melee death touch 0 and regeneration 1 but unit permanently becomes undead
- New spell: Vampiricism, death very rare overland unit enchantment, unit becomes undead and gain bloodsucker and create undead.
- Zeal, Venom, Colossal Strength, Insulation, Blaze of Glory, and Shadow Strike could appear as part of effect of Mystic Surge.
- Nature Embrace lose ability to grant -1 unrest and +3 power through animist's guild
- Chaos Embrace no longer have direct synergy with Doom Mastery due to introduction of Chaos' Blessing but double power generate to compensate
- Max population cap increase from Abundance reduced from +9 to +7
- Cloud Giant's research cost increase from 4000 to 4800
- Doom Mastery move to very rare, research cost increase from 4400 to 6666, research priority increase from 1030 to 1666
- Disintegrate returns as chaos rare spell with research cost decrease from 12000 to 6000 and research priority decrease from 1770 to 1270
- Warp Reality move to rare with research priority decrease from 1825 to 1225
- Chaos Surge research cost reduced to 12000
- Dissolution research cost increased to 15000
- Reaper Slash returns as death rare spell with research cost increase from 1280 to 2560 and research priority increase from 510 to 1020
- Summon Demon renames to Demon and move to rare with research cost decrease from 6000 to 4800 and research priority decrease from 1890 to 1390
- Inner Power casting cost increase from 390 to 600 and upkeep increase from 12 to 20 (due to obvious combo potential with insulation)
- Purity's research group change from high-tier unit enchantment to mid-tier unit enchantment
- Chaos Rift causes 20% of recruited units to receive a random warp creature effect (lowered from 30%)

Units:

- High Men Paladins cost 270 (20 less)
- Barbarian Gladiators have 5 thrown (1 more)
- High Elf Longbowmen cost 50 (5 more)
- New unit: Valkyries, life realm rare creatures, flying cavalry with +2 resistance for all, teleport, and 2 charges of Exaltation
- New unit: Sacred Ancient, nature realm uncommon combat summon creature, immobile tree with +2 resistance for all, and 4 charges of Fairy Dust
- New unit: Kraken, sorcery rare creatures, heavy armor creatures which could attack air in melee and highly resistance to range attack -
- Dwarf hero change to Dwarven Master Engineer, loses constitution and armstrong and -3 attack but gains logistic and guiding beacon, +6 rock ranged attack, 8 ammo, +1 defense, wall crusher, and 3 charges of flame blade.
- Dervish hero lose logistics but gain prayermater instead.
- Gladiators's thrown strength change from 4 to 5
- Longbowmen cost increase from 45 to 50
- Paladins cost decrease from 290 to 270
- Increase AI production priority of swordsmen, and bowmen

Item -

- Death and Stoning could no longer able to enchant on wand and staff
- +4 health cost reduce from 600 to 500
- +5 health cost reduce from 1200 to 850
- New item power: +6 health, cost 1300
- Mystic Power item power no longer give unit aura and now could stack with lionheart
- Vampiric item power gives life steal -5 and make attack from hero create undead, costs 800, requires 5 death books, and can only be added by 'create artifact'

Others

- Wizard would gain 12 uncommon spell have start with 9 books
- Updated AIProd.cas (city production prioritization) – stronger, more practical decision-making.
- Updated Aires.cas (research prioritization)
- Death Touch and Stone Touch no longer apply to magic range attack
- City names list updated and 60 names for each races
- New abilities: Zeal, Venom, Colossal Strength, Insulation, Blaze of Glory, Shadow Strike, Revenant, Mariner
- Grammar and syntax correction of descriptions
- Some monster lair and rampaging budget values adjusted for better balance and measure of difficulty when monster used by neutral AI.

Version 1.4.6

Updated to be compatible with new Caster version 1.04.02

- New item ability +4/+5 health
- Purity unit enchantment now have unit aura
- Simplified max population bonus of Abundance to +9 on top (may be brought down to +7 to match Caster of Magic)
- War Monk, Bronze Sentinel Monk, Amazon, Paladin, Black Knight, Chaos Warrior, Chosen heroes gain negate first strike
- Doom Bat, Death Knight, Great Wyrms gain negate first strike

Version 1.4.5

Spells:

- Wizard who casted Darkest Hour no longer get effect of other wizard's Darkest Hour on research and power

Heroes:

- Golden One hero changes to Bronze Sentinel with constitution and agility instead of 2 random ability
- Swordsman hero gains negate first strike

Units:

- dark elf, high elf, halfling, and nomad gain new unit "pioneers" with ability to move faster than engineer but lose wall crushing ability and disrupt spell charge

Version 1.4.4**Difficulty:**

- AI city growth is +10% on difficulties beyond 'Fair'
- AI food bonus added – 4 extra food per town for each difficulty beyond 'Fair' (e.g. Expert is 8 food per city)
- Rampaging Monster budget reduced closer to original caster of magic, particularly on the higher difficulties where they became too hard for AI (and player) to manage. The monsters continue to be much more advanced on higher difficulties, but at lower numbers.

Wizards:

- Spellweaver boosted to a 25% cost reduction.

Spells:

- Resurrection shifted to arcane rare with 3200 research cost.
- New combat-only life spell: Purify (24 cost)– Permanently removes all non-life, non-permanent unit enchantments (negative and positive) and prevents non-life unit enchantments from being cast on unit until remainder of battle.
- Bug Fix: Dissolution damage calculation was not based on guaranteed hit as intended.
- Bug Fix: Evil Omens cost increase effect not working as intended (caster of magic bug)

Heroes:

- Barbarian hero gains +1 movement
- Draconian hero's fame requirement changes from 20 to 30
- Ranger hero's starting MP changes from 15 to 10, Melee attack changes from 7 to 6
- Amazon hero gains constitution, fame requirement changes from 40 to 30
- Golden One hero's starting melee attack changes from 10 to 9, fame requirement changes from 20 to 30
- Magician hero's starting resistance changes from 8 to 9, fame requirement changes from 40 to 30
- Witch hero's starting resistance changes from 5 to 6, MP gain per level changes from 5 to 6
- Illusionist hero's starting resistance changes from 6 to 8, starting HP changes from 10 to 12
- Swordsman hero's starting resistance changes from 6 to 7, melee attack changes from 10 to 11, defense changes from 7 to 8
- Sage hero's starting resistance changes from 6 to 7
- Bard hero's starting resistance changes from 6 to 7
- Healer hero's starting resistance changes from 8 to 9
- Huntress hero's starting resistance changes from 5 to 6
- Warrior Mage hero's starting resistance changes from 5 to 6
- Wind Mage hero's starting resistance changes from 5 to 7
- Rogue hero's starting resistance changes from 5 to 6
- Unknown hero's starting resistance changes from 8 to 9
- Priestess hero's starting resistance changes from 8 to 9
- Knight hero's starting resistance changes from 6 to 7
- Necromancer hero's starting resistance changes from 8 to 9

Units:

- Normal units no longer require buildings that prerequisite to its required buildings
- Lair cost and rampage cost of ghouls is decreased.
- Lair cost of vampire is decreased
- Lair cost and rampage cost of ghost ship is increased
- Lair cost of lesser lords are increased
- Lair cost and rampage cost of great lords are greatly increased

Wizards:

- Starting Power Changed. Every book always grants starting power and skill, not just when you have 4+ books of a type. Book 3 to Book 4 no longer grants +6 starting power.
- Starting Power Formula is now 9 + 1 for books 1-7 + 2 for books 8-9 + 3 for books 10-11 and +4 for book 12
- Starting kill follows fairly closely, though due to different method of calculation may be slightly lower for first 3 books of a type.

Version 1.4.2**Unit and Summon Changes:**

- Lizardmen Priest unit has been added. Regular cost and unit design with the expected +1hp -1resist swimmer racial traits.

Race Changes:

- Lizardmen now have access to advanced religious buildings (Monastery, Temple, Oracle)
- Lizardmen cannot build Miner's Guild (same as original game)
- Lizardmen Priest unit has been added. Regular cost and unit design with the expected +1hp -1resist swimmer racial traits

Bug Fixes:

- Survival Instinct was granting bonuses incorrectly, usually better than intended.

Version 1.4.1**Unit and Summon Changes:**

- Four racial unique fighter's guild units boosted in effectiveness and cost, following the trend of armory-tier racial uniques.

- Gnoll marauder: 120 cost (+30) 3 upk (+1) 8 melee (+1) 4 armor (-1) 3hp (+1)
- High men knight: 120 cost (+20) 8 melee (+1) 6 resist (+1)
- Nomad sipahi: 120 cost (+20) 3 thrown (+1) 5 range (+1) 5 armor (+1)
- Beasmen Centaur: 100 cost (+10) upk 3 (+1) 6 resist (+1) 5 move (+1)
- War Bears cost 65 (+10), 2 upkeep (+1) and 10hp per figure (+2 per figure). Increased lair and rampaging cost.
- Killer Wasp cost 55 (-10), 1 upkeep (-1) and 30% to hit (-10%) Decreased lair and rampaging cost.
- Hell Hounds cost 55 (+5) and have 4 firebreath (+1). Slightly increased lair and rampaging cost.

Buildings:

- Town Hall now grants 0.5 hammer per worker instead of +0.25 for farmers and workers. (this prevents the issue of switching workers to farmers with no reduction in hammer yield)

Wizards:

- How many spells are granted per book adjusted (1-3-4-5-6-7-8-10) to boost benefit of 1-4 books per realm. Used to start with 1-2-4 but is now 1-3-4
- Spellweaver is now a 1-pick retort and grants a 20% reduction in cost (from 33%) for non-summon non-item overland spells. It is no longer mutually exclusive with Archmage.
- Resheph (Rjak) now gains specialist due to Spellweaver change.

Spells:

- Disintegrate no longer researchable, can still be cast by focus magic efreet.
- Dissolution (cost 90) takes the place of disintegrate, a guaranteed 9 armor-piercing irrecoverable damage (equivalent to 30 strength spell) per figure before shields. This spell's extraordinary power almost always wipes out massively enchanted multi-figure units, thus acting as a counter against mega-buffing strategies.
- Sanctify units become life-realm units
- Blood Lust no longer grants the various immunities. Bloodlusted units can heal naturally.
- Blood Lust can be cast in combat for 25 cost.
- Apotheosis removes no healing and undead from enchanted units
- Land Linking renamed to Land Link, costs 10 more, now also grants +1 resistance to any unit, and can be cast in combat (at 20% cost, or 12 cost)
- Haste can be cast overland for 200 cost and 8 upkeep. The doubled movement applies only to combat.
- Banish costs 40 (+5) and has a resistance modifier of -5 (-1)
- Creature binding costs 55 (+5) and has a resistance modifier of -5 (-1)

Visual:

- Unit debuffs from Drought and Eternal Night enchantments now come with ability icons and explanations, helping player understand the details behind these debuffs.

Version 1.4.0

Unit and Summon Changes:

- Zombies have 20+ higher casting/lair cost, but move 2 (+1) and attack 5 (+1)
- Wraiths lose guaranteed raise undead (redundant with vampire), cost 250 (50 less)
- Gorgons cost 320 (40 less) lose supernatural trait
- Nightblades gain stealth, +1 move, +30 cost
- Ballista and Catapult have 1 less range attack.
- All priest units and draconian saint cost 20 more to produce (120 and 140, respectively)
- Shamans, Monks, Priests and Saints do not count as trespassers when you have a wizard's pact.
- Rampaging monster cost of zombies, fire elemental, water elemental, boars lowered while Phantom Beast, and Ethereal Knight was increased.

Rampage-only Lord Units

- Lesser Chaos/Gaia/Aether Lords will begin showing up as rampaging monsters if game goes for too long. The greater lords show up later in game after lesser lords with greater stats, spellcasting abilities and realm traits.

Spell Changes:

- Dark Rituals changed from 17+50% religion power to 8+100% religion power.

AI Changes:

- Shifted building preferences to fit the balancing changes of Warlord Mod, with added emphasis later on towards Armorer's Guild and Fantastic Stable.
- More likely to build granary

Buildings:

- Miner's Guild now costs 200 (-40) to build.

Bugs Fixed:

- gold display tag for gold gain from alchemist's guild with philosopher's stone
- research display tag for nature's witness
- description display of High Men, Nomad, Orc, and Trolling falling off the screen
- Drought was not correctly reducing new units' attack and defense

Other:

- Updated to support 1.4 Caster of Magic version
- Good/Bad Moon event religious power effect weakened to +50% and -33%.
- First turn one could obtain 'rare' or 'very rare' spell in treasure adjusted to year 6 and 11 in fair difficulty, reduced by difficulty (12 turns per difficulty increase after fair).

Graphic Changes:

- Visually, Dragon Turtle now shows the lightning breath (instead of fire breath)
- Sprite update for Cloud Giant

Version 1.3.8

Unit and Summon Changes:

- Fire Elemental, Earth Elemental, Phantom Beast, Phantom Warrior upkeep reduced by 1
- Ghost Ship loses transport, gains windwalking

Spell Changes:

- Evil Presence (+20 cost) – Not only does it prevent units from being recruited with experience or magic weapons, but now also prevents positive recruitment effects introduced by warlord mod, such as effects from Survival Instinct, free disciplines/resist elements, doom mastery and chaos embrace, etc
- Drought (+50 cost / +1 upk) – Now also causes newly recruited units to be malnourished, are debuffed with 1 less melee and 2 less armor.
- Eternal Night (+200 cost / +9 upk) – Now also causes newly recruited range units to be trained less well in ranged combat, reducing permanently range attacks by 2 permanently while Eternal Night is in play. Eternal Night also given 2 unrest instead of 1.
- Spell of Mastery now costs 9,000 with research cost 330,000.

Graphic Changes:

- Summon event graphic for 'Demon' and 'Vampire' updated
- Minor correction of summon event graphic of 'Coatl'
- Main menu now displays name of mod.

AI Changes:

- NEW: Overland base skill bonus: difficulties 100-100-100-110-120-130-140-150
- Overland spell cost reduction moderated on higher difficulties: 100-95-90-80-70-66-60-60 (see above)
- Fair difficulty now also give +10% power and research bonus to AI

Version 1.3.7

Unit and Summon Changes:

- Klackon Mantis now costs 100 (from 90)
- Klackon Stag Beetle now has +2 melee attack (17 base attack)
- Doom bat now costs 300 (from 320)
- Unicorns gain first strike
- Vampire now loses life steal but gains create undead
- Ghoul costs 80 (from 88) - previous version nerf damaged early-game death too much.
- Disciples, Magisters, and Druids have 6 shots (From 4)
- Barbarian Longship gain 2 melee but lose half the ammo.
- The generic fire galley has +1 ranged but -4 ammo – intended to be more melee oriented.
- Settler HP reduced to 14hp for lizardmen/beastmen, 18hp for dwarves, 22hp for trolls.

Hero and Item Changes:

- Costs have been modified to be lower for weakest effects but become more incremental, to balance against the 'complexity' cost adjustment formula that encourages fewer traits for cost effectiveness. This should decrease the cost of effects such as +1-2 attack/armor/hp/etc.

- Attack: 50-100-150-250-400-650
- Armor: 75-150-225-375 (Armor caps at +4 for items with just +2 with create item).
- Movement: 250-500-1000
- Resistance: 100-200-300-400-500-600
- Spell Skill: 75-150-225-375
- Spell Save: 200-400-800-1600
- Health: 75-150-300
- Item flaming ability cost change to 200
- Item destruction ability cost change to 400
- Item wraithform ability cost change to 250 and no longer and can add with enchant item
- Item bless ability cost change to 150
- Item ability lionheart rename to mystic power, cost increase to 2000 and no longer need life book
- Item water walking ability cost change to 75
- Item pathfinding ability cost change to 100
- Item resist element ability cost change to 150
- Item regeneration ability cost change to 1000
- Item guardian wind ability cost change to 150
- Item teleporting ability cost change to 900
- Item amplifier ability cost change to 300

All heroes now start with base 40% to hit as a minimum. Ranged attack ratings lowered to compensate by approximately 20%. Melee stats

generally unchanged.

Starting Spells and Books:

- Starting and guaranteed common and uncommon tier default spell choices changed to punish players less when choosing default options.
- Books System changed further (see 'Book System' for more detail). To summarize:
 - Guaranteed rares and very rares eliminated
 - Book-based discounts changed from 8% research / 5% spell per book starting book #9 to 5% research (starting book #6) and 3% (starting book #7)
 - Books 9 and 10 grant an additional starting common spell.
 - The minor changes to available # of spells (to be made more symmetrical) and the 1 available spell per realms without books is still part of mod.

AI Changes:

- Enemy AI : algorithm to reroll enemy AI researchable spells when not satisfying certain conditions changed and now takes into consideration changed spells in Warlord Mod.
- Enemy AI has slightly modified production priority of units for better prioritization (Beastmen Chironean Guard fixed, AI should now recruit it)
- AI would not pick some races or mono-sorcery with cult leader
- AI would never pick warlord with mono-death and conjurer with mono-life.
- Difficulty modifier changes around casking skill and gold:
 - *overland skill: 100-95-90-80-70-65-55-50 (smaller bonus starting normal difficulty)
 - *Upkeep cost: 100-95-90-80-75-75-75-60 (smaller bonus starting normal difficulty)
 - *Gold Income: 100-100-110-125-150-175-200-210 (larger bonus starting fair difficulty)
 - *Starting Gold: 0-120-140-200-350-500-700-900 (smaller bonus starting advanced difficulty)

Spell Changes:

- Tree of Knowledge costs 100 less to cast (500 → 400)
- Focus Magic (uncommon-tier in mod) can be cast in combat. However, the mana capacity boost does not translate to current unit mana, preventing abusable strategies.
- Counter Magic costs 10 less, research cost down to 1600, but strength of spell down by 10 points.
- Phantom Beast research cost is now 2140
- Nature's Witness now costs 50 (from 40), was too strong
- Nature's Embrace loses the 20 population growth bonus. Enchantment was strong enough without it.
- Herb Mastery has two added effects: it increases overall population growth of cities by +33% while halving pop reducing effects, a soft counter to Death realm. Herb mastery also has a new spell picture.
- Enlightenment has 20 higher upkeep cost.
- Crack's Call redesigned. Costs 30. It does 4 separate rolls of 25% chance to deal 5 damage and 1 separate roll to bury unit at 5% * unit armor chance (100% chance for 20 armor unit)

In Game Documentation:

- Typos removed from building descriptions
- Typos removed from race descriptions
- Typos removed from spell descriptions.
- outdated descriptions in spellbook interface corrected

Bugs:

- Chaos Embrace Global Spell was resetting firebreath units to firebreath 4 (from higher numbers). Fixed for all but Fire Galley.
- Fixed a bug associated with Divine Order spell negating own magic market bonuses.
- Beastmen and Draconian halberdiers were missing negate first strike

Other:

- Aether Flux event weakened - cost reduction is 1/3 instead of 1/2
- Doom bat and chimera have lower lair cost

Version 1.3.6

Unit Changes:

- All armorer guild and fantastic stable units now consume 2 foods
- Crusaders resistance increase to 7
- Minotaurs resistance increase to 8
- Chironean Guards resistance increase to 8
